Message from the Program Chairs

This volume contains the papers presented in the main track of the 14th Panhellenic Conference on Informatics (PCI 2010), which took place at the City of Tripolis, Greece, between September 10–12, 2010.

Following an international call for papers, 95 full papers were submitted. In submitting their works, the authors provided interesting and novel findings on various fields of informatics, thus choosing the 45 papers that are finally included in these proceedings was a tough task. The work of the program chairs, to make the final selection of the papers that are included in these proceedings, would not have been possible without the contribution of all the Program Committee members and the additional reviewers, who devoted time, effort and expertise to provide useful and constructive reviews for all submitted papers. We express our gratitude to all Program Committee members and the additional reviewers for their valuable input. We would also like to thank prof. Periklis Chatzimisios and Dr. Vasilis Vitsas for their efforts on organising the session “Performance analysis of Computer Networks”.

This year’s program continues the exciting history of the Panhellenic conference on Informatics, including exciting works from different fields of informatics, which have been classified into sessions as follows:

- Computers and Education
- Databases and data mining
- Image and information processing
- Information systems
- Networking
- Performance analysis of Computer Networks
- Security and privacy
- Software engineering
- Teaching Informatics

In short, there is something in the conference for all informatics science, and we expect that presenters and attendants will engage themselves in interesting and fruitful discussions during the conference.

Costas Vassilakis and Nikolaos Tselikas
