Proceedings of the Fifth International Conference on Quality Software

QSIC 2005

Message from the Steering Committee Chair ................................................................. x
Message from the Program Committee Co-Chairs ........................................................... xi
Conference Committees ................................................................................................... xii
Additional Reviewers ....................................................................................................... xv
Workshop Committees ..................................................................................................... xvi

Keynote Speech
Integrating Environments into Software Testing ........................................................... xx
    M. L. Soffa

Conference Papers

Session 1A
Software Testing I

Model-Based Testing of Concurrent Programs with Predicate Sequencing Constraints ........... 3
    P. Wu and H. Lin
Test Order for Class-Based Integration Testing of Java Applications ...................................... 11
    N. L. Hashim, H. W. Schmidt, and S. Ramakrishnan
On the Test Case Definition for GUI Testing ..................................................................... 19

Session 1B
Software Quality

Peer Reviews in Real Life—Motivators and Demotivators ................................................... 29
    L. Harjumaa, I. Tervonen, and A. Huttunen
Towards the UML Evaluation Using Taxonomic Patterns on Meta-Classes ........................... 37
    H. Ma, Z. Ji, W. Shao, and L. Zhang
A Preliminary Evaluation of Software Inspection Tools, with the DESMET Method ............... 45
    H. Hedberg and J. Lappalainen

Session 2A
Software Modeling and Testing

Identification of Categories and Choices in Activity Diagrams ........................................... 55
    T. Y. Chen, P-L. Poon, S-F. Tang, and T. H. Tse
Session 2B
Web-Based Development

Cost and Response Time Simulation for Web-Based Applications on Mobile Channels
M. Book, V. Gruhn, M. Hülder, A. Köhler, and A. Kriegel

Quality Assurance in the Design of Web Information Systems
A. Binemann-Zdanowicz, K-D. Schewe, B. Thalheim, and J. Zhao

Stochastic Voting Algorithms for Web Services Group Testing
W. T. Tsai, D. Zhang, R. Paul, and Y. Chen

Session 3A
Formal Methods

Verification of C Programs Using Slicing Execution
X. Yi, J. Wang, and X. Yang

Automatic Generation of Analyzable Failure Propagation Models from Component-Level Failure Annotations
L. Grunske and B. Kaiser

Formal Fault Tree Analysis of State Transition Systems
J. Xiang, K. Ogata, and K. Futatsugi

Session 3B
Software Components

A Case Study of the Recursive Least Squares Estimation Approach to Adaptive Testing for Software Components

A Multi-Property Trust Model for Reconfiguring Component Software
M. Zhou, H. Mei, and L. Zhang

Measuring the Complexity of a UML Component Specification
S. Mahmood and R. Lai

Session 4A
Software Architecture

Replication for Adaptive Responsiveness in Service-Oriented Systems
S. S. Yau, G. Goyal, and Y. Yao

Capturing and Using Software Architecture Knowledge for Architecture-Based Software Development
M. A. Babar, I. Gorton, and R. Jeffery
Runtime Validation of Behavioral Contracts for Component Software .......................................................... 177
  Y. Jin and J. Han

Session 4B
Database Modeling and Applications

Fault-Based Testing of Database Application Programs with Conceptual Data Model ........................................... 187
  W. K. Chan, S. C. Cheung, and T. H. Tse
Proving the Safety of SQL Queries ............................................................. 197
  S. Brass and C. Goldberg
Higher-Order Entity Relationship Modeling with UML .......................................................... 205
  A. Tretiakov and S. Hartmann

Session 5A
Requirements Engineering

Modeling Software Characteristics and Their Correlations in a Specific Domain by Comparing Existing Similar Systems .................................................. 215
  A. Osada, D. Ozawa, H. Kaiya, and K. Kajiri
Ontology-Based Requirements Analysis: Lightweight Semantic Processing Approach ........................................ 223
  H. Kaiya and M. Saeki
Domain Consistency in Requirements Specification .................................................................................. 231
  S. Acharya, H. Mohanty, and C. George

Session 5B
Software Testing II

A Metamorphic Approach to Integration Testing of Context-Sensitive Middleware-Based Applications ................. 241
A Method of Generating Massive Virtual Clients and Model-Based Performance Test ........................................ 250
  G-B. Kim
An Ant Colony Optimization Approach to Test Sequence Generation for State-Based Software Testing ................. 255
  H. Li and C. P. Lam

Session 6A
Software Metrics and Tools

Study on Application of a Quantitative Evaluation Approach for Software Architecture Adaptability .................... 265
  X. Liu and Q. Wang
GcpSensor: A CPU Performance Tool for Grid Environments ........................................................................... 273
  D. Guo, L. Hu, M. Zhang, and Z. Zhang
Case Studies: The Potential Teaching Instruments for Software Engineering .................................................. 279
  V. Varma and K. Garg
Session 6B
Real-Time Applications

An Efficient Consistency Management Algorithm for Real-Time Mobile Collaboration
S. Citro, J. McGovern, and C. Ryan ......................................................... 287

Principles of Timing Anomalies in Superscalar Processors
I. Wenzel, R. Kirner, P. Puschner, and B. Rieder ................................... 295

Workshop Papers

First International Workshop on Education and Training for Quality Software Engineering (ETQSE 2005)

Teaching Three Quality Assurance Techniques in Tandem—Lessons Learned
C. Kutay and M. A. Babar ....................................................................... 307

Software Testing Education and Training in Hong Kong
F. T. Chan, T. H. Tse, W. H. Tang, and T. Y. Chen ................................. 313

A System to Mark Programs Automatically
K. Ngo-Pham, J. Bigham, J. Rodaway, and L. Tokarchuk ................. 317

Dynamic Delivery of Software Development Curriculum
A. Fisher and J. F. Lehman ...................................................................... 323

Teaching Automated Test Case Generation
T. Y. Chen, F-C. Kuo, and Z. Q. Zhou ................................................. 327

Designing Activities for Learning Software Quality Practices
Y. T. Yu and P-L. Poon ........................................................................... 333

First International Workshop on Grid and Peer-to-Peer Based Workflows (GPWW 2005)

Scalable Enterprise Level Workflow Manager for the Grid

A Data Mining-Based Framework for Grid Workflow Management
A. Congiusta, G. Greco, A. Guzzo, G. Manco, L. Pontieri, D. Saccà, and D. Talia ................................................................. 349

Scientific Workflow Management: Between Generality and Applicability
Z. Zhao, A. Belloum, A. Wibisono, F. Terpstra, P. T. de Boer, P. Slook, and B. Hertzberger ......................................................... 357

A Peer-to-Peer Architecture for Workflow in Virtual Enterprises
J. Noll .................................................................................................. 365

A Service Workflow Management Framework Based on Peer-to-Peer and Agent Technologies
J. Yan, Y. Yang, R. Kowalczyk, and X. T. Nguyen ................................. 373
First International Workshop on Integration of Software Engineering and Agent Technology (ISEAT 2005)

Tool Support for Agent Development Using the Prometheus Methodology ................................................... 383
   L. Padgham, J. Thangarajah, and M. Winikoff
Towards Goal-Oriented Design of Agent Systems .................................................................................. 389
   J. Khallouf and M. Winikoff
The Genesis of a Pattern Language for Agent-Based Enterprise Systems ................................................... 395
   P. R. Taylor, P. Evans-Greenwood, and J. Odell
Towards Making Agent UML Practical: A Textual Notation and a Tool ....................................................... 401
   M. Winikoff
Enabling Agent-Based Management of Web Services with WS2JADE ....................................................... 407
   X. T. Nguyen and R. Kowalczyk
Systematic Incremental Development of Agent Systems, Using Prometheus .............................................. 413
   M. Perepletchikov and L. Padgham
Guiding Agent-Oriented Requirements Elicitation: HOMER ..................................................................... 419
   D. Wilmann and L. Sterling
Design Patterns for Agent-Based Service Composition in the Web .......................................................... 425
   I. Mülle, P. Braun, and R. Kowalczyk
Caste-Centric Agent-Oriented Programming .............................................................................................. 431
   J. Wang, R. Shen, and H. Zhu

First International Workshop on Services Engineering (SEIW 2005)

Relevant Past Performance for Selecting Web Services .............................................................................. 439
   W. Sherchan, S. Krishnaswamy, and S. W. Loke
An Operational Semantics for DFM, a Formal Notation for Modeling Asynchronous Web Services ................. 446
   J. Yang, C. Cîrstea, and P. Henderson
Operating Guidelines—An Automata-Theoretic Foundation for the Service-Oriented Architecture .................. 452
   P. Massuthe and K. Schmidt
Interactive Visualization and Testing of Jini Services .................................................................................. 458
   B. Quig, M. Kölling, J. Rosenberg, and P. Steele
OMWSC—An Ontology-Based Model for Web Services Composition ..................................................... 464
   J. Ma, Y. Zhang, and M. Li
Towards a Metamorphic Testing Methodology for Service-Oriented Software Applications ....................... 470

Author Index ..................................................................................................................................................... 477
