Welcome Message from Program Chairs

We would like to extend our welcome and express our gratitude to all of the authors of submitted papers and to all of the attendees, for their contributions and participation.

Given that MUE is organized for the first time, the number of 688 submitted papers it has attracted is very impressive. The international character of the conference is reflected in the fact that submissions came from 23 countries.

The submitted abstracts and papers went through a thorough reviewing process. As a result, 178 articles were accepted for the MUE 2007 proceedings published by IEEE, reflecting (but not limited to) the following areas:

1. Bioinformatics and Computational Biology
2. Communications and Networking
3. Data Mining and Pattern Recognition
4. E-Science and Web Intelligence
5. Grid and Distributed Computing
6. Hardware and Software Co-Design
7. Health and Medical Informatics
8. Hierarchical and Adaptive Learning Systems
9. Human-Computer Interaction and Multimedia
10. Image and Signal Processing
11. Industrial and Environmental Engineering
12. Intelligent Robotics and Autonomous Agents
13. KDD and Data Warehousing
14. Multi-Scale Modeling and Simulation
15. Security and Safety Systems
16. Smart Card and Chip Technologies
17. Soft Computing and Rough Sets
18. Ubiquitous Computing and Embedded Systems

And 30 papers were invited from Keynote Speakers, Chairs and Committee members to be included in our MUE 2007 proceedings.

Achieving such a high quality of proceedings would have been impossible without the huge work that was undertaken by the International Program Committee members. We take this opportunity to thank them for their great support and cooperation.

Sincerely yours,

Dominik Slezak
Hamid R. Arabnia
Daniel Howard
