Message from the SERVICES 2010 Workshop Co-Chairs

The purpose of organizing workshops is to provide a platform for presenting novel ideas in a less formal and possibly more focused way than the conferences themselves. As such, they also offer a good opportunity for young researchers to present their work and to obtain feedback from an interested community. The format of each workshop is to be determined by the organizers, but it is expected that they will contain ample time for general discussion.

Following the theme of the 2010 IEEE 6th World Congress on Services, we are very happy to have the following workshops be part of the final program:

As evidenced by these titles, the workshops that supplement SERVICES 2010 cover a broad spectrum of modern services, from theory exploration to methodology and application realization. We are deeply indebted to all of the workshop organizers and chairs for their hard work. We would also like to express our great appreciation to the authors, members of the Program Committees, and reviewers. Without their volunteer work, these workshops would never get off the ground. Finally, we would like to thank Dr. Liang-Jie Zhang, Dr. Jia Zhang, and Dr. Patrick Hung for their great support, and the many other volunteers for their technical support.

Zhixiong Chen, Christian Huemer, and Shiyong Lu
Workshop Coordinating Co-Chairs
