Message from the General Chairs

REUNS Fall 2017: The Fourth National Workshop for REU Research in Networking and Systems

Welcome to Orlando, Florida and welcome to the 4th National Workshop for REU Research in Networking and Systems (REUNS) to be held on Oct 22, 2017.

Undergraduate research plays an important role in inspiring our undergraduates to pursue graduate careers in the science and engineering fields. Publishing research in a professional venue is an integral component in the training of future researchers. The National Science Foundation (NSF) provides support for undergraduate research through the Research Experience for Undergraduates (REU) program. The goal of this workshop is to provide a venue for students to publish their conducted research as part of the REU program.

The REUNS workshop is becoming the most well known National technical workshop that is dedicated for REU participants in the areas of networking and systems to share their research outcomes. We are very honored to serve this year as General Chairs. We are also very proud of this year’s program.

The success of REUNS Fall 2017 is attributed to the dedication and hard work of many people. We would like to thank the organization team for MASS for providing exceptional events, workshops and keynote talks in addition to an outstanding collection of technical papers. In particular, we would like to thank the General Chair, Professor Victor Leung, the Program Co-Chairs Professor Anish Arora and Professor Shigang Chen, the local Co-Chairs Professor Damla Turgut and Professor Murat Yuksel, the Publication Chair Dajin Wang, and the Workshop Chair Professor Song Guo.

We would also like to thank all authors for submitting their top quality papers, and to the REUNS program committee members for their thorough evaluation and valuable comments.

We would like to thank the REUNS workshop Steering Committee.

We hope you will enjoy the REUNS technical program.

Shuhui Yang and Mina Guirguis
General Chairs, REUNS Fall 2017
