Message from the Chairs ........................................................................................................................... ix
Organizing Committee ................................................................................................................................. x
Program Committee ....................................................................................................................................... xi
Steering Committee ...................................................................................................................................... xii

Video Game
Adaptable Game Experience Based on Player's Performance and EEG ....................................................... 1
  Henry D. Fernández B., Koji Mikami, and Kunio Kondo
Dynamic Pressure Cycle Control: Dynamic Difficulty Adjustment beyond the Flow Zone ........................................... 9
  Endoh Masanobu, Henry D. Fernández B., and Koji Mikami
A Study on Voice Actor Recommendation for Game Characters Based on Acoustic Feature Estimation and Document Co-occurrence ................................................................. 15
  Erika Sakai, Takayuki Itoh, and Akinori Ito

Image Processing & Visualization
Japanese Fingerspelling Recognition Based on Classification Tree and Machine Learning ........................................ 19
  Nobuhiko Mukai, Naoto Harada, and Youngha Chang
Tracking and Short-Term Forecasting of Typhoon Structure ................................................................. 25
  Jiayi Xu, Xuanxuan Huang, and Xiaoyang Mao
Construction of Indoor Location Search System Using Bluetooth Low Energy ........................................ 33
  Yuta Miyagawa and Norihisa Segawa
Category Classification of Text Data with Machine Learning Technique for Visualizing Flow of Conversation in Counseling ................................................................. 37
  Yuma Hayashida, Tomoya Uetsuji, Yasuo Ebara, and Koji Koyamada
Computer Graphics & E-Heritage

Estimating Parameters of Subsurface Scattering Using Directional Dipole Model ..........................................................................................................................................................41
   Xingji Zeng, Takafumi Iwaguchi, Hiroyuki Kubo, Takuya Funatomi, and Yasuhiro Mukaigawa

A Study of Analytic Method for Distortion of Rotational Shape by Using Elliptic Circularity ....................................................................................................................................................49
   Fei Han, Tsutomu Kinoshita, Katsutsugu Matsuyama, and Kouichi Konno

A Study of Segmentation Algorithm for Decoration of Statue Based on Curve Skeleton ......................................................................................................................................................53
   Amartuvshin Renchin-Ochir, Katsutsugu Matsuyama, Enkhbayar Altantsetseg, and Kouichi Konno

A Study of Assembly Navigation Operation with 2-D Panel for Restoring Fractured Objects .......................................................................................................................................57
   Chunyuan Li, Katsutsugu Matsuyama, and Kouichi Konno

Content Design

Body-Shape Transfer for Super Deformation of 3D Character Models .................................................................61
   Peng Wang, Yoshihiro Kanamori, Yuki Endo, and Jun Mitani

Botanical Puppet: Computer Controlled Shameplant .................................................................................................68
   Wataru Kurihara, Akito Nakano, and Hisakazu Hada

An Interactive Digest Movie Creation Method Focusing on Specific Persons Using Face Detection ...........................................................................................................................................................................72
   Saki Yamashita and Takayuki Itoh

LipSync Generation Based on Discrete Cosine Transform ..........................................................................................76
   Ning Xiey, Tianye Yuanz, and Masayuki Nakajimax

Posters

STAT (U) ES: An Interactive Community Engaged Art Using Projection Mapping and Facial Recognition System ...........................................................................................................................................................................80
   Yushi Tajima and Yuta Muto

Ancient Japanese Board Sugoroku Reproduction: Development of Network Play System for Board Sugoroku ...........................................................................................................................................................................81
   Hisako Hara, Kaori Kishi, Masanori Fukui, and Tomoyuki Takami

Interactive Music Modulation with Micro-Geometry of Object Epidermis ...................................................................82
   Takayuki Itoh and Naruhito Toyoda

Floor Exertainment with Knight Tour Creator ..................................................................................................................83
   Masanori Fukui, Zhixin Shen, Zhejun Liu, and Tomoyuki Takami
A Visualization Tool for Feature Analysis of Painting Images .................................................................84
   Ayaka Kaneko, Takayuki Itoh, and Ying Wang

Hybrid Image as the Assessment Tool for Myopia Severity Level ..........................................................85
   Peeraya Sripian

Feature Extraction of Game Plays for Procedural Play Generation ..........................................................86
   Kazuki Mori, Ayumu Shinya, Tomohiro Harada, and Ruck Thawonmas

Automatic Generation of Game Plays Considering the Play Arc by the AI in a Fighting Game ................87
   Suguru Ito, Makoto Ishihara, Tomohiro Harada, and Ruck Thawonmas

Object-Specific Style Transfer Based on Feature Map Selection Using CNNs ........................................88
   Ayumu Shinya, Nguyen Duc Tung, Tomohiro Harada, and Ruck Thawonmas

Procedural System of Generating Sound Effect for Magical Girl ANIME ...........................................89
   Nana Satou, Akinori Ito, and Koji Mikami

Interface Design and Controller Development for Loop Performance of Contemporary Music Associated with a DJ Software ..............................................................90
   Seiya Iwaoka, Akinori Ito, and Ken’ichiro Ito

A Study on Sound Analysis in Video Game with the Aspect of Sense of Agency and Sense of Ownership ..........91
   Daiki Yawata, Ken’ichiro Ito, Kengo Watanabe, Takuma Hirayama, and Akinori Ito

Analysis of Relationship between the Player’s Behavior Change and the Effectiveness of a Health Promotion AI ...........................................................................................................92
   Takahiro Kusano, Pujana Paliyawan, Tomohiro Harada, and Ruck Thawonmas

Development of Virtual Reality Applications for Learning through Experience ........................................93
   Xinxin Zhou, Kazuhide Kobashi, Xiangrong Zhou, and Kenichi Sugihara

Life Search - A Smartphone Application for Disaster Education and Rescue ............................................94
   Yuhei Takagi, Kyosuke Yamada, Akihito Goto, Masashi Yamada, Takatoshi Naka, and Shinya Miyazaki

Evaluation of Ikebana Based on Geometric Shape Arrangement ..............................................................95
   Ayano Miyazaki, Hiroko Ota, Masashi Yamada, and Kimiko Iwazaki

Stylized Semi-transparent Streamlines by Stochastic Rendering Approach ..............................................96
   Tomohisa Tanaka and Naohisa Sakamoto

A Structure Analysis on Musical Scenes on Drama Content with Association Analysis ............................97
   Rumiko Fukada, Akinori Ito, and Ken’ichiro Ito

Development of Interactive Visualization System for Volume Data Using Head-Mounted Display .............98
   Pierre Jarsaillon, Yu Han, and Naohisa Sakamoto

A Music Analysis on Atmospheric Sounds in Japanese Sci-Fi Anime ........................................................99
   Haruki Kakesu, Akinori Ito, and Ken’ichiro Ito
