Frontmatter
Message from the Chairs ............................................................ iii
MODELS 2015 Organization ......................................................... iv
Sponsors ..................................................................................... viii

Keynotes
Modelling the Climate System: Is Model-Based Science Like Model-Based Engineering? (Keynote)
Steve Easterbrook — University of Toronto, Canada ................................................................. 1
Software Supply Chains (Keynote)
Gail Murphy — University of British Columbia, Canada ......................................................... 2
Automobile: Aircraft or Smartphone? Modeling Challenges and Opportunities in Automotive Systems (Keynote)
Ramesh S — General Motors, USA ......................................................................................... 3

Foundations
Reusable Event Types for Models at Runtime to Support the Examination of Runtime Phenomena
Michael Szvetits and Uwe Zdun — University of Applied Sciences Wiener Neustadt, Austria; University of Vienna, Austria .................................................................................. 4
Incremental Symbolic Execution of Evolving State Machines
Amal Khalil and Juergen Dingel — Queen’s University, Canada .................................................. 14
A Framework for Relating Syntactic and Semantic Model Differences
Shahar Maoz and Jan Oliver Ringert — Tel Aviv University, Israel ........................................... 24
Engineering Tagging Languages for DSLs
Timo Greifenberg, Markus Look, Sebastian Roidl, and Bernhard Rumpe — RWTH Aachen University, Germany ........................................................................................................... 34
Maikel Leemans and Wil M. P. van der Aalst — Eindhoven University of Technology, Netherlands ................................................................................................................. 44
State Machine Antipatterns for UML-RT
Tuhin Kanti Das and Juergen Dingel — Queen’s University, Canada .......................................... 54
Enhancing the Communication Value of UML Models with Graphical Layers
Yosser El Ahmar, Sébastien Gérard, Cédric Dumoulin, and Xavier Le Pallec — CEA, France; University of Lille, France ................................................................................................................. 64
A Model-Based Framework for Probabilistic Simulation of Legal Policies
Ghanem Soltana, Nicolas Sannier, Mehrdad Sabetzadeh, and Lionel C. Briand — University of Luxembourg, Luxembourg ........................................................................................................... 70
Stream my Models: Reactive Peer-to-Peer Distributed Models@run.time
Thomas Hartmann, Assaad Moawad, Francois Fouquet, Gregory Nain, Jacqueline Klein, and Yves Le Traon — University of Luxembourg, Luxembourg ............................................................................... 80
Beyond Discrete Modeling: A Continuous and Efficient Model for IoT
Assaad Moawad, Thomas Hartmann, Francois Fouquet, Gregory Nain, Jacqueline Klein, and Yves Le Traon — University of Luxembourg, Luxembourg ............................................................................... 90
Infrastructure as Runtime Models: Towards Model-Driven Resource Management
Filip Křížka, Romain Seinturier — Czech Technical University, Czech Republic; INRIA, France ................................................................................................................. 100
Fragmenta: A Theory of Fragmentation for MDE
Nuno Amálio, Juan de Lara, and Esther Guerra — University of York, UK; Autonomous University of Madrid, Spain ................................................................. 106
Consistent Co-Evolution of Models and Transformations
Angelika Kusel, Jürgen Etzlstorfer, Elisabeth Kapsammer, Werner Retschitzegger, Wieland Schwinger, and Johannes Schönböck — JKU Linz, Austria; University of Applied Sciences Upper Austria at Hagenberg, Austria ................................................................. 116

<tbody>
<tr>
<td>Synthesizing Tests for Combinatorial Coverage of Modal Scenario Specifications</td>
<td>Valerio Panzica La Manna, Itai Segall, and Joel Greenyer — Massachusetts Institute of Technology, USA; Bell Labs, Israel; Leibniz Universität Hannover, Germany</td>
<td>126</td>
</tr>
<tr>
<td>Systematically Deriving Domain-Specific Transformation Languages</td>
<td>Katrin Hölldobler, Bernhard Rumpe, and Ingo Weisemöller — RWTH Aachen University, Germany</td>
<td>136</td>
</tr>
<tr>
<td>Quick Fixing ATL Model Transformations</td>
<td>Jesús Sánchez Cuadrado, Esther Guerra, and Juan de Lara — Autonomous University of Madrid, Spain</td>
<td>146</td>
</tr>
<tr>
<td>A-posteriori Typing for Model-Driven Engineering</td>
<td>Juan de Lara, Esther Guerra, and Jesús Sánchez Cuadrado — Autonomous University of Madrid, Spain</td>
<td>156</td>
</tr>
<tr>
<td>Pattern-Based Development of Domain-Specific Modelling Languages</td>
<td>Ana Pescador, Antonio Garmendia, Esther Guerra, Jesús Sánchez Cuadrado, and Juan de Lara — Autonomous University of Madrid, Spain</td>
<td>166</td>
</tr>
<tr>
<td>Checking Concurrent Behavior in UML/OCL Models</td>
<td>Nils Przigoda, Christoph Hilken, Robert Wille, Jan Peleska, and Rolf Drechsler — University of Bremen, Germany</td>
<td>176</td>
</tr>
<tr>
<td>A Behavioral Coordination Operator Language (BCOoL)</td>
<td>Matias Ezequiel Vara Larsen, Julien DeAntoni, Benoît Combemale, and Frédéric Mallet — University of Nice Sophia Antipolis, France; INRIA, France</td>
<td>186</td>
</tr>
<tr>
<td>Textual Diagram Layout Language and Visualization Algorithm</td>
<td>Balázs Gregorics, Tibor Gregorics, Gábor Ferenc Kovács, András Dobreff, and Gergely Dévai — Eötvös Loránd University, Hungary</td>
<td>196</td>
</tr>
<tr>
<td>A Controlled Experiment with Usability Inspection Techniques Applied to Use Case Specifications: Comparing the MIT 1 and the UCE Techniques</td>
<td>Natasha M. Costa Valentim, Jacilane Rabelo, Ana Carolina Oran, Tayana Conte, and Sabrina Marczak — Federal University of Amazonas, Brazil; PUCRS, Brazil</td>
<td>206</td>
</tr>
<tr>
<td>A Unifying Approach to Connections for Multi-Level Modeling</td>
<td>Colin Atkinson, Ralph Gerbig, and Thomas Kühne — University of Mannheim, Germany; Victoria University of Wellington, New Zealand</td>
<td>216</td>
</tr>
<tr>
<td>A Statistical Analysis Approach to Assist Model Transformation Evolution</td>
<td>Roberto Rodriguez-Echeverria and Fernando Macias — University of Extremadura, Spain; Bergen University College, Norway</td>
<td>226</td>
</tr>
<tr>
<td>Enriching Megamodel Management with Collection-Based Operators</td>
<td>Rick Salay, Sahar Kokaly, Alessio Di Sandro, and Marsha Chechik — University of Toronto, Canada; McMaster University, Canada</td>
<td>236</td>
</tr>
<tr>
<td>SoSPA: A System of Security Design Patterns for Systematically Engineering Secure Systems</td>
<td>Phu H. Nguyen, Koen Yskout, Thomas Heyman, Jacques Klein, Riccardo Scandariato, and Yves Le Traon — University of Luxembourg, Norway; KU Leuven, Belgium; University of Luxembourg, Luxembourg; KU Leuven, Sweden</td>
<td>246</td>
</tr>
<tr>
<td>Fully Verifying Transformation Contracts for Declarative ATL</td>
<td>Bentley James Oakes, Javier Troya, Levi Lúcio, and Manuel Wimmer — McGill University, Canada; Vienna University of Technology, Austria</td>
<td>256</td>
</tr>
<tr>
<td>Extracting Frame Conditions from Operation Contracts</td>
<td>Philipp Niemann, Frank Hilken, Martin Gogolla, and Robert Wille — University of Bremen, Germany</td>
<td>266</td>
</tr>
<tr>
<td>Identification of Simulink Model Antipattern Instances using Model Clone Detection</td>
<td>Matthew Stephan and James R. Cordy — Miami University, USA; Queen’s University, Canada</td>
<td>276</td>
</tr>
<tr>
<td>Concern-Oriented Interfaces for Model-Based Reuse of APIs</td>
<td>Matthias Schöfft and Jörg Kienzle — McGill University, Canada</td>
<td>286</td>
</tr>
<tr>
<td>On the Use of UML Documentation in Software Maintenance: Results from a Survey in Industry</td>
<td>Ana M. Fernández-Sáez, Danilo Caivano, Marcela Genero, and Michel R. V. Chaudron — University of Castile—La Mancha, Spain; University of Bari, Italy; Chalmers University of Technology, Sweden</td>
<td>292</td>
</tr>
<tr>
<td>Performance Prediction upon Toolchain Migration in Model-Based Software</td>
<td>Aymen Ketata, Carlos Moreno, Sebastian Fischmeister, Jia Liang, and Krzysztof Czarnecki — University of Waterloo, Canada</td>
<td>302</td>
</tr>

</table>
Employing Classifying Terms for Testing Model Transformations
Martin Gogolla, Antonio Vallecillo, Loli Burgueño, and Frank Hilken — University of Bremen, Germany; University of Málaga, Spain .......................................................... 312

Pattern-Based Debugging of Declarative Models
Vajih Montaghami and Derek Rayside — University of Waterloo, Canada .......................................................... 322

Integrating Goal-Oriented and Use Case-Based Requirements Engineering: The Missing Link
Tuong Huan Nguyen, John Grundy, and Mohamed Almorsy — Swinburne University of Technology, Australia ........ 328

MDE in Practice

Applying Product Line Use Case Modeling in an Industrial Automotive Embedded System: Lessons Learned and aefined Approach
Ines Hajri, Arda Goknil, Lionel C. Briand, and Thierry Stephany — University of Luxembourg, Luxembourg; IEE, Luxembourg ......................................................... 338

Systematic Generation of Standard Compliant Tool Support of Diagrammatic Modeling Languages
Alexis Fouché, Florian Noyrit, Sébastien Gérard, and Maged Elaasar — CEA, France; Carleton University, Canada . 348

Improving Reuse by means of Asymmetrical Model Migrations: An Application to the Orcc Case Study
Paola Vallesio, Mickaël Kerboeuf, Kevin J. M. Martin, and Jean-Philippe Babau — University Bretagne-Occidentale, France; University Bretagne-Sud, France ......................................................... 358

Toward Overcoming Accidental Complexity in Organisational Decision-Making
Vinay Kulkarni, Souvik Barat, Tony Clark, and Balbir Barn — Tata Consultancy Services, India; Middlesex University, UK .......................................................... 368

Modeling User Intentions for In-Car Infotainment Systems using Bayesian Networks
Daniel Lüdecke, Christoph Seidl, Jens Schneider, and Ina Schaefer — Volkswagen, Germany; TU Braunschweig, Germany .......................................................... 378

Feature Modeling of Two Large-Scale Industrial Software Systems: Experiences and Lessons Learned
Daniela Lettner, Klaus Eder, Paul Grünbacher, and Herbert Prähofer — JKU Linz, Austria; KEBA, Austria ........ 386

Formalizing the ISO/IEC/IEEE 29119 Software Testing Standard
Shaukat Ali and Tao Yue — Simula Research Laboratory, Norway .......................................................... 396

A Megamodel for Software Process Line Modeling and Evolution
Jocelyn Simmonds, Daniel Perovich, Maricel Cecilia Bastarrica, and Luis Silvestre — University of Chile, Chile . 406

Modular Model-Based Supervisory Controller Design for Wafer Logistics in Lithography Machines
Bram van der Sanden, Michel Reniers, Marc Geilen, Twan Basten, Johan Jacobs, Jeroen Voeten, and Ramon Schiffelers — Eindhoven University of Technology, Netherlands; ASML, Netherlands .......................................................... 416

An Automated Model Based Testing Approach for Platform Games
Sidra Iftikhar, Muhammad Zohaib Iqbal, Muhammad Uzair Khan, and Wardah Mahmood — National University of Computer and Emerging Sciences, Pakistan; National University of Computer and Emerging Sciences, Luxembourg . 426

Model-Driven Regulatory Compliance: A Case Study of “Know Your Customer“ Regulations
Sagar Sunkle, Deepali Khokar, and Vinay Kulkarni — Tata Consultancy Services, India .......................................................... 436

SoSyM Abstracts

Identifying Duplicate Functionality in Textual Use Cases by Aligning Semantic Actions (SoSyM Abstract)
Alejandro Rago, Claudia Marcos, and J. Andrés Díaz-Pace — UNICEN University, Argentina .......................................................... 446

Enhanced Graph Rewriting Systems for Complex Software Domains (SoSyM Abstract)
Cédric Eichler, Thierry Monteil, Patricia Stolf, Alfredo Greco, and Khalil Drira — CNRS, France; IRIT, France; Politecnico di Bari, Italy .......................................................... 447

A Situational Method for Semi-automated Enterprise Architecture Documentation (SoSyM Abstract)
Matthias Farwick, Christian M. Schweda, Ruth Breu, and Inge Henschke — University of Innsbruck, Austria; Reutlingen University, Germany .......................................................... 448
