**Main Session**

- Experiments with Adding to the Experience that Can be Acquired from Software Courses .......................................................... 1  
  Robert Dupuis, Roger Champagne, and Alain April Normand Séguin
- Conveying Conceptions of Quality through Instruction ........................................................................................................... 7  
  Arnold Pears
- Supporting the Definition of Software Processes at Consulting Organizations via Software Process Lines .......................................................... 15  
  Ahilton Barreto, Elaine Duarte, Ana Regina Rocha, and Leonardo Murta
- Applying Grounded Theory to Understand Software Process Improvement .................................................................. 25  
  Mariano Angel Montoni and Ana Regina Rocha
- Evaluating the Effect of Agile Methods on Software Defect Data and Defect Reporting Practices - A Case Study ........................................................................................................ 35  
  Kirsi Korhonen
- Empirical Studies on Quality in Agile Practices: A Systematic Literature Review .......................................................... 44  
  Panagiotis Sfetsos and Ioannis Stamelos
- Software Safety Standards for the Basis of Certification in the Nuclear Domain .......................................................... 54  
  Hannu Harju, Jussi Lahtinen, Jakka Ranta, Risto Nevalainen, and Mika Johansson
- The Evolving Picture of Standardisation and Certification for Process Assessment .................................................. 63  
  Terence P. Rout
- Towards Specification Patterns for Global Software Development Projects - Experiences from the Industry .......................................................... 73  
  Frank Salger, Jochen Englert, and Gregor Engels
Definition and Validation of Metrics for ITSM Process Models .................................................. 79
Fernando Brito e Abreu, Raquel de Bragança V. da Porciúncula, Jorge Manuel Freitas,
and José Carlos Costa

Abstract Testing: Connecting Source Code Verification with Requirements ................................ 89
Florian Merz, Carsten Sinz, Hendrik Post, Thomas Gorges, and Thomas Kropf

MANTRA: Towards Model Transformation Testing ................................................................. 97
Andrea Ciancone, Antonio Filieri, and Raffaela Mirandola

Investigating the Evolution of Bad Smells in Object-Oriented Code ....................................... 106
Alexander Chatzigeorgiou and Anastasios Manakos

CSS Code Quality: A Metric for Abstractness; Or Why Humans Beat Machines
in CSS Coding .......................................................................................................................... 116
Matthias Keller and Martin Nussbaumer

Comprehending Ajax Web Applications by the DynaRIA Tool .................................................. 122
Domenico Amalfitano, Anna Rita Fasolino, Armando Polcaro, and Porfírio Tramontana

Improving the Quality of Web-GIS Modularity Using Aspects ............................................. 132
Ana Oliveira, Matias Uribeta, João Araújo, Armanda Rodrigues, Ana Moreira, Silvia Gordillo,
and Gustavo Rossi

Thematic Track: Teaching ICT Quality

Teaching ICT Quality ................................................................................................................ 142
Stephen B. Seidman

Teaching Software Quality in an Interdisciplinary Course of Engineering ................................ 144
Rejane M. da C. Figueiredo, André B. de Sales, Luiz C.M. Ribeiro Jr., Luiz A.F. Laranjeira,
and Adson Rocha

Software Quality: From Theory to Practice ............................................................................. 150
Ita Richardson and Yvonne Delaney

Thematic Track: Quality in ICT Service Management

Quality in ICT Service Management ........................................................................................ 156
Neil McBride

Implementing the Service Catalogue Management .................................................................... 159
Carlos Mendes and Miguel Mira da Silva

Defining and Observing the Compliance of Service Level Agreements: A Model
Driven Approach ..................................................................................................................... 165
Anacleto Correia and Fernando Brito e Abreu

An IT Infrastructure Patterns Approach to Improve IT Service Management Quality ............... 171
Luís Ferreira da Silva and Fernando Brito e Abreu

Requirements Certification for Offshoring Using LSPCM ...................................................... 177
Alexander Serebrenik, Amrita Mishra, Thomas Delissen, and Martijn Klabbers

Managing Risk in Decision to Outsource IT Projects .............................................................. 183
Syaripah Ruzaini Syed Aris, Noor Habibah Arshad, and Azlinah Mohamed
Thematic Track: Quality in Requirements Engineering

Quality in Requirements Engineering ................................................................. 189

Ana Moreira

Experiences on the Use of Business Models for Identifying Quality Requirements for Information systems ................................................................. 192

Rosaria Bittencourt, Renata Araujo, Claudia Cappelli, Juliana Ferreira, and Priscila Engiel

Collecting Quality Requirements Using Quality Models and Goals ................................................................. 198

Reinhold Plösch, Alois Mayr, and Christian Körner

Increasing Quality in Scenario Modelling with Model-Driven Development ................................................................. 204

João Pedro Santos, Ana Moreira, João Araújo, and Miguel Goulão

Survey on System Behavior Specification for Extending ProjectIT-RSL ................................................................. 210

David de Almeida Ferreira and Alberto Manuel Rodrigues da Silva

Applying a UML Profile in the Requirements Modeling to Multi-Agents Systems ................................................................. 216

Gilleanes Thorwald Araujo Guedes and Rosa Maria Vicari

Leveraging Goal Models and Performance Indicators to Assess Health Care Information Systems ................................................................. 222

Craig Kuziemsky, Xia Liu, and Liam Peyton

Relevant Skills to Requirement Analysts According to the Literature and the Project Managers Perspective ................................................................. 228

Luciano Vale, Adriano Bessa Albuquerque, and Patrícia Beserra

Thematic Track: Quality in Model Driven Engineering

Quality in Model Driven Engineering ................................................................. 233

Parastoo Mohagheghi

Increasing Software Quality through Design Reuse ................................................................. 236

Fernando Barros

A Tool for Automatic Defect Detection in Models Used in Model-Driven Engineering ................................................................. 242

Beatriz Marin, Giovanni Giachetti, Oscar Pastor, and Tanja E.J. Vos

A Model-Driven Framework for Process-Centric Business Continuity Management ................................................................. 248

Ulrich Winkler, Mathias Fritzsche, Wasif Gilani, and Alan Marshall

Seamlessness as a Desirable Aspect of Quality for MDE: The Contribution of Object-Relational Database Structures ................................................................. 253

Patricia Roberts

Thematic Track: Quality in ICT Verification and Validation

Quality in ICT Verification and Validation ................................................................. 259

Antonia Bertolino

Synthesis-Based Loose Programming ................................................................. 262

Anna-Lena Lamprecht, Stefan Nanjokat, Tiziana Margaria, and Bernhard Steffen

Test Coverage Analysis of UML Activity Diagrams for Interactive Systems ................................................................. 268

Ricardo D.F. Ferreira, João P. Faria, and Ana C.R. Paiva

A Formal Passive Testing Approach for Checking Real Time Constraints ................................................................. 274

Fayçal Bessayah and Ana Cavalli

vii
X-MuT: A Tool for the Generation of XSLT Mutants ................................................................. 280
Francesca Lonetti and Eda Marchetti

A Composable Framework for Test Automation of Service-Based Applications ............................ 286
Sylvia Ilieva, Valentin Pavlov, and Ilina Manova

Model-Driven Service Integration Testing - A Case Study ................................................................. 292
Sebastian Wieczorek, Alin Stefanescu, and Andreas Roth

The Definition of a Testing Process to Small-Sized Companies: The Brazilian Scenario .................. 298
Andrea Rodrigues, Plácido Rogério Pinheiro, and Adriano Albuquerque

Do Testers’ Preferences Have an Impact on Effectiveness? ............................................................. 304
Maria Lazaro, Natalia Juristo, and Esperanza Marcos

Thematic Track: Quality in ICT Reengineering and Refactoring

Quality in ICT Reengineering and Refactoring ................................................................. 310
Mel Ó Cinnéide

Studying the Effect of Refactorings: A Complexity Metrics Perspective .......................................... 313
Quinten David Soetens and Serge Demeyer

Quality Analysis of Object Oriented Cohesion Metrics .............................................................. 319
Padmaja Joshi and Rushikesh K. Joshi

Visualization of Multithreaded Behavior to Facilitate Maintenance of Complex Software Systems .......... 325
Jonas Trümper, Johannes Bohnet, Stefan Voigt, and Jürgen Döllner

Reengineering IT Infrastructures: A Method for Topology Discovery ............................................. 331
Luís Ferreira da Silva and Fernando Brito e Abreu

Reducing Subjectivity in Code Smells Detection: Experimenting with the Long Method .......... 337
Sérgio Bryton, Fernando Brito e Abreu, and Miguel Monteiro

IDS: An Immune-Inspired Approach for the Detection of Software Design Smells .................... 343
Salima Hassaine, Foutse Khomh, Yann-Gaël Guéhéneuc, and Sylvie Hamel

Thematic Track: Quality Evolution in ICT

Quality Evolution in ICT .............................................................................................................. 349
Michel Wermelinger

Studying Supply and Demand of Software Maintenance and Evolution Services ................................ 352
Alain April

Exploratory Analysis of the Relations between Code Cloning and Open Source Software Quality .......... 358
Denis Kozlov, Jussi Koskinen, Markku Sakkinen, and Jouni Markkula

Towards Automated Quality Models for Software Development Communities: The QualOSS and FLOSSMetrics Case ................................................................. 364
Daniel Izquierdo-Cortazar, Jesús M. Gonzalez-Barahona, Santiago Dueñas, and Gregorio Robles

A Method for Continuous Code Quality Management Using Static Analysis .................................. 370
Reinholds Plösch, Harald Gruber, Christian Körner, and Matthias Saft

A PMO Installation for TI Project Management in a R&D Institution ............................................ 376
Aletéia Xavier Bettin, Carlos Miguel Tobar, Denise P. Prado, and Íris Bento da Silva
Thematic Track: Quality in Agile Methods

Quality in Agile Methods .................................................................................................................. 382
   Panagiotis Sfetsos

Procedures and Conditions that Influence on the Efficiency of Some Agile Practices ..................... 385
   Henrique Farias Landim, Adriano Bessa Albuquerque, and Thiago Christian Macedo

Classification and Comparison of Agile Methods ........................................................................... 391
   João M. Fernandes and Mauro Almeida

Component Recycling for Agile Methods ....................................................................................... 397
   George Kakarontzas and Ioannis Stamelos

Test-Driven Development - Still a Promising Approach? ............................................................... 403
   Sami Kollanus

Thematic Track: ICT Process Improvement and Assessment

ICT Process Improvement and Assessment ....................................................................................... 409
   Karol Frühauf

MPS.BR: A Tale of Software Process Improvement and Performance Results in the Brazilian Software Industry .................................................................................................................. 412
   Gleison Santos, Marcos Kalinowski, Ana Regina Rocha, Guilherme Horta Travassos, Kival Chaves Weber, and José Antonio Antonioni

Organizational Factors Shaping Software Process Improvement in Small-Medium Sized Software Teams: A Multi-Case Analysis .................................................................................. 418
   Ian Allison

A Gap Analysis Methodology for the Team Software Process ....................................................... 424
   Luis Manuel Gonzalez Amaral and João Pascoal Faria

A Method for Tridimensional Process Assessment Using Modelling Theory ................................ 430
   Clenio F. Salviano, Marcia Regina Martins Martinez, Edgar Lopes Banhesse, Angela Enelize, Alessandra Zoucas, and Marcello Thiry

Process Assessment In Very Small Entities - An ISO/IEC 29110 Based Method .......................... 436
   Timo Varkoi

Analyzing the Similarity among Software Projects to Improve Software Project Monitoring Processes .......................................................................................................................... 441
   Andrea Oliveira Soares Barreto and Ana Regina Rocha

An Approach to Implement Software Process Improvement in Small and Mid Sized Organizations ................................................................................................................................. 447
   Gisele Villas Boas, Ana Regina Cavalcanti da Rocha, and Marcio Peccegheiro do Amaral

PIT-ProcessM: A Software Process Improvement Meta-Model ..................................................... 453
   Paula Ventura Martins and Alberto Rodrigues da Silva

Thematic Track: Standardization and Certification in ICT

Standardization and Certification in ICT .......................................................................................... 459
   Knut Blind

An Approach to Ambiguity Analysis in Safety-Related Standards ............................................... 461
   Isabella Biscoglio, Alessandro Coco, Mario Fusani, Stefania Gnesi, and Gianluca Trentanni
Establishing a Well-Founded Conceptualization about Software Measurement in High Maturity Levels .......................................................................................................................................................................................... 467

Monalessa Perini Barcellos, Ricardo de Almeida Falbo, and Ana Regina Rocha

**Thematic Track: Quality in Web Engineering**

Quality in Web Engineering .................................................................................................................................................................................. 473

*Coral Calero*

A Metrics-Based Approach to Technical Documentation Quality .................................................................................................................. 476

*Anna Wingkvist, Morgan Ericsson, Rüdiger Lincke, and Welf Löwe*

Gathering Information about Web 2.0 Applications for Usability Engineering .................................................................................................. 482

*Ludger Martin*

Adaptive Quality Control of Web Resources .................................................................................................................................................. 487

*Nuno Escudeiro and Paula Escudeiro*

Websites Quality: Does It Depend on the Application Domain? .................................................................................................................. 493

*Américo Rio and Fernando Brito e Abreu*

Improving the Design of Existing Web Applications .................................................................................................................................. 499

*Mario Luca Bernardi, Giuseppe Antonio Di Lucca, and Damiano Distante*

Automatic Selection of RIA Software Architectures Using Quality Models .................................................................................................. 505

*Santiago Meliá, Jesús Pardillo, and Cristina Cachero*

**Author Index** .................................................................................................................................................................................................. 511
