External Reviewers........................................................................................................................................xviii
IEEE Computer Society Technical Committee on Services Computing.........................................................xix

Keynotes

Web Services: Software-as-a-Service (SaaS), Communication, and Beyond .......................................................1
  Wu Chou
Net-Enabled Applications for Commercial Aviation .....................................................................................2
  Susan X. Ying
Mobile Services Business and Technology Trends ......................................................................................4
  Cesar Gonzales
Services Computing: A New Thinking Style of Education and Engineering ..............................................5
  Liang-Jie Zhang

Panels

Cloud Computing and IT as a Service: Opportunities and Challenges ..............................................................6
  Geng Lin, Glenn Dasmalchi, and Jinzy Zhu
Smarter SOA ................................................................................................................................................8
  Tony Shan, Ephraim Feig, Thomas Bui, and Jia Zhang
How Can Web Services Help Civil Aviation? ...............................................................................................10
  Casey Fung
Tutorials

Common Business Components and Services toward More Agile and Flexible Industry Solutions and Assets .................................................................11

Min Luo

Practical SOA: Service Modeling, Enterprise Service Bus and Governance ..................................................13

Min Luo and Liang-Jie Zhang

Make the Consumable Services via REST .................................................................15

Ning Yan

Web Service-Based Business Process Development, Threat Modeling and Security Assessment Tool .................................................................16

Jianxin Li, Teodor Sommestad, Patrick C. K. Hung, and Xiang Li

Emerging Services Technology Track

Software as a Service: Configuration and Customization Perspectives .................................................................18

Wei Sun, Xin Zhang, Chang Jie Guo, Pei Sun, and Hui Su

Towards Unconditional Anonymity: Privacy Enforcement Model in Web Services .............................................................................................26

Yong Yang and Jian Yang

P2P SCCM: Service-Oriented Community Coordinated Multimedia over P2P .................................................................34

Jiehan Zhou, Zhonghong Ou, Mika Rautiainen, and Mika Ylianttila

SOA Solutioning Track

Towards Data Management of Web-Based Spatial Decision Support: The Case of Facility Network Transformation Analysis Services .................................................................41

Wenjun Yin, Yuhui Fu, Xinxin Bai, and Jin Dong

A Practical Monitoring Framework for ESB-Based Services .................................................................................................49

Hao Yuan, Si Won Choi, and Soo Dong Kim

Web Services Operation and Parameter Matchmaking Based on Free-Form User Queries .................................................................................................57

Chaitali Gupta, Rajdeep Bhowmik, and Madhusudhan Govindaraju

A Model Driven Service Identification Approach for Process Centric Systems .................................................................65

Vishal Dwivedi and Naveen Kulkarni

A Service Oriented Architecture for Biomedical Question Answering System .................................................................73

Rosaline Makar, Mohamed Kouta, and Amr Badr

Mobile Plug-and-Play Architecture for Collaborative Hybrid Peer-to-Peer Applications .................................................................................................81

Mika Ylianttila, Erkki Harjula, Timo Koskela, Otso Kassinen, and Jukka Riekki

Metamodeling for Community Coordinated Multimedia and Experience on Metamodel-Driven Content Annotation Service Prototype .................................................................................................88

Jiehan Zhou, Mika Rautiainen, and Mika Ylianttila
Service-Oriented Approach for Implementing an Extensible Content Management System ................................................................. 96
   Trieu C. Chieu and Liangzhao Zeng

Workshop on Software Engineering for Adaptive Software Systems (SEASS 2008)

Towards Systematic Engineering of Service-Oriented Access Control in Federated Environments ........................................ 104
   T. Höllrigl, F. Schell, S. Suelmann, and H. Hartenstein
Regression Testing of Composite Service: An XBFG-Based Approach ..................................................... 112
   Di Wang, Bixin Li, and Ju Cai
A Formal Approach to Adaptable-Resources Specification ................................................................. 120
   Yacine Sam and Omar Boucelma
Actor Eco-systems: Modeling and Configuring Virtual Enterprises ..................................................... 125
   Aditya Ghose and George Koliadis

Workshop on Service Intelligence and Computing (SIC 2008)

Ontology Based Cross-Domain Enterprises Integration and Interoperability ........................................ 133
   Yue Ni and Yushun Fan
A Framework for Distributed Market Place Based on Intelligent Software Agents and Semantic Web Services ..................................................... 141
   Ali Khalili, Ali Habibi Badrabadi, and Farid Khoshalhan
A Middleware Solution to Monitoring Composite Web Services-Based Processes ..................................................... 149
   Farhana H. Zulkernine, Patrick Martin, and Kirk Wilson
A Global Criminal and Terrorist Tracking Framework Using Semantic Grid Technologies ..................................................... 157
   Wai Ming Wong, Dickson K. W. Chiu, and Patrick C. K. Hung
RLPLA: A Reinforcement Learning Algorithm of Web Service Composition with Preference Consideration ..................................................... 163
   Hongbing Wang, Pingping Tang, and Patrick C. K. Hung

Workshop on Service-Oriented Community Coordinated Multimedia (SCCM 2008)

Skin Detection on Images with Color Deviation ..................................................... 171
   Zhiwei Jiang, Zhaohui Wu, and Min Yao
An Adaptive User Interface Generation Framework for Web Services ..................................................... 175
   Jiang He, I-Ling Yen, Tu Peng, Jing Dong, and Farokh Bastani
Cost-Aware Resource Acquisition for Guaranteed Service in P2P Networks ..................................................... 183
   Joseph So CH and Po-choi Wong
Services Computing Curriculum Initiative (SCCI) Track

Between Service Science and Service-Oriented Software Systems .......................................................... 189
Yuhong Yan, Juergen Bode, and William McIver Jr.

Design and Delivery Practices of the Summer School on Services Computing ............................................. 196
Liang-Jie Zhang, Jia Zhang, and Ephraim Feig

A Case Study Based Services Computing Course Delivery Practice ........................................................... 201
Zhixiong Chen and Liang-Jie Zhang

SOA Summit

An On-the-Fly Approach to Web-Based Service Composition ................................................................. 208
Qi Zhao, Gang Huang, Jiyu Huang, Xuanzhe Liu, Hong Mei, Ying Li, and Ying Chen

NMF: Network Mining Framework Using Topological Structure of Complex Networks .................................. 210
Kouhei Sugiyama, Hiroyuki Ohsaki, Makoto Imase, Takeshi Yagi, and Junichi Murayama

WebComposition/DGS: Supporting Web2.0 Developments with Data Grids .............................................. 212
Andreas Heil and Martin Gaedke

Efficient Solution Design Mapping in Service Delivery .............................................................................. 216
Hakan Hacigümüş

Author Index .................................................................................................................................................... 218
