## Regular Research Papers

Alignment of Choreography Changes in BPEL Processes ........................................... 1
Andreas Wombacher

Automatically Deriving Choreography-Conforming Systems of Services ............................ 9
Gregorio Díaz and Ismael Rodríguez

QoS-Enabled Business-to-Business Integration Using ebBP to WS-BPEL Translations ................................................................. 17
Andreas Schönberger, Thomas Benker, Stefan Fritzemeier, Matthias Geiger,
Simon Harrer, Tristan Kessner, Johannes Schwalb, and Guido Wirtz

Organizing Documented Processes .................................................................... 25
Biplav Srivastava and Debdoott Mukherjee

Change Propagation in Process Models Using Behavioural Profiles ............................. 33
Matthias Weidlich, Mathias Weske, and Jan Mendling

Theoretical Framework for Eliminating Redundancy in Workflows ......................... 41
Dhrubajyoti Saha, Abhishek Samanta, and Smruti R. Sarangi
Spatio-Temporal Patterns for Problem Determination in IT Services

Shubhadip Mitra, Partha Dutta, Shivkumar Kalyanaraman, and Prashant Pradhan

Multi-dimensional Knowledge Integration for Efficient Incident Management in a Services Cloud

Rajeev Gupta, K. Hima Prasad, Laura Luan, Daniela Rosu, and Chris Ward

Managing Faults in the Service Delivery Process of Service Provider Coalitions

Patricia Marcu, Larisa Shwartz, Genady Grabarnik, and David Loewenstern

SolutionFinder: Intelligent Knowledge Integration and Dissemination for Solution Retrieval in IT Support Services

Huajing Li, Maja Vukovic, Gopal Pingali, and Wang-Chien Lee

Protecting Sensitive Customer Information in Call Center Recordings

Tanveer A. Faruquie, Sumit Negi, and L. Venkata Subramaniam

Dependency Analysis Framework for Software Service Delivery

Rema Ananthanarayan, Vijil Chenthamarakshan, Heng Chu, Prasad M. Deshpande, Raghu Krishnapuram, and Shajeer K. Mohammed

Efficient Seat Utilization in Global IT Delivery Service Systems

Pranav Gupta and Gyana Parija

Effective Decision Support for Workforce Deployment Service Systems

Kashyap Dixit, Munish Goyal, Pranav Gupta, Nanda Kambhatla, Rohit M. Lotlikar, Debapriyo Majumdar, Gyana R. Parija, Sambuddha Roy, and Soujanya Soni

An Optimal Capacity Planning Algorithm for Provisioning Cluster-Based Failure-Resilient Composite Services

Chun Zhang, Rong N. Chang, Chang-shing Perng, Edward So, Chungqiang Tang, and Tao Tao

Performance Management for Large Scale Service Delivery Platforms

Manoj K. Agarwal

ITBVM: IT Business Value Modeler

Nikolai Joukov, Birgit Pfitzmann, HariGovind V. Ramasamy, Norbert G. Vogl, Murthy V. Devarakonda, and Tryg Ager

Towards Providing Value Based Differentiated QoS

Girish Chafle, Sameep Mehta, and Gyana R. Parija

A Holistic View of Industry Standards Across SOA Solution Stack

Natalia Razinkov, Nir Mashkif, David Amid, and Amit Fisher

Managing Configuration Complexity during Deployment and Maintenance of SOA Solutions

Kalapriya Kannan, Nanjugad C. Narendra, and Lakshmis Ramaswamy

Evaluating Service Identification with Design Metrics on Business Process Decomposition

Qian Ma, Nianjun Zhou, Yanfeng Zhu, and Hao Wang
Integrated Constraint Violation Handling for Dynamic Service Composition .............................................168

MingXue Wang, Kosala Yapa Bandara, and Claus Pahl

Optimal Replacement Policy of Services Based on Markov Decision Process .............................................176

Sandhya S. Pillai and Nanjungud C. Narendra

A Model to Design and Verify Context-Aware Adaptive Service Composition .............................................184

Javier Cubo, Michele Sama, Franco Raimondi, and David Rosenblum

Towards Autonomic Service Discovery—A Survey and Comparison .........................................................192

Michael Rambold, Holger Kasinger, Florian Launtenbacher, and Bernhard Bauer

Identifying Client Goals for Web Service Discovery .....................................................................................202

Eyhab Al-Masri and Qusay H. Mahmoud

Web Service Substitution Based on Preferences Over Non-functional Attributes ...........................................210

Ganesh Ram Santhanam, Samik Basu, and Vasant Honavar

Analyzing Impact Factors on Composite Services .......................................................................................218

Lianne Bodenstaff, Andreas Wombacher, Manfred Reichert, and Michael C. Jaeger

Model Aware Execution of Composite Web Services ...................................................................................227

Karolina Zurowska and Ralph Deters

QoS Analysis for Web Service Composition ..................................................................................................235

Huiyuan Zheng, Weiliang Zhao, Jian Yang, and Athman Bouguettaya

Enhancing Claim-Based Identity Management by Adding a Credibility Level to the Notion of Claims ........................................................................................................243

Ivonne Thomas and Christoph Meinel

A Security Meta-model for Service-Oriented Architectures ..........................................................................251

Michael Menzel and Christoph Meinel

Effective Detection of SQL/XPath Injection Vulnerabilities in Web Services .............................................260

Nuno Antunes, Nuno Laranjeiro, Marco Vieira, and Henrique Madeira

Reconfigurable SCA Applications with the FraSCAti Platform ..................................................................268

Lionel Seinturier, Philippe Merle, Damien Fournier, Nicolas Dolet, Valerio Schiavoni, and Jean-Bernard Stefani

Ontology-based Information Sharing in Service-Oriented Database Systems .............................................276

TszYan Chow, Wei-Tek Tsai, Janaka Balasooriya, and Xiaoying Bai

A Task Abstraction and Mapping Approach to the Shimming Problem in Scientific Workflows .................284

Cui Lin, Shiyong Lu, Xubo Fei, Darshan Pai, and Jing Hua

Application and Industry Track

Interaction Mismatch Discovery Based Transformation from BPMN to BPEL ..............................................292

Shuai Gong and Jinhua Xiong

Extracting Behavioral Models from WS-BPEL Processes for Service Discovery ...........................................300

Zan Xiao, Donggang Cao, Chao You, and Hong Mei
Improving the Performance of ActiveXML Workflows: The Formal Descriptions ..............................................................................................................................................................308
   Sattanathan Subramanian and Guttorm Sindre

Componentization of Business Process Layer in the SOA Reference Architecture ..............................................................................................................................................................316
   Liang-Jie Zhang and Jia Zhang

Web2Exchange: A Model-Based Service Transformation and Integration Environment .............................................................................................................................................................324
   Venugopal Srinivasmurthy, Sanjeeva Manvi, Ravi Gullapalli, Dattathreya Sathyamurthy, Nandan Reddy, Hemanth Dattatreya, Sharad Singhal, and Jim Pruyne

Towards a Unified Approach for Business Process Modeling Using Context-Based Artifacts and Web Services ......................................................................................................................................................................332
   Nanjangud C. Narendra, Youakim Badr, Philippe Thiran, and Zakaria Maamar

A Service Oriented Architecture for Personalized Rich Media Delivery ..................................................................................................................................................................................340
   Sascha Tönnies, Benjamin Köhncke, Patrick Hennig, and Wolf-Tilo Balke

WS-CDSP: A Novel Web Services-Based Content Delivery Service Peering Scheme ..................................................................................................................................................................348
   ZhiHui Lu, Jie Wu, Chuan Xiao, WeiMing Fu, and YiPing Zhong

Ensuring Coordination of Multi-business Interactions ......................................................................................................................................................................................................................356
   Min Yuan, Zhiqiu Huang, Jun Hu, Xiang Li, and Yi Zhu

Identifying Data Constrained Activities for Migration Planning ........................................................................................................................................................................................................364
   Linh Lam, Qin Tang, Zhi Le Zou, Liana Fong, and David Frank

Cost-Effective Semantic Annotation of XML Schemas and Web Service Interfaces ..................................................................................................................................................................................................372
   Peep Küngas and Marlon Dumas

Clustering Web Services for Automatic Categorization ..................................................................................................................................................................................................................380
   Qianhui Liang, Peipei Li, Patrick C.K. Hung, and Xindong Wu

Quantitative Modeling of Communication Cost for Global Service Delivery ....................................................................................................................................................................................................388
   Nianjun Zhou, Qian Ma, and Krishna Ratakonda

Simplify Stochastic QoS Admission Test for Composite Services through Lower Bound Approximation ..................................................................................................................................................................................................396
   Kaibo Wang, Xingshe Zhou, Shandan Zhou, and Ning Fu

Port Based Reliability Computing for Service Composition ..................................................................................................................................................................................................................403
   Zuohua Ding and Mingyue Jiang

Dynamic Service Composition in Ambient Intelligence Environment ..................................................................................................................................................................................................................411
   Yazid Benazzouz, Nicolas Sabouret, and Belkacem Chikhaoui

A Backwards Composition Context Based Service Selection Approach for Service Composition ..................................................................................................................................................................419
   Hong Qing Yu and Stephan Reiff-Marganiec
