# Table of Contents

**International Symposium on Applications and the Internet Workshops — SAINT 2006 Workshops**

**Welcome from the Workshop Co-Chairs** ix

**Workshop — IPv6: Deployment of Technologies and Applications** x

- Workshop Message
- IPv6 R&D Activities in WIDE Project
- An Operational Demonstration of a Mobile Network with a Fairly Large Number of Nodes
  - K. Shima, N. Ogashiwa, and S. Uda 6
- An L3-Driven Fast Handover Mechanism in IPv6 Mobility
  - K. Gogo, R. Shibui, and F. Teraoka 10
- Mill: An Information Management and Retrieval Method Considering Geographical Location on Ubiquitous Environmet
  - S. Matsuura, K. Fujikawa, and H. Sunahara 14
- JGN II (Japan Gigabit Network II)
  - Y. Kanaumi, I. Yamauchi, T. Miyake, K. Kobayashi, and H. Esaki 18
- Compressed High Definition Television (HDTV) over IPv6
  - J. Lee and K. Chon 22
- An Application Gateway to Deploy High-quality Video Communications in Various Network Environments
  - T. Kishida, K. Maeda, E. Kohno, and Y. Kakuda 26
- An Implementation and Evaluation of IPv6 End-to-End Secure Communication System for Closed Members
  - Y. Hei, S. Katsuno, and S. Ano 30
- A Translation Method between 802.15.4 Nodes and Ipv6 Nodes
  - S. Sakane, Y. Ishii, K. Toba, K. Kamada, and N. Okabe 34
- Problems on IPv4-IPv6 Network Transition
  - R. Hiromi and H. Yoshifuji 38
- Fixing DNS Misbehavior Hindering IPv6 Deployment
  - S. Suzuki, T. Jimmet, and S. Takeuchi 43
Workshop — RFID and Extended Network; Deployment of Technologies and Applications

Synchronization of RFID Readers for Dense RFID Reader Environments
K. Leong, M. Ng, A. Grasso, and P. Cole
48

Experimental Study on UHF Passive RFID Readability Degradation
J. Mitsugi and H. Hada
52

Positioning Analysis of Multiple Antennas in a Dense RFID Reader Environment
K. Leong, M. Ng, and P. Cole
56

Design of Low-power Baseband-processor for RFID Tag
H. Yan, J. Hu, Q. Li, and H. Min
60

Low Cost Object Identification in RFID via Dynamic Markov Chain and Two Time Scale SPSA
S. Singh
64

Anti-collision Performance of Gen2 Air Protocol in Random Error Communication Link
Y. Kawakita and J. Mitsugi
68

Product Specific Security Features Based on RFID Technology
Z. Nochta, T. Staake, and E. Fleisch
72

Extendable Product Traceability System from Small Start
S. Wakayama, Y. Doi, S. Ozaki, and A. Inoue
76

Design and Implementation of an Active RFID System Platform
H. Cho and Y. Baek
80

Towards an Enterprise Location Service
C. Roduner and C. Floerkemeier
84

HiQ: A Hierarchical Q-Learning Algorithm to Solve the Reader Collision Problem
J. Ho, D. Engels, and S. Sarma
88

Comparison of Transmission Schemes for Framed ALOHA Based RFID Protocols
C. Floerkemeier and M. Wille
92
Workshop — Next Generation Service Platforms for Future Mobile Systems

Workshop Message

Context-Aware, Ontology-Based Recommendations
C. Räck, S. Steglich, and S. Arbanowski

Content-Based Hierarchies in DHT-Based Peer-to-Peer Systems
S. Zoels, M. Eichhorn, A. Tarlano, and W. Kellerer

Evaluation of Method for Multiple Path Distribution Based on Delay-Jitter
Y. Kawashima, H. Mineno, S. Ishihara, and T. Mizuno

The µJini Proxy Architecture for Impromptu Mobile Services
C. Lee, S. Helal, and D. Nordstedt
Workshop — Ubiquitous Networking and Enablers to Context-Aware Services

Session 1: Network Technologies for Ubiquitous Era

STARCast: Streaming Collaboration Platform Using the Overlay Technology .................................. 118
T. Tsuchiya, H. Yoshinaga, K. Koyanagi, A. Honda, and A. Minami

Study of Server Processing Load Evaluations in Ubiquitous Communication Environments .......... 122
M. Matsumoto and T. Itoh

A Distributed and Cooperative Load Balancing Mechanism for Large-Scale P2P Systems .......... 126
Y. Murata, T. Inaba, H. Takizawa, and H. Kobayashi

Home and Person Focused Event Framework ................................................................. 130
P. Eren, D. Stewart, and J. Wodka

Session 2: Service Applications for Ubiquitous Era

A Comparison of Two Programming Models for Pervasive Computing .................................. 134
H.-I. Yang, E. Jansen, and S. Helal

Proposal of a Method for Protecting Private Information in User Context ............................... 138
Y. Nakatani, T. Tokunaga, H. Yamaguchi, and T. Itoh

Service Composition Architecture for Programmability and Flexibility in Ubiquitous Communication Networks ............................................................... 142
Y. Yokohata, Y. Yamato, M. Takemoto, and H. Sunaga

MapWiki: An Ubiquitous Collaboration Environment on Shared Maps ................................... 146
Y. Teranishi, J. Kamahara, and S. Shimojo

Author Index .......................................................................................................................... 150
