Table of Contents

International Workshop on Multimedia Software Development

Introduction

Issues in Multimedia Software Development ........................................ 2
  M. Mühlhäuser

Invited Talk

A Software Platform for Distributed Multimedia Applications .................. 10
  C. Blum, R. Molva

Architectures and Building Blocks for DMMA I

An Integrated Architecture for Open Distributed Multimedia Computing .......... 24
  T. Qian, S.-M. Tan, R. Campbell

Architectural Design of Adaptive Distributed Multimedia Systems ............. 31
  G. v. Bochmann, B. Kerhervé, A. Hafid, P. Dini, A. Pons

Multimedia Building Blocks for Distributed Applications .......................... 41
  J.C. Fritzschre

Architectures and Building Blocks for DMMA II

A Flexible Type Checking Model for Stream Interface Binding .................. 52
  F. Eliassen, J.R. Nicol

Multimedia Conferencing Systems as Building Blocks for Complex Cooperative Applications ......................................................... 61
  O. Frick

Configuring Distributed Multimedia Applications using CINEMA ................ 69
  I. Barth

Keynote

Digital Hollywood – The Turbulent Marriage of Computer, Telecom, and Media Industry .......................................................... 78
  P. Krieg
Towards a DMMA Development Process

An Engineering Approach to Electronic Publishing ........................................... 80
   E. Fedchak, L. Duvall

A Design Methodology to Maintain Consistency between Functional Behavior and
Multimedia Presentation .................................................................................... 89
   G. Lux

Integrating Design and Development in the Production of
Multimedia Documents .................................................................................... 98
   S.J. Morris, A.C.W. Finkelstein

Composing Multiple Media into Multimedia

Specification of Synchronization Requirements for
Distributed Multimedia Systems ........................................................................ 110
   S. Vuong, K. Cooper, M. Ito

Spatio-Temporal Composition in Multimedia Applications ............................. 120
   M. Vazirgiannis, Y. Theodoridis, T. Sellis

Formal Specification of Multimedia Authoring ................................................ 128
   T.K. Shih, D.-A. Chiang, H.-C. Keh, C.-C. Shis

Hypermedia Standards: What is Missing? – Integration and Authoring

Reviewing two Multimedia Presentation (quasi-) Standards .............................. 140
   P. Rösch, M. Baentsch

Authoring MHEG Presentations with GLASS-Studio ........................................ 150
   T. Leidig, P. Rösch

DMMA: What is Missing? – Interaction and Security

Adaptations of the Text Media Type: Addressing the User’s Perspective ............ 160
   A. Koumpis, C. Karagiannidis, C. Stephanidis

Security Enhanced MPEG Player ...................................................................... 169
   Y. Li, Z. Chen, S.-M. Tan, R.H. Campbell

Index of Authors .............................................................................................. 177
