CONSTRUCTION OF A COMPUTER ASSISTED VIDEO INSTRUCTION (CAVI) LESSON

James Gilbert, M.B., B.S., F.F.A.R.C.S.
Sheila Swartzman, M.D., F.R.C.P(c)
Phil Helsel, B.S.
Dept. of Anesthesia, U.T. Health Science Center
7703 Floyd Curl Drive
San Antonio, Texas 78284

This exhibit will introduce CAVI as an educational tool in clinical anesthesia training for medical students and residents. The deficiencies of established computer assist instructional programs will be enunciated and features conducive to successful CAVI lesson construction discussed.

Hardware utilized comprises an Apple II e computer, disk drive, audio color monitor, Panasonic NV 8200 videocassette recorder and BCD Associates interface card and authoring courseware.

CAI/interactive Video Demonstration

F.E. Scott, Ph.D., Pete Seel, and Robert Miller

Mercy Hospital of Sacramento

This presentation will focus on the design, production and demonstration of a pilot project in computer assisted interactive video training for pharmacy technicians. Included will be:
- explanation of our instructional design model;
- Whitney System IBM PC interface considerations;
- computer text and video production considerations;
- demonstration of a typical module from the training program.
