Social Systems

Disobedience as a Mechanism of Change ...................................................................... 1
  David Burth Kurka (Imperial College London), Jeremy Pitt (Imperial College London), Peter R. Lewis (Aston University), Alina Patelli (Aston University), and Anikó Ekárt (Aston University)

Do Social Norms Emerge? The Evolution of Agents' Decisions with the Awareness of Social Values under Iterated Prisoner's Dilemma ................................................................. 11
  Shuyue Hu (Chinese University of Hong Kong) and Ho-fung Leung (Chinese University of Hong Kong)

Democracy by Design: Basic Democracy and the Self-Organisation of Collective Governance ...... 20
  Jeremy Pitt (Imperial College London) and Josiah Ober (Stanford University)

Clouds and Communities

A Multi-Agent Elasticity Management Based on Multi-Tenant Debt Exchanges ......................... 30
  Carlos Mera-Gómez (ESPOL Polytechnic University), Francisco Ramírez (University of Birmingham), Rami Bahsoon (University of Birmingham), and Rajkumar Buyya (University of Melbourne)

Forecasting Models for Self-Adaptive Cloud Applications: A Comparative Study ....................... 40
  Vladimir Podolskiy (Technical University of Munich), Anshul Jindal (Technical University of Munich), Michael Gerndt (Technical University of Munich), and Yury Oleynik (Instana GmbH)

This One Simple Trick Disrupts Digital Communities ......................................................... 50
  Philip Feldman (ASRC Federal), Aaron Dant (ASRC Federal), and Wayne Lutters (University of Maryland, Baltimore County)
Metrics and Behavior

A Macro-Level Order Metric for Self-Organizing Adaptive Systems .................................................. 60
David King (Air Force Institute of Technology) and Gilbert Peterson (Air Force Institute of Technology)

A Self-Organized Learning Model for Anomalies Detection: Application to Elderly People .......... 70
Nicolas Verstaevel (University of Wollongong), Jean-Pierre Georgé (University of Toulouse), Carole Berton (University of Toulouse), and Marie-Pierre Gleizes (University of Toulouse)

Risk-Based Testing of Self-Adaptive Systems Using Run-Time Predictions ......................................... 80
André Reichstaller (University of Augsburg) and Alexander Knapp (University of Augsburg)

Teams and Swarms

Goal-Aware Team Affiliation in Collectives of Autonomous Robots ..................................................... 90
Lukas Esterle (Aston University)

Optimizing Transitions between Abstract ABM Demonstrations ......................................................... 100
Brian Seipp (University of Maryland, Baltimore County), Karan Budhraja (University of Maryland, Baltimore County), and Tim Oates (University of Maryland, Baltimore County)

Self-Organized Resource Allocation for Reconfigurable Robot Ensembles ........................................... 110
Julian Hanke (Institute for Software and Systems Engineering), Oliver Kosak (Institute for Software and Systems Engineering), Alexander Schiendorfer (Institute for Software and Systems Engineering), and Wolfgang Reif (Institute for Software and Systems Engineering)

Smart Environments

PINCH: Self-Organized Context Neighborhoods for Smart Environments .............................................. 120
Chenguang Liu (University of Texas at Austin), Christine Julien (University of Texas at Austin), and Amy Lynn Murphy (Fondazione Bruno Kessler)

A QoS-Aware Adaptive Mobility Handling Approach for LoRa-Based IoT Systems ......................... 130
Berrevoets Robbe (KU Leuven) and Weyns Danny (KU Leuven)

Reins-MAC: Firefly Inspired Communication Scheduling for Reliable Low-Power Wireless ........... 140
Matteo Ceriotti (University of Duisburg-Essen, Germany) and Amy L. Murphy (Bruno Kessler Foundation, Italy)

Short Papers

Adaptive Autonomy in a Search and Rescue Scenario ............................................................................. 150
Mirgita Frasheri (Mälardalen University), Baran Cürükütü (Mälardalen University), Mikael Eskström (Mälardalen University), and Alessandro Vittorio Papadopoulos (Mälardalen University)

Towards Generic Adaptive Monitoring ................................................................................................. 156
Thomas Brand (University of Potsdam) and Holger Giese (University of Potsdam)
Implementing Feedback for Programming by Demonstration ........................................... 162
   Karan Kumar Budhraja (University of Maryland, Baltimore County) and
   Tim Oates (University of Maryland, Baltimore County)

Mitigating Garbage Collection Interference on Containerized Clouds ................................. 168
   Panagiotis Patros (University of New Brunswick), Kenneth B. Kent
   (University of New Brunswick), and Michael Dawson (IBM Runtimes)

Self-Adaptation of Coordination in Imperfectly Known Task Environments ....................... 174
   Friederike Wall (Alpen-Adria-Universitaet Klagenfurt)

Self-Adaptation Strategies to Maintain Security Assurance Cases .................................. 180
   Sharmin Jahan (University of Tulsa), Allen Marshall (University of
   Tulsa), and Rose Gamble (University of Tulsa)

Author Index  .................................................................................................................. 187
