Message from the MDM 2016 Demonstration Track Co-Chairs

The demo track of MDM 2016 received 14 submissions of high quality, all of which went through a comprehensive review process by the MDM 2016 Demonstrations Program Committee. Based on the results of the review process, the Demo Track Co-Chairs selected 12 demo papers for presentation at the conference. These papers cover a wide gamut of interesting and practical topics in mobile computing and data management.

We would like to sincerely thank the authors for their hard work and research efforts towards their demonstrations as well as the papers accompanying the demonstrations. Their high-quality demonstrations will indeed contribute considerably to the MDM community and possibly even stimulate new avenues for collaboration towards the design of novel mobile applications.

We would like to take this opportunity to express our sincere thanks to all the Demonstrations Program Committee members for their effort. Their tremendous efforts in reviewing demo papers as well as in providing valuable comments/suggestions during the review process contributed significantly to the overall high-quality of the demo track. We are also thankful to the General Co-Chairs, Tan Kian-Lee, Vijay Kumar, and Joao Gama, for their encouragement and valuable help in organizing the demo track.

At MDM 2016, we look forward to an exciting set of demo presentations, which will hopefully stimulate new and interesting ideas on improving the state-of-the-art in mobile computing and data management.
