## Preface

Foreword ................................................................. iii

## Processes

Software Engineering in Health Care: Is It Really Different? And How to Gain Impact  
Jens H. Weber-Jahnke, Morgan Price, and James Williams — University of Victoria, Canada; University of British Columbia, Canada; University of Toronto, Canada .................................................. 1

Introducing Usability Testing in the Risk Management Process in Software Development  
Christin Lindholm and Martin Höst — Lund University, Sweden ........................................... 5

An Agile V-Model for Medical Device Software Development to Overcome the Challenges with Plan-Driven Software Development Lifecycles  
Martin McHugh, Oisín Cawley, Fergal McCaffery, Ita Richardson, and Xiaofeng Wang — Dundalk Institute of Technology, Ireland; Lero, Ireland; University of Limerick, Ireland; Free University of Bolzano, Italy ................................................... 12

## Requirements

PolicyForge: A Collaborative Environment for Formalizing Privacy Policies in Health Care  
Andras Nadas, Laszlo Juracz, Janos Sztipanovits, Mark E. Frisse, and Ann J. Olsen — Vanderbilt University, USA .................................................. 20

Modal Abstraction View of Requirements for Medical Devices Used in Healthcare Processes  
Heather M. Conboy, George S. Avrunin, and Lori A. Clarke — University of Massachusetts at Amherst, USA .................................................. 24

Open Source Patient-Controlled Analgesic Pump Requirements Documentation  
Brian R. Larson, John Hatcliff, and Patrice Chalin — Kansas State University, USA .................. 28

## Analysis

Taming Complex Healthcare Data Models with Dictionary Tooling  
John T. E. Timm, Joshua Hui, Sarah Knoop, and Peter Schwarz — IBM Research, USA ................ 35

Transformation Operators for Easier Engineering of Medical Process Models  
Christophe Damas, Bernard Lambeau, and Axel van Lamsweerde — Université Catholique de Louvain, Belgium .................................................. 39

## Verification

Proposing Regulatory-Driven Automated Test Suites for Electronic Health Record Systems  
Patrick Morrison, Casper Holmgreen, Aaron Massey, and Laurie Williams — North Carolina State University, USA; Georgia Tech, USA .................................................. 46

Considerations for Online Deviation Detection in Medical Processes  
Stefan C. Christov, George S. Avrunin, and Lori A. Clarke — University of Massachusetts at Amherst, USA .................................................. 50

Inferring State for Real-Time Monitoring of Care Processes  
Shirley A. Baffoe, Aladdin Baarah, and Liam Peyton — University of Ottawa, Canada ................ 57

## Systems

Resource Scheduling through Resource-Aware Simulation of Emergency Departments  
Seung Yeob Shin, Hari Balasubramanian, Yurii Brun, Philip L. Henneman, and Leon J. Osterweil — University of Massachusetts at Amherst, USA; Tufts University, USA .................................................. 64
Need for a Context-Aware Personalized Health Intervention System to Ensure Long-Term Behavior Change to Prevent Obesity
Adil Mehmood Khan and Seok-Won Lee — Ajou University, South Korea ................................................................. 71

A Novel Mobile Application to Assist Maternal Health Workers in Rural India
Anutosh Maitra and Nataraj Kuntagod — Accenture Technology Labs, India .............................................................. 75

Toward a Care Process Metamodel: For Business Intelligence Healthcare Monitoring Solutions
Saeed Ahmadi Behnam and Omar Badreddin — University of Ottawa, Canada .............................................................. 79
