Proceedings

21st IEEE Symposium on Reliable Distributed Systems

SRDS 2002
# Table of Contents

21st IEEE Symposium on Reliable Distributed Systems — SRDS 2002

- Message from the Symposium and Program Co-Chairs xi
- Conference Committee xii
- Referees xiii

**Keynote Speaker**

Theory and Practice for Fault-Tolerant Protocols on the Internet xiv

*K. Marzullo*

**Session 1: Security**

Efficient Byzantine-Resilient Reliable Multicast on a Hybrid Failure Model 2

*M. Correia, L. Lung, N. Neves, and P. Veríssimo*

A Fault-Tolerant Approach to Secure Information Retrieval 12

*E. Yang, J. Xi, and K. Bennett*

Tolerance to Unbounded Byzantine Faults 22

*M. Nesterenko and A. Arora*

**Session 2: Networking I**

Implementing Quality of Service in Web Servers 32

*C. Montez and J. Fragas*

Fault-Tolerant Virtual Private Networks within an Autonomous System 41

*J. Han, G. Malan, and F. Jahanian*

Collaborative Networking in an Uncooperative Internet 51

*R. van Renesse and D. Dumitriu*

**Session 3: Stabilization I**

Fault-Local Stabilization: The Shortest Path Tree 62

*J. Beauquier and T. Hérauld*

Random Walk for Self-Stabilizing Group Communication in Ad-Hoc Networks 70

*S. Dolev, E. Schiller, and J. Welch*

Service Time Optimal Self-Stabilizing Token Circulation Protocol on Anonymous Unidirectional Rings 80

*C. Johnen*
Session 4: Replication

An Indulgent Uniform Total Order Algorithm with Optimistic Delivery

P. Vicente and L. Rodrigues

A Unified Proof of Minimum Time Complexity for Reaching Consensus and Uniform Consensus — An Oracle-Based Approach

J. Xu

Active Software Replication through a Three-Tier Approach

R. Baldoni, C. Marchetti, and A. Termini

Efficient Distribution Precision Control in Symmetric Replication Environments

U. Çetintemel and P. Keleher

Session 5: Fault Recovery

Availability Models with Age-Dependent Checkpointing

T. Dohi, N. Kaio, and K. Trivedi

Heterogeneous Checkpointing for Multithreaded Applications

F. Karablieh and R. Bazzi

Non-Intrusive, Parallel Recovery of Replicated Data

R. Jiménez-Peris, M. Patiño-Martínez, and G. Alonso

On Node State Reconstruction for Fault Tolerant Distributed Algorithms

M. Okun and A. Barak

Session 6: Large Scale Group Communication

Probabilistic Atomic Broadcast

P. Felber and F. Pedone

Efficient Epidemic-Style Protocols for Reliable and Scalable Multicast

I. Gupta, A. Kernarrec, and A. Ganesh

Optimistic Total Order in Wide Area Networks

A. Sousa, J. Pereira, F. Moura, and R. Oliveira

Session 7: Stabilization II

Self-Stabilizing Local Mutual Exclusion on Networks in which Process Identifiers are not Distinct

H. Kakugawa and M. Yamashita

A Lower Bound on Dynamic k-stabilization in Asynchronous Systems

C. Genolini and S. Tixeuil
Session 8: Networking II

Asynchronous Resource Discovery in Peer to Peer Networks  .................................................. 224
S. Kutten and D. Peleg

An Analysis of Fault Detection Latency Bounds of the SNS Scheme Incorporated into an
Ethernet Based Middleware System ...................................................................................... 232
J. Liu, K. Kim, and M. Kim

Session 9: Short Papers

Broadcasting Messages in Fault-Tolerant Distributed Systems:
The Benefit of Handling Input-Triggered and Output-Triggered Suspicions Differently  ........... 244
B. Charron-Bost, X. Défago, and A. Schiper

Loose Synchronization of Multithreaded Replicas ...................................................................... 250
C. Basile, K. Whisnant, Z. Kalbarczyk, and R. Iyer

The Performance of Checkpointing and Replication Schemes for Fault Tolerant Mobile Agent Systems .............................. 256
T. Park, I. Byun, H. Kim, and H. Yeom

Optimistic Byzantine Agreement .............................................................................................. 262
K. Kursawe

Modeling Communication Delays in Distributed Systems Using Time Series ......................... 268
R. Nunes and J. Jansch-Pôrito

Session 10: Object-Based Systems

Dependability of CORBA Systems: Service Characterization by Fault Injection ..................... 276
E. Marsden, J. Fabre, and J. Arlat

Analysis of Inspection-Based Preventive Maintenance in Operational Software Systems ........ 286
K. Vaidyanathan, D. Selvamuthu, and K. Trivedi

Implementation of Threshold-Based Diagnostic Mechanisms for COTS-Based Applications ........ 296
L. Romano, A. Bondavalli, S. Chiaradonna, and D. Corroneo

The Guardian Model for Exception Handling in Distributed Systems ........................................ 304
R. Miller and A. Tripathi

Workshop on Reliable Peer-to-Peer Distributed Systems

Foreword .................................................................................................................................. 316
A. Kernarrec and R. van Renesse

Session I: Reliable Peer-to-Peer File Systems

Using File-Grain Connectivity to Implement a Peer-to-Peer File System ................................ 318
D. Brodsky, A. Brodsky, J. Pomkoski, S. Gong, M. Feeley, and N. Hutchinson

Building a Reliable Mutable File System on Peer-to-Peer Storage ........................................ 324
C. Stein, M. Tucker, and M. Seltzer
Reperasure: Replication Protocol Using Erasure-code in Peer-to-Peer Network
Z. Zhang and Q. Lian

Session II: Reliable Routing and Discovery
Improving Object Search Using Hints, Gossip, and Supernodes
H. Johansen and D. Johansen
A Search for Routing Strategies in a Peer-to-Peer Network Using Genetic Programming
M. Iles and D. Deugo
Implementing IPv6 as a Peer-to-Peer Overlay Network
L. Zhou, R. van Renesse, and M. Marsh

Session III: Failure Management
Asynchronous Byzantine Group Communication
K. Kursawe
Power-Aware Epidemics
R. van Renesse
Introspective Failure Analysis: Avoiding Correlated Failures in Peer-to-Peer Systems
H. Weatherspoon, T. Moscovitz, and J. Kubitowicz

Workshop on Self-Repairing and Self-Configurable Distributed Systems
Foreword
X. Defago and F. Pedone

Keynote Speakers
From Byzantine Agreement to Practical Survivability
D. Malkhi
OBIGrid: Towards A New Distributed Platform for Bioinformatics
A. Konagaya

Session I: Self-Stabilization
Self-Stabilizing Distributed File Systems
S. Dolev and R. Kat
A Self-Stabilizing Algorithm for Finding Cliques in Distributed Systems
H. Ishii and H. Kakugawa
A Self-Stabilizing Algorithm for the Steiner Tree Problem
S. Kamei and H. Kakugawa
### Session II: Large-Scale Distributed Systems
