### Keynotes

<table>
<thead>
<tr>
<th>You versus Users – Who Owns Your Roadmap? (Keynote)</th>
<th>Aydin Y. Mirzaei — <em>FluidReview, Canada</em></th>
<th>1</th>
</tr>
</thead>
<tbody>
<tr>
<td>Can You Intentionally Design a Product That Is Cool? (Keynote)</td>
<td>Karen Holtzblatt — <em>InContext, USA</em></td>
<td>2</td>
</tr>
<tr>
<td>Requirements, Behaviours, and Software Engineering (Keynote)</td>
<td>Michael Jackson — <em>Open University, UK</em></td>
<td>4</td>
</tr>
</tbody>
</table>

### Research Track

<table>
<thead>
<tr>
<th>Change Impact Analysis for Natural Language Requirements: An NLP Approach</th>
<th>Chetan Arora, Mehrdad Sabetzadeh, Arda Goknil, Lionel C. Briand, and Frank Zimmer — <em>University of Luxembourg, Luxembourg; SES TechCom, Luxembourg</em></th>
<th>6</th>
</tr>
</thead>
<tbody>
<tr>
<td>Requirements Engineering: The Quest for the Dependent Variable</td>
<td>Hannes Holm, Teodor Sommestad, and Johan Bengtsson — <em>Swedish Defence Research Agency, Sweden</em></td>
<td>16</td>
</tr>
<tr>
<td>Ambiguity as a Resource to Disclose Tacit Knowledge</td>
<td>Alessio Ferrari, Paola Spoletini, and Stefania Gnesi — <em>ISTI-CNR, Italy; Kennesaw State University, USA</em></td>
<td>26</td>
</tr>
<tr>
<td>An Information Theoretic Approach for Extracting and Tracing Non-functional Requirements</td>
<td>Anas Mahmoud — <em>Louisiana State University, USA</em></td>
<td>36</td>
</tr>
<tr>
<td>From Requirements Elicitation to Variability Analysis using Repertory Grid: A Cognitive Approach</td>
<td>Sangeeta Dey and Seok-Won Lee — <em>Ajou University, South Korea</em></td>
<td>46</td>
</tr>
<tr>
<td>Goal and Preference Identification through Natural Language</td>
<td>Fatima Alabdulkareem, Nick Cercone, and Sotirios Liaskos — <em>York University, Canada</em></td>
<td>56</td>
</tr>
<tr>
<td>Selecting Creativity Techniques for Creative Requirements: An Evaluation of Four Techniques using Creativity Workshops</td>
<td>Richard Berntsson Svensson and Maryam Taghavianfar — <em>Blekinge Institute of Technology, Sweden; Chalmers University of Technology, Sweden</em></td>
<td>66</td>
</tr>
<tr>
<td>Feature Lifecycles as They Spread, Migrate, Remain, and Die in App Stores</td>
<td>Federica Sarro, Afnan Al-Subaihin, Mark Harman, Yue Jia, William Martin, and Yuanyuan Zhang — <em>University College London, UK</em></td>
<td>76</td>
</tr>
<tr>
<td>What You Ask Is What You Get: Understanding Architecturally Significant Functional Requirements</td>
<td>Preethu Rose Anish, Maya Daneva, Jane Cleland-Huang, Roel J. Wieringa, and Smita Ghaisas — <em>Tata Consultancy Services, India; University of Twente, Netherlands; DePaul University, USA</em></td>
<td>86</td>
</tr>
<tr>
<td>A Requirements Monitoring Model for Systems of Systems</td>
<td>Michael Vierhauser, Rick Rabiser, Paul Grünbacher, and Benedikt Aumayr — <em>JKU Linz, Austria</em></td>
<td>96</td>
</tr>
<tr>
<td>Handling Knowledge Uncertainty in Risk-Based Requirements Engineering</td>
<td>Antoine Cailliau and Axel van Lamsweerde — <em>Université Catholique de Louvain, Belgium</em></td>
<td>106</td>
</tr>
<tr>
<td>Bug Report, Feature Request, or Simply Praise? On Automatically Classifying App Reviews</td>
<td>Walid Maalej and Hadeer Nabil — <em>University of Hamburg, Germany</em></td>
<td>116</td>
</tr>
</tbody>
</table>
Forging High-Quality User Stories: Towards a Discipline for Agile Requirements  
Garm Lucassen, Fabiano Dalpiaz, Jan Martijn E. M. van der Werf, and Sjaak Brinkkemper — Utrecht University, Netherlands ................................. 126

Exposing the Susceptibility of Off-Nominal Behaviors in Reactive System Requirements  
Daniel Aceituna and Hyunsook Do — North Dakota State University, USA ................................................................. 136

Assessment of Risk Perception in Security Requirements Composition  
Hanan Hibshi, Travis D. Breaux, and Stephen B. Broomell — Carnegie Mellon University, Saudi Arabia; Carnegie Mellon University, USA .......................... 146

Resolving Goal Conflicts via Argumentation-Based Analysis of Competing Hypotheses  
Pradeep K. Murukannaiah, Anup K. Kalia, Pankaj R. Telang, and Munindar P. Singh — North Carolina State University, USA; Cisco Systems, USA ................................. 156

Detecting Repurposing and Over-Collection in Multi-party Privacy Requirements Specifications  
Travis D. Breaux, Daniel Smullen, and Hanan Hibshi — Carnegie Mellon University, USA; Carnegie Mellon University, Saudi Arabia ................................. 166

A Quality Model for the Systematic Assessment of Requirements Traceability  
Patrick Rempel and Patrick Mader — TU Ilmenau, Germany ................................................................. 176

Sketching and Notation Creation with FlexiSketch Team: Evaluating a New Means for Collaborative Requirements Elicitation  
Dustin Wuest, Norbert Seyff, and Martin Glinz — University of Zurich, Switzerland; University of Applied Sciences and Arts Northwestern Switzerland, Switzerland ................................. 186

RE:Next! Track

Tracing
Inherent Characteristics of Traceability Artifacts: Less is More  
Jane Huffman Hayes, Giuliano Antoniol, Bram Adams, and Yann-Gaël Guéhéneuc — University of Kentucky, USA; Polytechnique Montréal, Canada ................................................................. 196

Trace Links Explained: An Automated Approach for Generating Rationales  
Jin Guo, Natawut Monaikul, and Jane Cleland-Huang — DePaul University, USA ................................................................. 202

Goals and NFRs
Handling Non-functional Requirements in Model-Driven Development: An Ongoing Industrial Survey  
David Ameller, Xavier Franch, Cristina Gómez, João Araujo, Richard Berntsson Svensson, Stefan Biffl, Jordi Cabot, Vittorio Cortellessa, Maya Daneva, Daniel Méndez Fernández, Ana Moreira, Henry Muccini, Antonio Vallecillo, Manuel Wimmer, Vasco Amaral, Hugo Brunelière, Loli Burgueño, Miguel Goulão, Bernhard Schätz, and Sabine Teufel — Universitat Politècnica de Catalunya, Spain; Universidade Nova de Lisboa, Portugal; Blekinge Institute of Technology, Sweden; Vienna University of Technology, Austria; Open University of Cataloni, Spain; University of L’Aquila, Italy; University of Twente, Netherlands; TU München, Germany; University of Málaga, Spain; AtlamMod Team, France; Fortiss, Germany ................................................................. 208

Scalable Modeling and Analysis of Requirements Preferences: A Qualitative Approach using CI-Nets  
Zachary J. Oster, Ganesh Ram Santhanan, and Samik Basu — University of Wisconsin-Whitewater, USA; Iowa State University, USA ................................................................. 214

Rationalization of Goal Models in GRL using Formal Argumentation  
Marc van Zee, Floris Bex, and Sepideh Ghanavati — University of Luxembourg, Luxembourg; Utrecht University, Netherlands; Carnegie Mellon University, Luxembourg ................................................................. 220

Cognitive
Cognitive Factors in Inconsistency Management  
Irit Hadar and Anna Zamansky — University of Haifa, Israel ................................................................. 226

Using Real Options to Manage Technical Debt in Requirements Engineering  
Zahra Shakeri Hossein Abad and Guenther Ruhe — University of Calgary, Canada ................................................................. 230
QuantUn: Quantification of Uncertainty for the Reassessment of Requirements
Nelly Bencomo — Aston University, UK .................................................. 236

Risks
Towards Reuse in Safety Risk Analysis Based on Product Line Requirements
Hermann Kaindl, Roman Popp, and David Raneburger — Vienna University of Technology, Austria ........... 241
An Environment-Driven Ontological Approach to Requirements Elicitation for Safety-Critical Systems
Jiale Zhou, Kai Hanninen, Kristina Lundqvist, Yue Lu, Luciana Provenzano, and Kristina Forsberg — Mälardalen University, Sweden; Bombardier Transportation, Sweden; Saab, Sweden ............. 247
Goals at Risk? Machine Learning at Support of Early Assessment
Paolo Avesani, Anna Perini, Alberto Siena, and Angelo Susi — Fondazione Bruno Kessler, Italy .............. 252

Mass RE
Democratic Mass Participation of Users in Requirements Engineering?
Timo Johann and Walid Maalej — University of Hamburg, Germany ............................................. 256
Exploiting Online Human Knowledge in Requirements Engineering
Anas Mahmoud and Doris Carver — Louisiana State University, USA ........................................... 262

Frameworks
Towards Engineering Transparency as a Requirement in Socio-technical Systems
Mahmood Hosseini, Alimohammad Shahri, Keith Phalp, and Raian Ali — Bournemouth University, UK .................. 268
Towards a General Formal Framework of Coherence Management in RE
Alexander Borgida, Ivan Jurca, and Anna Zamansky — Rutgers University, USA; University of Namur, Belgium; University of Haifa, Israel .............................................................. 274

Demos and Posters
SACRE: A Tool for Dealing with Uncertainty in Contextual Requirements at Runtime
Edith Zavala, Xavier Franch, Jordi Marco, Alessia Knauss, and Daniela Damian — Universitat Politècnica de Catalunya, Spain; University of Victoria, Canada .................................................. 278
ReqPat: Efficient Documentation of High-Quality Requirements using Controlled Natural Language
Markus Fockel and Jörg Holtmann — Fraunhofer IPT, Germany .................................................... 280
Holistic Security Requirements Analysis: An Attacker’s Perspective
Tong Li, Elda Paja, John Mylopoulos, Jennifer Horkoff, and Kristian Beckers — University of Trento, Italy; City University London, UK; TU München, Germany .................................................. 282
Breeze: A Modeling Tool for Designing, Analyzing, and Improving Software Architecture
Luxi Chen, Linpeng Huang, Hao Zhong, Chen Li, and Xiwen Wu — Shanghai Jiao Tong University, China ................... 284
StakeCloud Tool: From Cloud Consumers’ Search Queries to New Service Requirements
Irina Todoran Koitz and Martin Glinz — University of Zurich, Switzerland ............................................ 286
An Enhanced Requirements Gathering Interface for Open Source Software Development Environments
Jaison Kuriakose and Jeffrey Parsons — Memorial University, Canada ........................................... 288
Supporting Quantitative Assessment of Requirements in Goal Orientation
Robert Darimont and Christophe Ponsard — Respect-IT, Belgium; CETIC, Belgium ........................... 290
Web Tool for Goal Modelling and Statechart Derivation
João Pimentel, Jéssyka Vilela, and Jaelsson Castro — Federal University of Pernambuco, Brazil ......................... 292
Challenges of Requirements Engineering in AUTOSAR Ecosystems
Mozhan Soltani and Eric Knauss — University of Gothenburg, Sweden; Chalmers University of Technology, Sweden ............ 294

Industry Track
Reuse of Architecturally Derived Standards Requirements
Michael C. Panis — Teradyne, USA ........................................................... 296
Systematic Elicitation of Mode Models for Multifunctional Systems
Andreas Vogelsang, Henning Femmer, and Christian Winkler — TU München, Germany; MAN Truck Bus, Germany

Requirements Problems in the Development of a New User Interface for Healthcare Equipment
Maria Holmegaard, Jens Bæk Jørgensen, Michael Sørensen Loft, and Martin Stig Stissing — Mjølner Informatics, Denmark

Experience Requirements in Video Games: Definition and Testability
David Callele, Philip Dueck, Krzysztof Wnuk, and Peitsa Hynninen — Experience First Design, Canada; Blekinge Institute of Technology, Sweden; Aalto University, Finland

Agile Requirements Engineering with Prototyping: A Case Study
Marja Käpyaho and Marjo Kauppinen — Futurice, Finland; Aalto University, Finland

The Myth of Bad Passive Voice and Weak Words: An Empirical Investigation in the Automotive Industry
Jennifer Krisch and Frank Houdek — Daimler, Germany

Understanding Changes in Use Cases: A Case Study
Mohammad R. Basirati, Henning Femmer, Sebastian Eder, Martin Fritzscbe, and Alexander Widera — TU München, Germany; Munich Re, Germany

Using the Requirements Specification to Infer the Implicit Test Status of Requirements
Tobias Morciniec and Andreas Podelski — Daimler, Germany; University of Freiburg, Germany

The Need of Complementing Plan-Driven Requirements Engineering with Emerging Communication: Experiences from Volvo Car Group
Ulf Eliasson, Rogardt Heldal, Eric Knauss, and Patrizio Pelliccione — Volvo, Sweden; Chalmers University of Technology, Sweden

Doctoral Symposium

Incorporating Preferences from Multiple Stakeholders in Software Requirements Selection: An Interactive Search-Based Approach
Antonio Mauricio Pitangueira — Federal University of Bahia, Brazil

How Can Corpus Linguistics Help Improve Requirements Writing? Specifications of a Space Project as a Case Study
Maxime Warnier — CLLE-ERSS, France

The Personal Information Security Assistant
Roeland H. P. Kegel — University of Twente, Netherlands

Security Assurance Requirements Engineering (STARE) for Trustworthy Service Level Agreements
Yudhistira Nugraha — University of Oxford, UK

A Magnet-and-Spring Based Visualization Technique for Enhancing the Manipulation of Requirements Artifacts
Parisa Ghazi — University of Zurich, Switzerland

A Language for Writing System Specifications in an Aeronautical Context
Benoît Lebeaupin — École Centrale Paris, France

Panel Papers

Ready-Set-Transfer! Technology Transfer in the Requirements Engineering Domain
Jane Cleland-Huang, Mona Rahimi, and Mehdi Mirakhorli — DePaul University, USA; Rochester Institute of Technology, USA

Technology Transfer – Requirements Engineering Research to Industrial Practice: An Open (Ended) Debate
Carlos Henrique C. Duarte and Tony Gorschek — Brazilian Development Bank, Brazil; Blekinge Institute of Technology, Sweden
