Message from the Technical Program Committee Chairs

On behalf of the technical program committee, we would like to take this opportunity to express our sincere appreciation to all of you contributing to SAINT 2010 – the International Symposium on Applications and the Internet, to be held in Seoul, Korea, on 19-23 July 2010, co-located with COMPSAC 2010.

The symposium features four joint keynote addresses, two joint panels, seven contributed paper sessions (five for regular papers and two for short papers), six student sessions, eight workshops, and one exhibitor’s presentation. This symposium is jointly sponsored by the IEEE Computer Society (IEEE-CS) and the Information Processing Society of Japan (IPSJ). The technical program committee met in Dallas, Texas on 20-21 March 2010 to select papers to be accepted.

The 14 contributed regular papers along with seven short papers were selected out of 51 submissions received from over 13 countries. Submissions were judged on originality, technical merit, significance and relevance to the conference, and presentation. Each paper reviewed carefully at least three reviews. SAINT has been keeping its acceptance ratio less than 30% from the beginning, and acceptance ratio of regular papers is 27% for this time. Seven submissions were also accepted as short papers to include many high quality submissions into the final program.

Finally, we would like to express our gratitude to all those who made SAINT 2010 a reality and success. Thanks to all authors who submitted papers and to all presenters, panelists and audience who participate and share in the symposium. Special thanks also go to the technical program committee members and our many dedicated friends who volunteered their service to make this symposium possible.

We wish you will enjoy the SAINT 2010 in Seoul with many fruitful discussions.
