2008 IEEE International Conference on Services Computing

SCC 2008

Table of Contents

Volume - 1

Message from the General Chairs - Volume 1                                 ................................................................. x
Message from the Program Chairs - Volume 1                                 ................................................................. xi
Organizing Committee - Volume 1                                           ................................................................. xii
Technical Program Committee - Volume 1                                    ................................................................. xiv
IEEE Computer Society Technical Committee on Services
Computing - Volume 1                                                      ................................................................. xvii
Keynotes - Volume 1                                                       ................................................................. xviii
Panels - Volume 1                                                         ................................................................. xxii
Tutorials - Volume 1                                                      ................................................................. xxiii

Regular Research Papers

Research Session 1 - Access Control

Verification of Access Control Requirements in Web Services Choreography ................................................................. 5

Federica Paci, Mourad Ouzzani, and Massimo Mecella

Pattern-based Policy Configuration for SOA Applications ................................................................. 13

Fumiko Satoh, Nirmal K. Mukhi, Yuichi Nakamura, and Shinichi Hirose

Monitoring Dependencies for SLAs: The MoDe4SLA Approach ................................................................. 21

Lianne Bodenstaff, Andreas Wombacher, Manfred Reichert, and Michael C. Jaeger
Research Session 2 - Access Control
Towards Effective Project Management across Multiple Projects with Distributed Performing Centers .................................................................33
  Rohit M. Lotlikar, Ramana Polavarapu, Sadhika Sharma, and Biplav Srivastava
Optimizing Change Request Scheduling in IT Service Management .................................................................41
  Leila Zia, Yixin Diao, Daniela Rosu, Chris Ward, and Kamal Bhattacharya
Predictive Admission Control Algorithm for Advance Reservation in Equipment Grid ..................................49
  Jie Yin, Yuexuan Wang, Meizhi Hu, and Cheng Wu

Research Session 3 - Access Control
End-to-End Versioning Support for Web Services ..........................................................................................59
  Philipp Leitner, Anton Michlmayr, Florian Rosenberg, and Schahram Dustdar
Representing and Accessing Design Knowledge for Service Integration .....................................................67
  Karthikeyan Umapathy and Sandeep Purao
Incomplete Preference-driven Web Service Selection ......................................................................................75
  Hongbing Wang, Junjie Xu, and Peicheng Li

Research Session 4 - Business
Zazen: A Mediating SOA between Ajax Applications and Enterprise Data ...........................................85
  Avraham Leff and James T. Rayfield
To Establish Enterprise Service Model from Enterprise Business Model ....................................................93
  Pooyan Jamshidi, Mohsen Sharifi, and Saeed Mansour
SCOOP: Automated Social Recommendation in Enterprise Process Management ................................101
  Huiming Qu, Jimeng Sun, and Hani T. Jamjoom

Research Session 5 - Case Study
Auction Based Models for Ticket Allocation Problem in IT Service Delivery Industry ................................111
  Prasad M. Deshpande, Dinesh Garg, and N. Rama Suri
Experimental Robustness Evaluation of JMS Middleware .........................................................................119
  Nuno Laranjeiro, Marco Vieira, and Henrique Madeira
Locating Components Realizing Services in Existing Systems .................................................................127
  Renuka Sindhgatta and Karthikeyan Ponnalagu

Research Session 6 - Case Study
On the Specification of Payment Requirements for Collaborative Services ........................................137
  Bart Orriens and Jian Yang
A Graph Theory Based Impact and Completion Analysis Framework and Applications for Modeling SOA Solution Components ..................................................145
  Nianjun Zhou and Liang-Jie Zhang
Rapid Deployment of SOA Solutions via Automated Image Replication and Reconfiguration ...............155
  Manish Sethi, Kalapriya Kannan, Narendran Sachindran, and Manish Gupta
Research Session 7 - Security

Security Specification at Process Level ...................................................................................................................... 165
  Stéphanie Chollet and Philippe Lalanda

Adaptive Secure Access to Remote Services ............................................................................................................. 173
  Hanping Lufei, Weisong Shi, and Vipin Chaudhary

A Secure Information Flow Architecture for Web Services ...................................................................................... 182
  Lenin Singaravelu, Jinpeng Wei, and Calton Pu

Research Session 8 - Semantic Web

Morpheus: Semantics-based Incremental Change Propagation in SOA-based Solutions ......................................... 193
  Ramya Ravichandar, Nanjangud C. Narendra, Karthikeyan Ponnalagu, and Dipayan Gangopadhyay

Web Service Matching by Ontology Instance Categorization .................................................................................. 202
  Qianhui Althea Liang and Herman Lam

An Automatic Semantic Segment Detection Service for HTML Documents ........................................................... 210
  Stephen J.H. Yang, Jia Zhang, and Stella T.C. Tsai

Research Session 9 - Service Discovery

Chord4S: A P2P-based Decentralised Service Discovery Approach ........................................................................ 221
  Qiang He, Jun Yan, Yun Yang, Ryszard Kowalczyk, and Hai Jin

Predicting Service Mashup Candidates Using Enhanced Syntactical Message Management ........................................ 229
  M. Brian Blake and Michael F. Nowlan

Proactive Runtime Service Discovery ....................................................................................................................... 237
  Andrea Zisman, James Dooley, and George Spanoudakis

Research Session 10 - SOA

Instance Isolation Analysis for Service-Oriented Architectures .............................................................................. 249
  Gero Decker and Mathias Weske

Variation-Oriented Engineering (VOE): Enhancing Reusability of SOA-based Solutions ......................................... 257
  Nanjangud C. Narendra, Karthikeyan Ponnalagu, Biplav Srivastava, and Guruduth S. Banavar

Promoting Reuse via Extraction of Domain Concepts and Service Abstractions from Design Diagrams ................ 265
  Kalapriya Kannan and Biplav Srivastava

Research Session 11 - Workflow

Study of Service Processing Agent for Context-Aware Service Coordination ....................................................... 275
  Yoji Yamato, Hiroyuki Ohnishi, and Hiroshi Sunaga

PASS: An Approach to Personalized Automated Service Composition .............................................................. 283
  Yang Li, JinPeng Huai, Hailong Sun, Ting Deng, and Huipeng Guo
Runtime Protocol Binding: Flexible Service Integration by Means of Flexible Service Interactions

Javier Fabra, Pedro Álvarez, José Ángel Banares, and Joaquín Ezpeleta

Research Session 12 - Workflow

A QSQL-based Efficient Planning Algorithm for Fully-automated Service Composition in Dynamic Service Environments

Kaijun Ren, Xiao Liu, Jinjun Chen, Nong Xiao, Junqiang Song, and Weimin Zhang

A User-Steering Exploratory Service Composition Approach

Shuying Yan, Yanbo Han, Jing Wang, Chen Liu, and Guiling Wang

Leveraging Service Composition Relationship to Improve CPU Demand Estimation in SOA Environments

Chun Zhang, Rong N. Chang, Chang-Shing Perng, Edward So, Chunqiang Tang, and Tao Tao

Research Session 13 - Workflow

Dynamic Support for BPEL Process Instance Adaptation

Ru Fang, Zhi Le Zou, Corina Stratan, Liana Fong, David Marston, Linh Lam, and David Frank

Service-Oriented Architecture for VIEW: A Visual Scientific Workflow Management System

Cui Lin, Shiyong Lu, Zhaoqiang Lai, Artem Chebotko, Xubo Fei, Jing Hua, and Farshad Fotouhi

A Reflective Framework to Improve the Adaptability of BPEL-based Web Service Composition

Yanlong Zhai, Hongyi Su, and Shouyi Zhan

Research Session 14: Workflow

Formalising Message Exchange Patterns using BPEL Light

Tammo van Lessen, Jörg Nitzsche, and Frank Leymann

Composing Web Services through Automatic Reformulation of Service Specifications

Jyotishman Pathak, Samik Basu, and Vasant Honavar

A Middleware Architecture for Enhancing Web Services Infrastructure for Distributed Coordination of Workflows

Janaka Balasooriya, Sushil K. Prasad, and Shamkant B. Navathe

Research Session 15 - Workflow

A Risk Reduction Framework for Dynamic Workflows

Prabhdeep Singh, Fatih Gelgi, Hasan Davulcu, Stephen S. Yau, and Supratik Mukhopadhyay

A Folksonomy-Based Model of Web Services for Discovery and Automatic Composition

Eric Bouillet, Mark Feblowitz, Hanhua Feng, Zhen Liu, Anand Ranganathan, and Anton Riabov
An Incremental Graph-based Approach to Automatic Service Composition .................................................................397
  Mazen Malek Shiaa, Jan Ove Fladmark, and Benoit Thiell

Research Session 16 - Fault Tolerant/Workflow

Byzantine Fault Tolerant Coordination for Web Services Business Activities ..........................................................407
  Wenbing Zhao and Honglei Zhang
Towards a SLA-based Approach to Handle Service Disruptions ..............................................................................415
  Lionel Touseau, Didier Donsez, and Walter Rudametkin
Making BPEL Flexible – Adapting in the Context of Coordination Constraints Using
WS-BPEL .....................................................................................................................................................................423
  Yunzhou Wu and Prashant Doshi

Research Session 17 - Business

  Dharmashankar Subramanian and Lianjun An
A 3-level e-Business Registry Meta Model ................................................................................................................441
  Christian Huemer, Philipp Liegl, Rainer Schuster, and Marco Zapletal

Research Session 18 - Indexing

Scaling Location-based Services with Dynamically Composed Location Index .......................................................453
  Bhuvan Bamba, Sangeetha Seshadri, and Ling Liu
Service Functionality Indexing and Matching for Service-Based Systems ......................................................................461
  Stephen S. Yau and Junwei Liu

Author Index - Volume 1 ................................................................................................................................................469
