# Table of Contents

## Foreword

## Conference Committee / Reviewers

## Analysis

- Analyzing Measurements of the R Statistical Open Source Software
  
  Sophia Voulgaropoulou, Georgios Spanos, and Lefteris Angelis

- A Comment Analysis Approach for Program Comprehension
  
  José Luís Freitas, Daniela da Cruz, and Pedro Rangel Henriques

- Investigating Automatic Static Analysis Results to Identify Quality Problems: An Inductive Study
  
  Antonio Vetro, Nico Zazworka, Forrest Shull, Carolyn Seaman, and Michele A. Shaw

## Design and Development

- Analysing Tactics in Architectural Patterns
  
  Alejandro Sanchez, Ademar Aguiar, Luis S. Barbosa, and Daniel Riesco

- Automotive System Development Using Reference Architectures
  
  Kenneth Lind and Rogardt Heldal

- Self-Definition for Software Development
  
  Barry Wilks and Paul Bailes

## Modeling and Testing

- Model-Driven Development of Secure Service Applications
  
  Marian Borek, Nina Moebius, Kurt Stenzel, and Wolfgang Reif

- Exploiting Ecore’s Reflexivity for Bootstrapping Domain-Specific Code-Generators
  
  Sven Jörges and Bernhard Steffen

- Partial Slices in Program Testing
  
  Anupama Surendran and Philip Samuel
Formality

Dogfooding the Formal Semantics of mCRL2 .................................................................90
  F.P.M. Stappers, M.A. Reniers, S. Weber, and J.F. Groote

Automating the Transformation from BPMN Models to CSP+T Specifications .....................100
  Manuel I. Capel and Luis E. Mendoza

A Timed CSP Model for the Time-Triggered Language Giotto ...........................................110
  Yanhong Huang, Yongxin Zhao, Shengchao Qin, Guanhua He, and João F. Ferreira

Incremental Development of Multi-agent Systems in Object-Z ...........................................120
  Graeme Smith and Kirsten Winter

Requirements and Development

An Approach to Requirement Analysis for Periodic Control Systems .....................................130
  Jianwen Li, Geguang Pu, Zheng Wang, Yuxiang Chen, Liyun Zhang, Yanxia Qi, and Bin Gu

A Patterns Based Reverse Engineering Approach for Java Source Code ................................140
  Rui Couto, António Nestor Ribeiro, and José Creissac Campos

Certification and Evaluation

  Barbara Gallina, Irfan Sljivo, and Omar Jaradat

An Evaluation of Service Integration Approaches of Business Process Management Systems ..........158
  Markus Doedt and Bernhard Steffen

An Empirical Study of License Violations in Open Source Projects ........................................168
  Arunesh Mathur, Harshal Choudhary, Priyank Vashist, William Thies, and Santhi Thilagam

Modeling and Short Presentations

Planning as Model Checking Tasks .........................................................................................177
  Yi Li, Jing Sun, Jin Song Dong, Yang Liu, and Jun Sun

A Comparative Analysis of Software Reliability Growth Models using Defects Data of Closed and Open Source Software .................................................................187
  Najeeb Ullah, Maurizio Morisio, and Antonio Vetro

Viewpoint-Based Risk Assessment and Prioritization .............................................................193
  Hareton K.N. Leung

Multi-agent Self-Organising Service Composition - Demonstrating the Restrictions of Centralised Approach ............................................................................................................198
  Petros Papadopoulos, Huaglory Tianfield, David Moffat, and Peter Barrie

Author Index ............................................................................................................................203
