Message from the Ph.D. Forum Chairs

We are very pleased to present the MDM 2013 Ph.D. Forum. The Ph.D. Forum allows promising students in the field of mobile data management to present their dissertation research and to receive feedback on it. The Forum is organized as a poster session, to encourage interaction between Ph.D. students and researchers from academia, industry, and government.

This is the fourth edition of this event. We received a total of five submissions this year. Each of them was carefully reviewed by four reviewers. As the comments on all five submissions were positive, we decided to include all of them in the final program. The four-page contributions are included in the proceedings.

We would like to thank the members of the Ph.D. Forum program committee for their help during the review process.
