Message from the General Chair

On behalf of the DSD and SEAA 2016 chairs, volunteers and committees, I welcome you to the 19th Euromicro Conference on Digital Systems Design (DSD) and the 42nd Euromicro Conference on Software Engineering and Advanced Applications (SEAA). For 19 years DSD offers to its participants a high quality forum to present and share knowledge from the fields of (embedded, pervasive and high-performance) digital and mixed hardware/software system engineering, down to microarchitectures, digital circuits and VLSI techniques. DSD is a discussion forum for researchers and engineers from academia and industry working on state-of-the-art investigations, development and applications. Regarding the long-standing SEAA, for 42 years it serves as an international forum for researchers, practitioners from business and industry, and students to present and discuss the latest innovations, trends, experiences, and concerns in the field of Software Engineering and Advanced Applications in information technology for software-intensive systems.

From the post of the DSD and SEAA 2016 General Chair I would like for this year to express my sincere thanks to the Program Co-Chairs of DSD Paris Kitsos, Odysseas Koufopavlou and SEAA Carmine Gravino, Martin Höst, as well as the Steering Committee and Program Committee Members of DSD and SEAA for their efforts and performance in putting together a high quality program. I also thank the DSD Publicity Chair Nicolas Sklavos, the DSD and SEAA Publication Chair Amund Skavhaug and the SEAA Publicity Chair Oktay Turetken for their overwhelming support at all levels.

Finally, I would like to acknowledge our appreciation to the Sponsors of the DSD and SEAA 2016 meeting, the Austrian Airlines and the University of Cyprus.

Once again, welcome to the DSD and SEAA 2016 and I hope that your stay in Cyprus will be both enjoyable and beneficial.

George A. Papadopoulos
DSD/SEAA 2016 General Chair
