Brazil is in a great boost phase of its maritime activity, developing a broad program of shipbuilding construction and offshore exploration and production. With a growing demand for ships and offshore structures, new shipyards emerge on all the country.

In order to enable new opportunities, the Symposia on Automation and Computation for Naval, Offshore and Subsea Industry (NAVCOMP 2013) will occur in the city of Rio Grande - RS, from 14th to 15th March 2013, on the premises of the Federal University of Rio Grande - FURG.
