Message from the Chairs ................................................................. iii

Main Research

Empirical Studies I

ORBS and the Limits of Static Slicing
David Binkley, Nicolas Gold, Mark Harman, Syed Islam, Jens Krinke, and Shin Yoo — Loyola University Maryland, USA; University College London, UK; University of East London, UK; KAIST, South Korea ............................................. 1

Intent, Tests, and Release Dependencies: Pragmatic Recipes for Source Code Integration
Martin Brandtner, Philipp Leitner, and Harald C. Gall — University of Zurich, Switzerland .......................................................... 11

The Use of C++ Exception Handling Constructs: A Comprehensive Study
Rodrigo Bonifácio, Fausto Carvalho, Guilherme N. Ramos, Uriá Kulesza, and Roberta Coelho — University of Brasília, Brazil; Federal University of Rio Grande do Norte, Brazil .......................................................... 21

Multi-layer Software Configuration: Empirical Study on Wordpress
Mohammed Sayagh and Bram Adams — Polytechnique Montréal, Canada .......................................................... 31

Code Search and Navigation

Can the Use of Types and Query Expansion Help Improve Large-Scale Code Search?
Otávio Augusto Lazzarini Lemos, Adriano Carvalho de Paula, Hitesh Sajnani, and Cristina V. Lopes — Federal University of São Paulo, Brazil; University of California at Irvine, USA .......................................................... 41

Using Changeset Descriptions as a Data Source to Assist Feature Location
Muslim Chochlov, Michael English, and Jim Buckley — University of Limerick, Ireland .......................................................... 51

Automatically Identifying Focal Methods under Test in Unit Test Cases
Mohammad Ghafari, Carlo Ghezzi, and Konstantin Rubinov — Politecnico di Milano, Italy; National University of Singapore, Singapore .......................................................... 61

Navigating Source Code with Words
Dawn Lawrie and David Binkley — Loyola University Maryland, USA .......................................................... 71

Recommending Insightful Comments for Source Code using Crowdsourced Knowledge
Mohammad Masudur Rahman, Chanchal K. Roy, and Iman Keivanloo — University of Saskatchewan, Canada; Queen’s University, Canada .......................................................... 81

Static Analysis

Checking C++ Codes for Compatibility with Operator Overloading
Alexander Hück, Christian Bischof, and Jean Utke — TU Darmstadt, Germany; Allstate Insurance Company, USA .......................................................... 91

Detecting Function Purity in JavaScript
Jens Nicolay, Carlos Nogueira, Coen De Roover, and Wolfgang De Meuter — Vrije Universiteit Brussel, Belgium .......................................................... 101

Data Tainting and Obfuscation: Improving Plausibility of Incorrect Taint
Sandrine Blazy, Stéphanie Riaud, and Thomas Sirvent — University of Rennes 1, France; DGA, France .......................................................... 111

A Grammar for Spreadsheet Formulas Evaluated on Two Large Datasets
Efthimia Aivaloglou, David Hoepelman, and Felienne Hermans — Delft University of Technology, Netherlands .......................................................... 121

Empirical Studies II

The Impact of Cross-Distribution Bug Duplicates, Empirical Study on Debian and Ubuntu
Vincent Boisselle and Bram Adams — Polytechnique Montréal, Canada .......................................................... 131

Cumulative Code Churn: Impact on Maintainability
Csaba Faragó, Péter Hedegőd, and Rudolf Ferenc — University of Szeged, Hungary .......................................................... 141
How Do Java Methods Grow?
Daniela Steidl and Florian Deissenboeck — CQSE, Germany

(Code, Memory, Performance) Smells
On the Comprehension of Code Clone Visualizations: A Controlled Study using Eye Tracking
Md Sami Uddin, Varun Gaur, Carl Gutwin, and Chanchal K. Roy — University of Saskatchewan, Canada

When Code Smells Twice as Much: Metric-Based Detection of Variability-Aware Code Smells
Wolfram Fenske, Sandro Schulze, Daniel Meyer, and Gunter Saake — University of Magdeburg, Germany; TU Braunschweig, Germany

LeakTracer: Tracing Leaks along the Way
Hengyang Yu, Xiaohua Shi, and Wei Feng — Beijing University, China

Automated Memory Leak Diagnosis by Regression Testing
Mohammadreza Ghanavati and Artur Andrzeja — University of Heidelberg, Germany

Automating the Performance Deviation Analysis for Multiple System Releases: An Evolutionary Study
Felipe Pinto, Uirâ Kulesza, and Christoph Treude — Federal University of Rio Grande do Norte, Brazil

Code and API Transformation
From Preprocessor-Constrained Parse Graphs to Preprocessor-Constrained Control Flow
Dierk Lüdemann and Rainer Koschke — University of Bremen, Germany

Recording and Replaying System Specific, Source Code Transformations
Gustavo Santos, Anne Etien, Nicolas Anquetil, Stéphane Ducasse, and Marco Tulio Valente — INRIA, France; Federal University of Minas Gerais, Brazil

Discovering Likely Mappings between APIs using Text Mining
Rahul Pandita, Raoul Praful Jetley, Sithu D Sudarsan, and Laurie Williams — North Carolina State University, USA; ABB Corporate Research, India

Tool Demos
SimNav: Simulink Navigation of Model Clone Classes
Eric J. Rapos, Andrew Stevenson, Manar H. Alalfi, and James R. Cordy — Queen’s University, Canada

A Translation Validation Framework for Symbolic Value Propagation Based Equivalence Checking of FSMDAs
Kunal Banerjee, Chittaranjan Mandal, and Dipankar Sarkar — IIT Kharagpur, India

FaultBuster: An Automatic Code Smell Refactoring Toolset
Gábor Szőke, Csaba Nagy, Lajos Jenő Fulop, Rudolf Ferenc, and Tibor Gyimóthy — University of Szeged, Hungary

Improving Prioritization of Software Weaknesses using Security Models with AVUS
Stephan Renatus, Corrie Bartelheimer, and Jörn Eichler — Fraunhofer AISEC, Germany

A Static Microcode Analysis Tool for Programmable Load Drivers
Luca Dariz, Massimiliano Ruggeri, and Michele Selvatici — IMATONER - CNR, Italy

CodeMetropolis: Eclipse over the City of Source Code
Gergő Balogh, Attila Szabolcs, and Árpád Beszédes — University of Szeged, Hungary
