IEEE PerCom 2010 PhD Forum

Message from the PhD Forum Chair

It is my great pleasure to present the IEEE PerCom 2010 PhD Forum. The Ph.D. Forum provides an opportunity for Ph.D. students to present their dissertation research, including work in progress, to the pervasive computing and communication community. The Forum is organized as a poster session to encourage interaction between Ph.D. students and researchers from academia, industry, and government. This is the third edition of this successful event.

This year we received a total of 28 submissions from 15 different countries. The PhD forum program committee selected 15 excellent contributions to be presented at the forum. The actual final program contains 13 contributions (unfortunately two of the students with accepted contributions were unable to attend the forum). A two pages extended abstract for each of these contributions is in the proceedings.

I want to express my gratitude to our industry sponsor, Google Inc., for the continuous support of this event, and I want to thank the members of the PhD forum program committee for their professional help in the review process. Finally I am grateful to Dr. Linda Pareschi for her help with manuscript handling.
