Proceedings

Seventh International Software Metrics Symposium

METRICS 2001

4-6 April 2001
London, England

Sponsored by
IEEE Computer Society Technical Council on Software Engineering

Los Alamitos, California
Washington • Brussels • Tokyo

## Keynote

**Learning to Measure or Measuring to Learn?**

*ANNELIESE AMSchLER ANDREWS*

## Session 1: Software Effort and Cost

1. **Building a Software Cost Estimation Model Based on Categorical Data**
   *L. Angelis, I. Stamelos, and M. Morisio*
   - Page 4
2. **Using Public Domain Metrics to Estimate Software Development Effort**
   *R. Jeffery, M. Ruhe, and I. Wieczorek*
   - Page 16
3. **Predicting with Sparse Data**
   *M. Shepperd and M. Cartwright*
   - Page 28

## Session 2: Software Inspections

1. **A Controlled Experiment to Assess the Effectiveness of Inspection Meetings**
   *A. Bianchi, F. Lanubile, and G. Visaggio*
   - Page 42
2. **Investigating the Impact of Reading Techniques on the Accuracy of Different Defect Content Estimation Techniques**
   *B. Freimut, O. Laitenberger, and S. Biffl*
   - Page 51
3. **Influence of Team Size and Defect Detection Technique on Inspection Effectiveness**
   *S. Biffl and W. Gutjahr*
   - Page 63

## Session 3A: Software Projects

1. **Assessing the Benefits of Imputing ERP Projects with Missing Data**
   *I. Myrtveit, E. Stensrud, and U. Olsson*
   - Page 78
2. **A Fuzzy Logic Based Set of Measures for Software Project Similarity: Validation and Possible Improvements**
   *A. Idri and A. Abran*
   - Page 85
3. **An Experiment for Evaluating the Effectiveness of Using a System Dynamics Simulation Model in Software Project Management Education**
   *D. Pfahl, N. Koval, and G. Ruhe*
   - Page 97

## Session 3B: Software Modules

1. **A Consideration of the Impact of Interactions with Module Effects on the Direct Measurement of Subjective Software Attributes**
   *J. Moses*
   - Page 112
Measuring Coupling and Cohesion of Software Modules:
An Information-Theory Approach ........................................................................................................ 124
E. Allen, T. Khoshgoftaar, and Y. Chen
Cohesion is Structural, Coherence is Functional: Different Views,
Different Measures .................................................................................................................................. 135
V. Mišić

Session 4A: Panel
What Good Are Metrics? The Views of Industry and Academia ............................................................ 146
Panel chair: S. Pfleeger

Session 4B: Testing
Usage Measurement for Statistical Web Testing and Reliability Analysis ............................................. 148
C. Kallepalli and J. Tian
An Experiment on Lead-Time Impact in Testing of Distributed Real-Time Systems ............................. 159
T. Olsson, N. Bauer, P. Runeson, and L. Bratthall
Understanding and Measuring the Sources of Variation in the Prioritization of Regression Test Suites .................................................. 169
S. Elbaum, D. Gable, and G. Rothermel

Session 5A: State-of-the-Art Seminars
Challenges of Global Software Development ......................................................................................... 182
A. Mockus and J. Herbsleb
A Primer on Object-Oriented Measurement ............................................................................................ 185
K. El Emam

Session 5B: Maintenance and Evolution
Controlling Overfitting in Software Quality Models: Experiments with Regression Trees and Classification .................................................................................................................. 190
T. Khoshgoftaar, E. Allen, and J. Deng
Defining and Applying Metrics in the Context of Continuing Software Evolution ............................... 199
J. Ramil and M. Lehman
Evaluating Software Degradation through Entropy .................................................................................. 210
A. Bianchi, D. Caivano, F. Lanubile, and G. Visaggio

Session 6A: Software Measurement Infrastructure
A Targeted Assessment of the Software Measurement Process .............................................................. 222
M. Berry and M. Vandenbroek
V-GQM: A Feed-Back Approach to Validation of a GQM Study .......................................................... 236
T. Olsson and P. Runeson
Integrating Goal-Oriented Measurement in Industrial Software Engineering: Industrial Experiences with and Additions to the Goal/Question/Metric Method (GQM) ................................................................. 246
R. van Solingen and E. Berghout

Session 6B: Object-Oriented Systems and COTS
The Impact of Design Properties on Development Cost in Object Oriented Systems .................................. 260
L. Briand and J. Wüst
Robustness and Diagnosability of OO Systems Designed by Contracts ................................................ 272
B. Baudry, Y. Le Traon, and J-M Jézéquel
Robustness and Diagnosability of OO Systems Designed by Contracts ................................................................. 272
B. Baudry, Y. Le Traon, and J-M Jézéquel

A Method for Efficient Measurement-based COTS Assessment and Selection —
Method Description and Evaluation Results ........................................................................................................... 285
M. Ochs, D. Pfahl, G. Chrobok-Diening, and B. Nothhelfer-Kolb

Session 7A: Industrial Application and Experiences

Better Validation in a World-Wide Development Environment ................................................................. 298
C. Ebert, C. Parro, R. Suttels, and H. Kolarczyk

Measurement Automation: Methodological Background and Practical Solutions —
A Multiple Case Study ................................................................................................................................. 306
S. Komi-Siriviö, P. Parviainen, and J. Ronkainen

Making the Software Factory Work: Lessons from a Decade of Experience ........................................... 317
H. Siy, J. Herbsleb, A. Mockus, M. Krishnan, and G. Tucker

Session 7B: Prediction

Investigation of Logistic Regression as a Discriminant of Software Quality ............................................ 328
N. Schneidewind

Measurement, Prediction and Risk Analysis for Web Applications ......................................................... 338
R. Fewster and E. Mendes

Using Simulation to Evaluate Prediction Techniques .................................................................................. 349
M. Shepperd and G. Kadoda

Keynote

Software Engineering — What Has It Done for You? .............................................................................. 362
David G. Griffiths

Author Index ................................................................................................................................. 363
