Panel Abstract

Future Directions for Indoor Information Systems: A Panel Discussion ........................................ 1
Demetrios Zeinalipour-Yazti (University of Cyprus)

Advanced Seminars

Sensor Cloud: Sensing-as-a-Service Paradigm ................................................................. 3
Sanjay Madria (Missouri University of Science and Technology)

Targets and Shapes Tracking (Advanced Seminar) ......................................................... 7
Goce Trajcevski (Iowa State University) and Peter Scheuermann
(Northwestern University)

Telco Big Data: Current State & Future Directions ....................................................... 11
Constantinos Costa (University of Cyprus) and Demetrios
Zeinalipour-Yazti (University of Cyprus)

Research Papers

Session 1: Trip Planning

Optimal Meeting Points for Public Transit Users .......................................................... 15
Elham Ahmadi (University of Alberta) and Mario Nascimento (University of Alberta)
Crowd-Based Ecofriendly Trip Planning ........................................................................................................... 24
Dimitrios Tomaras (Athens University of Economics and Business), Vana Kalogeraki (Athens University of Economics and Business), Thomas Liebig (TU Dortmund), and Dimitrios Gunopulos (University of Athens)

Ridesharing-Inspired Trip Recommendations ................................................................................................... 34
Sanjay Madria (Missouri University of Science and Technology), San Yeung (Missouri University of Science and Technology), and Katrina Ward (Missouri University of Science and Technology)

Stochastic Shortest Path Finding in Path-Centric Uncertain Road Networks ....................................................... 40
Georgi Andonov (Aalborg University) and Bin Yang (Aalborg University)

Session 2: Data Mining and Machine Learning on Mobile Data 1

DCount - A Probabilistic Algorithm for Accurately Disaggregating Building Occupant Counts into Room Counts ................................................................................................................................. 46
Mikkel Baun Kjærgaard (University of Southern Denmark), Martin Werner (Leibniz-University Hannover and German Aerospace Center), Fisayo Caleb Sangogboye (University of Southern Denmark), and Krzysztof Arendt (University of Southern Denmark)

Improved Localisation Using Spatio-Temporal Data from Cellular Network ....................................................... 56
Shixin Luo (Singapore Telecommunications Limited), Yibin Ng (Singapore Telecommunications Limited), Terence Zheng Wei Lim (Singapore Telecommunications Limited), Cliff Choon Hua Tan (Singapore Telecommunications Limited), Nannan He (Singapore Telecommunications Limited), Giuseppe Manai (Singapore Telecommunications Limited), and Ying Li (Singapore Telecommunications Limited)

Mining Subgraphs from Propagation Networks through Temporal Dynamic Analysis ....................................... 66
Saeid Hosseini (Singapore University of Technology and Design), Hongzhi Yin (University of Queensland), MeiHui Zhang (Singapore University of Technology and Design), Yuval Elovici (Singapore University of Technology and Design), and Xiaofang Zhou (University of Queensland)

Session 3: Trajectory Mining 1

Tensor Methods for Group Pattern Discovery of Pedestrian Trajectories ........................................................... 76
Abdullah Sawas (York University), Abdullah Aboulaim (York University), Mahmoud Alifi (York University), and Manos Papagefis (York University)

Hierarchical Regions of Interest .......................................................................................................................... 86
Priti Järv (Tallinn University of Technology), Tanel Tammet (Tallinn University of Technology), and Marten Tall (Tallinn University of Technology)

Adaptive Travel-Time Estimation: A Case for Custom Predicate Selection ......................................................... 96
Robert Waury (Aalborg University), Christian S. Jensen (Aalborg University), and Kristian Torp (Aalborg University)
Session 4: Data Mining and Machine Learning on Mobile Data 2

Decaying Telco Big Data with Data Postdiction ................................................................. 106
Constantinos Costa (University of Cyprus), Andreas Charalampous (University of Cyprus), Andreas Konstantinidis (University of Cyprus and Frederick University), Demetrios Zeinalipour-Yazti (University of Cyprus), and Mohamed F. Mokbel (Qatar Computing Research Institute)

POI Recommendation of Location-Based Social Networks Using Tensor Factorization .................. 116
Guoqiong Liao (Jiangxi University of Finance and Economics), Shan Jiang (Jiangxi University of Finance and Economics), Zhiheng Zhou (Jiangxi University of Finance and Economics), Changxuan Wan (Jiangxi University of Finance and Economics), and Xiping Liu (Jiangxi University of Finance and Economics)

Outlier Detection for Multidimensional Time Series Using Deep Neural Networks ......................... 125
Tung Kieu (Aalborg University), Bin Yang (Aalborg University), and Christian S. Jensen (Aalborg University)

Session 6: Trajectory Mining 2

Origin-Destination Trajectory Diversity Analysis: Efficient Top-k Diversified Search ...................... 135
Dan He (University of Queensland), Boyu Ruan (University of Queensland), Bolong Zheng (Aalborg University), and Xiaofang Zhou (University of Queensland)

A Semi-Supervised Approach for the Semantic Segmentation of Trajectories ................................ 145
Amilcar Soares Junior (Dalhousie University), Valeria Cesario Times (Federal University of Pernambuco), Chiara Renso (ISTI-CNR), Stan Matwin (Dalhousie University), and Lucídio A.F. Cabral (Federal University of Paraíba)

Corridor Learning Using Individual Trajectories ........................................................................... 155
Nikolaos Zygouras (National and Kapodistrian University of Athens) and Dimitrios Gunopulos (National and Kapodistrian University of Athens)

Identifying Movements in Noisy Crowd Analytics Data .............................................................. 161
Cristian Chilipirea (University Politehnica of Bucharest), Ciprian Dobre (University Politehnica of Bucharest), Mitra Baratchi (Leiden University), and Maarten van Steen (University of Twente)

Session 7: Private Query Processing and Ride Sharing

Distributed kNN Query Authentication ......................................................................................... 167
Cheng Xu (Hong Kong Baptist University), Jianliang Xu (Hong Kong Baptist University), and Byron Choi (Hong Kong Baptist University)

Privacy Preserving Reverse k-Nearest Neighbor Queries ............................................................ 177
Layla Pournajaf (Emory University), Farnaz Tahmasebian (Emory University), Li Xiong (Emory University), Vaidy Sunderam (Emory University), and Cyrus Shahabi (University of Southern California)
Privacy-Preserving Spatial Crowdsourcing Based on Anonymous Credentials ........................................... 187
Xun Yi (RMIT University), Fang-Yu Rao (Purdue University), Gabriel Ghinita (University of Massachusetts Boston), and Elisa Bertino (Purdue University)

Efficient Matching of Offers and Requests in Social-Aware Ridesharing .................................................. 197
Xiaoyi Fu (Hong Kong Baptist University), Ce Zhang (Hong Kong Baptist University), Hua Lu (Aalborg University), and Jianliang Xu (Hong Kong Baptist University)

Session 8: Mobile Data Processing

Reputation and Credit Based Incentive Mechanism for Data-Centric Message Delivery in DTNs ........... 207
Himanshu Jethawa (Missouri University of Science and Technology) and Sanjay Madria (Missouri University of Science and Technology)

Top-k Query Processing with Replication Strategy in Mobile Ad Hoc Networks ........................................... 217
Yuya Sasaki (Osaka University), Takahiro Hara (Osaka University), and Yoshiharu Ishikawa (Nagoya University)

Load-Balanced Task Allocation for Improved System Lifetime in Mobile Crowdsensing .......................... 227
Garvita Bajaj (IIIT-Delhi) and Pushpendra Singh (IIIT-Delhi)

ROGER: An On-Line Flight Efficiency Monitoring System Using ADS-B Data ............................................. 233
Shen Wang (CeADAR), Aditya Grover (CeADAR), Brian Mac Namee (CeADAR), Philip Plantthird (FlightRadar24 AB), Javier López-Leonés (Boeing Research and Technology Europe), and Pablo Sánchez-Escalónilla (CRIDA)

Session 9: Crowd Sourcing and LBSN

A Cost-Aware Incentive Mechanism in Mobile Crowdsourcing Systems ..................................................... 239
Ellen Mitsopoulou (Athens University of Economics and Business), Ioannis Boutsis (Athens University of Economics and Business), Vana Kalogeraki (Athens University of Economics and Business), and Jia Yuan Yu (Concordia University)

Predicting Visitors Using Location-Based Social Networks ......................................................................... 245
Muhammad Aamir Saleem (Aalborg University), Felipe Soares Da Costa (Aalborg University), Peter Dolog (Aalborg University), Panagiotis Karras (Aarhus University), Torben Bach Pedersen (Aalborg University), and Toon Calders (University of Antwerp)

Next Check-in Location Prediction via Footprints and Friendship on Location-Based Social Networks ........... 251
Yijun Su (Institute of Information Engineering), Xiang Li (Institute of Information Engineering), Wei Tang (Institute of Information Engineering), Ji Xiang (Institute of Information Engineering), and Yuanye He (Institute of Information Engineering)
Industrial Papers

Session 5: Industrial Papers

Accurate Fuel Estimates Using CAN Bus Data and 3D Maps ................................................................. 257
Ove Andersen (Aalborg University) and Kristian Torp (Aalborg University)

Frequent Pattern-Based Map-Matching on Low Sampling Rate Trajectories ............................................ 266
Yukun Huang (Tongji University), Weixiong Rao (Tongji University), Zhiqiang Zhang (Tongji University), Peng Zhao (Tongji University), Mingxuan Yuan (Huawei Noah’s Ark Lab), and Jia Zeng (Huawei Noah’s Ark Lab)

Demo Papers

DriveLaB: A Platform for Reducing Speeding ............................................................................................... 274
Thomas F. Olsen (Aalborg University), Kasper F. Pedersen (Aalborg University), Dennis Rasmussen (Aalborg University), and Kristian Torp (Aalborg University)

Concept for Evaluation of Techniques for Trajectory Distance Measures .................................................. 276
Douglas Alves Peixoto (The University of Queensland), Han Su (University of Electronic Science and Technology of China), Hung Nguyen Quoc Viet (Griffith University), Bela Stantic (Griffith University), Bolong Zheng (Aalborg University), and Xiaofang Zhou (The University of Queensland)

aSTEP: Aau’s Spatio-TEmporal Data Analytics Platform ............................................................................. 278
Marc Beuchert (Aalborg University), Steffen Hald Jensen (Aalborg University), Omar Ali Sheikh-Omar (Aalborg University), Mathias Bach Svendsen (Aalborg University), and Bin Yang (Aalborg University)

TBD-DP: Telco Big Data Visual Analytics with Data Postdiction ................................................................. 280
Constantinos Costa (University of Cyprus), Andreas Charalampous (University of Cyprus), Andreas Konstantinidis (University of Cyprus and Frederick University), Demetrios Zeinalipour-Yazti (University of Cyprus), and Mohamed F. Mokbel (Qatar Computing Research Institute)

Benjamin Sliwa (TU Dortmund University), Thomas Liebig (TU Dortmund University), Robert Falkenberg (TU Dortmund University), Johannes Pillmann (TU Dortmund University), and Christian Wietfeld (TU Dortmund University)

The AutoMat CVIM - A Scalable Data Model for Automotive Big Data Marketplaces .............................. 284
Johannes Pillmann (TU Dortmund University), Benjamin Sliwa (TU Dortmund University), and Christian Wietfeld (TU Dortmund University)

Trajectolizer: Interactive Analysis and Exploration of Trajectory Group Dynamics .................................. 286
Abdullah Sawas (York University), Abdullah Abuolaim (York University), Mahmoud Afifi (York University), and Manos Papagelis (York University)
FMS: Managing Crowdsourced Indoor Signals with the Fingerprint Management Studio .................. 288
   Marileni Angelidou (University of Cyprus), Constantinos Costa
   (University of Cyprus), Artyom Nikitin (Skoltech), and Demetrios
   Zeinalipour-Yazti (University of Cyprus)

VIPTRA: Visualization and Interactive Processing on Big Trajectory Data ................................. 290
   Xin Ding (Zhejiang University), Rui Chen (Zhejiang University), Lu
   Chen (Aalborg University), Yunjun Gao (Zhejiang University), and
   Christian S. Jensen (Aalborg University)

ChainMOB: Mobility Analytics on Blockchain .............................................................................. 292
   Bulat Nasrulin (Shenzhen Institutes of Advanced Technology), Muhammad
   Muzammal (Shenzhen Institutes of Advanced Technology), and Qiang Qu
   (Shenzhen Institutes of Advanced Technology)

Data Analytics for Snow Plow Trucks Fleet .................................................................................. 294
   Michael R. Entin (Iowa State), Colin M. Heirichs (Iowa State), Alan
   Peine (Iowa State), Evan R. Warych (Iowa State), James Timmerman
   (Henderson Products), and Shane Cresmore (Henderson Products)

Author Index .................................................................................................................................. 297
