Table of Contents

Fourth International Workshop on Model-Based Methodologies for Pervasive and Embedded Software (MOMPES 2007)

Message from the Organizers ___________________________ vii
MOMPES 2007 Committees ________________________________ viii

Invited Papers

On the Applicability Scope of Model Driven Engineering _____________________________ 3
Jean Bézivin, Mikaël Barbero, and Frédéric Jouault

Executable Use Cases: A Supplement to Model-Driven Development? ____________________________ 8
Jens Bæk Jørgensen

Regular Papers

Session on Pervasive Systems

Towards a Model-Driven Approach for Ontology-Based Context-Aware Application Development: A Case Study __________________________________________________________ 21
Nektarios Georgalas, Shumao Ou, Manooch Azmoodeh, and Kun Yang

Tool Support for Model Driven Development of Pervasive Systems ___________________________ 33
Carlos Cetina, Estefanía Serral, Javier Muñoz, and Vicente Pelechano

Session on Modelling Approaches

A Generic Execution Framework for Models of Computation ___________________________________ 45
Cécile Hardebolle, Frédéric Boulanger, Dominique Marcadet, and Guy Vidal-Naquet

XIS—UML Profile for eXtreme Modeling Interactive Systems ___________________________________ 55
Alberto Rodrigues da Silva, João Saraiva, Rui Silva, and Carlos Martins

Session on Embedded Systems

ModES: Embedded Systems Design Methodology and Tools Based on MDE ______________________ 67
Francisco Assis M. do Nascimento, Márcio F.S. Oliveira, and Flávio Rech Wagner

Designing a Unified Process for Embedded Systems ___________________________________________ 77
Elvina Riccobene, Patrizia Scandurra, Alberto Rosti, and Sara Bocchio

Session on Software Product Lines

Adopting Computational Independent Models for Derivation of Architectural Requirements of Software Product Lines ________________________________________ 91
Alexandre Bragança and Ricardo J. Machado

Model-driven Development of Particle System Families _________________________________________ 102
Michalis Anastasopoulos and András Balogh
Session on Formal Approaches

Model-Driven Consistency Checking of Behavioural Specifications

Bas Graaf and Arie van Deursen

115

Challenges when Using Model Driven Architecture in the Development of Safety Critical Software

Philippa Conmy and Richard F. Paige

127
