Table of Contents

Message from the Conference Chair ................................................................. vii
Conference Committee .................................................................................. viii
Program Committee .................................................................................... ix
Reviewers ....................................................................................................... xi
Panel Session .................................................................................................. xii

Grouping Web Page References into Transactions for Mining
World Wide Web Browsing Patterns ................................................................. 2
  R. Cooley, B. Mobasher, and J. Srivastava

Managing Multi-Expertise in Design of Effective Cooperative
Knowledge-Based System ................................................................................. 10
  S. Labidi

An Agent-Based Approach for Intelligent and Cooperative Systems ............. 19
  Z. Maamar and B. Moulin

Experiments in Using Agent-Based Retrieval from Distributed and
Heterogeneous Databases .............................................................................. 27
  B. Das and D. Kocur

Implementing Articulation Rules for Object Request Brokers as an
Extension to Production Systems .................................................................. 36
  D.A. Maluf

A Roadmap to the Utilization of Intelligent Information Agents: Are
Intelligent Agents the Link Between the Database and Artificial
Intelligence Communities? ............................................................................ 45
  N. Pissinou, R. Benton, B. Bhargyavati, and S. Kurkovsky

An Embedded Visual Programming Interface for Intelligent
Information Retrieval on the Web .................................................................. 46
  C. Lee and Y.-T. Chen

Generating 2-D Space Maps from Unknown Environments Using
Multiple Autonomous Robots .......................................................................... 54
  N.G. Bourbakis

An Object-Centered Multi-Dimensional Data Model with Hierarchically
Structured Dimensions ................................................................................. 65
  M.-S. Hacid and U. Sattle

AMUN: An Object-Oriented Model for Cooperative Spatial Information Systems .... 73
  E. Leclercq, D. Benslimane, and K. Yélongnon

Multiparadigm Modeling with Extension Factor++ ....................................... 81
  X. Lin and X. Wu

Dynamic Knowledge Representation in DOOR ............................................. 89
  R.K. Wong, H.L. Chau, and F.H. Lochovsky
Interactive Acquisition of Knowledge Objects
L. Xu and X. Wu
97

An Approach on Intensional Query Answering at Multiple Abstraction Levels
S.C. Yoon
106

On Atypical Database Transactions: Identification of Probable Frauds using Machine Learning for User Profiling
A.I. Kokkinaki
107

Generating Models of Mental Retardation from Data with Machine Learning
S. Mani, S.W. McDermott, and M.J. Pazzani
114

Discovery from Queries
Y. Wu and N. Craske
120

The RELIEF Retrieval System
I. Ounis and M. Pasca
123

Flexible and Scalable Query Access Planning using an AI Planner
J.L. Ambite and C.A. Knoblock
132

Integrated Search Engine
S. Adali, C. Buñi, and Y. Temtanapat
140

Contextual Retrieval Mechanism for Reusing Task-Based Specifications
J. Lee, L.F. Lai, Y. Fei, S.J. Yang, and W.T. Huang
148

On Complex Type Hierarchy
T. Miura and I. Shioya
156

Feature Selection via Set Cover
M. Dash
165

Similarity Detection among Data Files — A Machine Learning Approach
M. Dash and H. Liu
172

Hypothesis Testing Approach on Noisy Cases in RICAD
J. Daengdej and D. Lukose
180

Invariant Character Recognition in Dynamic Link Architecture
J.N.K. Liu and R.S.T. Lee
188
