2018 ACM/IEEE 1st
International Workshop on
Security Awareness from Design
to Deployment
SEAD 2018

Table of Contents

Message from the ICSE 2018 General Chair ................................................................. vii
Message from the SEAD 2018 Chairs .......................................................... x
Program Committee for SEAD 2018 ................................................................. xi
ICSE 2018 Sponsors and Supporters ........................................................... xii

Keynote

Continuously Integrating Security ................................................................. 1
Laurie Williams (North Carolina State University)

Session 1

Software Security Vulnerabilities: Baselining and Benchmarking ........................................... 3
Pete Rotella (Cisco Systems)

Risk-Based Design Security Analysis ................................................................. 11
Laurens Sion (KU Leuven), Koen Yskout (KU Leuven), Dimitri Van Landuyt
(KU Leuven), and Wouter Joosen (KU Leuven)

Understanding the Relationship between Quality and Security: A Large-Scale Analysis of Android
Applications ............................................................................................................. 19
Anthony Peruma (Rochester Institute of Technology) and Daniel Krutz
(Rochester Institute of Technology)

Session 2

An Investigation of Security Conversations in Stack Overflow: Perceptions of Security and Community
Involvement ......................................................................................................... 26
Tamara Lopez (The Open University), Thein T. Tun (The Open
University), Arosha Bandara (The Open University), Mark Levine
(University of Exeter), Bashar Naseebah (The Open University &
University of Limerick), and Helen Sharp (The Open University)
Session 3

Security Patterns 2.0: Toward Security Patterns Based on Security Building Blocks .......................... 45
Alexander van den Berghe (imec-DistriNet), Koen Yskou (imec-DistriNet), and Wouter Joosen (imec-DistriNet)

DLR Secure Software Engineering ................................................................. 49
Rohan Krishnamurthy (German Aerospace Center), Michael Meinel (German Aerospace Center), Carina Haupt (German Aerospace Center), Andreas Schreiber (German Aerospace Center), and Patrick Mader (Technical University Ilmenau)

Providing an Experiential Cybersecurity Learning Experience through Mobile Security Labs .................. 51
Anthony Peruma (Rochester Institute of Technology), Samuel Malachowsky (Rochester Institute of Technology), and Daniel Krutz (Rochester Institute of Technology)

Author Index ................................................................. 55
