Table of Contents

112A  Signal Processing II

112A-1  Forgetting Least Squares Estimation FIR Filters Without Noise Covariance Information........1
   *P. S. Kim (Seoul National University, Korea) and W. H. Kwon

112A-2  A Stability Condition and Steady State Errors of an Alpha-Beta-Gamma Filter for Radar Tracking .......................................................... 7
   *Y. Kosuge (Mitsubishi Electric Corporation, Japan), M. Ito, and T. Okada

112A-3  Real-Time Recognition of Road Traffic Sign in Moving Scene Image using New Image Filter ................................................................. 13
   T. Asakura (Fukui University, Japan), Y. Aoyagi, and *K. Hirose

112A-4  GMDH-Type Neural Networks with a Feedback Loop and their Application to the Identification of the Large-Spatial Air Pollution Patterns ........................................................................ 19
   *T. Kondo (University of Tokushima, Japan) and A. S. Pandya
   (Florida Atlantic University, USA)

112C  Signal Processing III

112C-1  Instantaneous Frequency Estimation from Sine Wave Samples ........................................ 25
   K. Kubo (Oyama National College of Technology, Japan)

112C-2  Bispectrum Analysis for Impact Sound of Composite Materials ..................................... 31
   *T. Ogawa (Takushoku University, Japan), H. Kanada, K. Mori, and M. Sakata

112C-3  A Frequency Model of OCXO for Holdover Mode of DP-PLL ...................................... 35
   *J. K. Hwang (Hankyong National University, Korea), D. H. Shin (Chongho Company, Korea),
   W. Han, and Y. K. Kim (Konkuk University, Korea)

112C-4  The Identification of Large-Scale Surface Low-Temperature Radiant Heating System ...... 41
   *L. Hach (Yamaguchi University, Japan), K. Hemzal (Czech Technical University at Prague, Czech Republic)

112D  Signal Processing IV

112D-1  Prediction Support System for Lightning Flash based on Case-Based Retrieval ............ 45
   *W. Kise (Mitsubishi Electric Corporation, Japan), M. Ito, A. Mitsuishi,
   Y. Kosuge, F. Asano, and S. Watanabe

112D-2  A Gatesize Computing Method in Target Tracking .......................................................... 49
   *T. Matsuzaki (Mitsubishi Electric Corporation, Japan), H. Kameda,
   S. Tsujimichi, and Y. Kosuge

112D-3  A Comparison of Multiple Model Filters for Maneuvering Target Tracking .............. 55
   *H. Kameda (Mitsubishi Electric Corporation, Japan), S. Tsujimichi, Y. Kosuge

112D-4  Estimation Characteristics of Tracking Filters According to Maneuvering Patterns ........ 61
   *T. H. Fang (Pusan National University, Korea) and J. W. Choi
113A Control Design I

113A-1 Amplitude Dependent Analysis and Design of Nonlinear Control Systems in a Frequency Domain ................................................................. 67
*Y. Okuyama (Tottori University) and F. Takemori

113A-2 Development of Adequate Formalisms for Verification of IEC 1499 Distributed Applications ........................................................................ 73
*V. Vyatkin (Martin Luther University, Germany), H. -M. Hanisch

113A-3 Simple Robust Tracking Controller for Rigid Link Flexible Joint Robots using Only Joint Position and Velocity Measurements ................................................. 79
M. Oya (Kyushu Institute of Technology, Japan) and *M. Wada

113A-4 Overlapping Decentralized EA Control Design for an Active Suspension System of a Full Car Model................................................................. 85
*Y. H. Jung (Pusan National University, Korea), J. W. Choi, and Y. B. Seo

113C Control Design II

113C-1 Modeling Technology for (T, p)-Rho Table in Mass Flow-Meter .................................................. 91
*J. -G. Han (Beijing University of Chemical Technology, China), Y. -H. Wu, and J. -X. Liu

113C-2 Implementation of a Three-Level Inverter Controlling an Induction Motor ............................................ 95
*M. A. El-Bakry (Electronics Research Institute, Egypt), S. H. Arafh, S. E. E. Abo-Shady (Cairo University, Egypt), and A. A. Mahfuz

113C-3 Control Method of Linear Motor Drive Table using Observer for the Vibration Repression ................................................................. 101
*H. Miyagawa (Yaskawa Electric Corporation), A. Yamamoto, S. Futami, T. Sumimoto, S. Goto (Saga University), and M. Nakamura

113C-4 Parametric Uncertainty in Controlling the Vibration of a Building ................................................................. 107
*S. J. Kim (Pusan National University, Korea), J. W. Choi

113D Control Design III

113D-1 Mixed H₂/H∞ Control of Time-Varying Delay Systems ................................................................. 113
J. H. Kim (Osaka University, Japan)

113D-2 Stability of Intervalwise Receding Horizon Controls for Linear Continuous Time-Varying Systems ................................................................. 119
*K. B. Kim (Korea University, Korea) and W. H. Kwon (Seoul National University, Korea)

113D-3 A Decoupling Method of Separable-Denominator Two-Dimensional Systems ............................................ 125
A. Kawakami (Kanazawa Institute of Technology, Japan)

113D-4 Robust Stabilization of Uncertain Delayed Systems: Application to Model-Following Systems ................................................................. 129
*K. Uahchinkul (King Mongkut's Institute of Technology, Thailand), J. Ngamwiwit, and S. Phoojaruenchanachai (National Electronics and Computer Technology Center, Thailand)
114A  Mechatro System I

114A-1 Numerical Simulations for 3D Robot Visions using Parallel Type Neural Network System................................................................. 135
*K. Mitukawa (Kinki University, Japan), N. Kyura, and H. Gotanda

114A-2 Robot Manipulator Control using Recursive Torque Methods ................................................................. 139
*D. W. Shin (Pusan National University, Korea), H. Y. Kim, J. H. Ha, J. S. Kim, and J. S. Park

114A-3 Tension Control of Wire Suspended Mechanism and Application to Bathroom Cleaning Robot................................................................. 143
Y. Takahashi (Kanagawa Institute of Technology, Japan) and *O. Tsubouchi

114A-4 Evolutionary Structured RBF Neural Network Based Control of a Seven-Link Redundant Manipulator .................................................. 148
*T. Nanayakkara (Saga University, Japan), K. Watanabe, K. Kiguchi, and K. Izumi

114C  Mechatro System II

114C-1 Posture Control of Moving Object using Two Mechanical Artificial Feelers ................. 154
Y. Takahashi (Kanagawa Institute of Technology) and *K. Umehara

114C-2 Analysis of a Separately Excited DC Motor Fed by a PWM Converter with a Freewheeling Diode .............................................not available
*E. H. A. Maamoun (Electronics Research Institute, Egypt) and A. F. Kheireldin
(Ain Shams University, Egypt)

114C-3 IP Self Tuning Controller for Induction Motor .................................................................not available
*F. A. Mohamed (Omar Al-Muktar University, Libya) and S. Yaacob
(Univerisiti Malaysia Sabah, Malaysia)

114C-4 Robust Fuzzy Sliding Mode Controller Design for DC Motor with Experimental Implementation .................................................. 159
*M. S. A. Moteleb (Electronics Research Institute, Egypt) and A. A. Ibraheem

114D  Mechatro System III

114D-1 Collision Avoidance Controller for AUV Systems using Stochastic Real Value Reinforcement Learning Method................................................................. 165
*H. Sayyaadi (University of Tokyo, Japan), T. Ura, and T. Fuji

114D-2 A Study on Distributed SMA-Net Robot Control by Coupled Oscillator System............ 171
*Y. Sato (Hokkaido University, Japan), T. Nagai, H. Yokoi, T. Mizuno
(National Institute of Bioscience and Human Technology, Japan), and Y. Kakazu (Hokkaido University, Japan)

114D-3 Going Out Experience Robot for Bedridden People by Remote Control System ............ 175
Y. Takahashi (Kanagawa Institute of Technology, Japan) and *T. Yatsumonji

114D-4 Teaching System for a Polishing Robot using a Game Joystick .......................................... 179
*F. Nagata (Fukuoka Industrial Technology Center, Japan) and K. Watanabe
(Saga University, Japan)
### 212A Bio-System

**212A-1** The Study of Normality of Behavioral Language: Courtship Behavior of Threespine Sticklebacks (*Gasterosteus Aculeatus*)

*M. Ishikawa (Kobe University, Japan) and Y. Gunji*

**not available**

**212A-2** The Notion of Animals' Local Selectivity Choice from an Exterior of Mechanical Framework

*S. Nomura (Kobe University, Japan) and Y. Gunji (Kobe University, Japan)*

**185**

**212A-3** A Study on Adaptation Mechanism of *Physarum* based on Chemo-Mechanical System

*T. Akahane (Tokyo Institute of Technology, Japan), M. Kato, and Y. Miyake*

**191**

**212A-4** Modulation of Intracellular Rhythm and Behavior of *Physarum Plasmodium* under the Condition of Mutual Entrainment

*J. Tanaka (Tokyo Institute of Technology) and Y. Miyake*

**197**

### 213A Control Design IV

**213A-1** Fuzzy Control System for a Multivariable Process and Its Performance Evaluation

*S. Kher (Shri. G. S. Institute of Tech. & Science, India), S. Sarvanan, and P. K. Chande (Mahindra Institute of Software Engineering & Management, India)*

**203**

**213A-2** Distal Supervised Learning Control and Its Application to CSTR Systems

*D. Yang (Zhejiang University of Technology, China), J. Jiang, and Y. Yamane (Ashikaga Institute of Technology)*

**209**

**213A-3** Multi-sensor Data Fusion and Its Application to Industrial Control

*D. Yang (Zhejiang University of Technology, China) and Y. Yamane (Ashikaga Institute of Technology)*

**215**

**213A-4** An Efficient Algorithm for Control Action Sequence in FMS using Dynamic Programming

*J. W. Choi (Pusan National University, Korea) and J. W. Choi*

**221**

### 214A Control Application

**214A-1** QLQG/LTR Control of a Parallel Inverted Pendulums

*D. S. Hong (Pusan National University, Korea), S. S. Jung, J. H. Jeong, J. S. Kim, and S. Han (Suncheon First College, Korea)*

**225**

**214A-2** Development of an Asymmetric Servovalve with Even Underlaps or Uneven Underlaps

*Y. B. Yin (Saitama University), K. Araki, and T. Mizuno*

**229**

**214A-3** Measurement Time-Delay Error Compensation for Transfer Alignment

*Y. Lim (Chungnam National University, Korea), T. Song, and J. Lyou*

**not available**

**214A-4** Attitude Controller Design for a Launch Vehicle with Fuel-Slosh

*D. H. Kim (Pusan National University, Korea) and J. W. Choi*

**235**

### 312A Sensor

**312A-1** Multi-layer Sensing Approach for Environmental Perception via a Multi-functional Sensor

**241**
312A-2 A Practical Tracking Algorithm of Multisensor Data Fusion ................................. 247
*J. Sun (Saga University, Japan) and K. Shida

312A-3 Performance Estimation of Track-Initiation Method with the Measurements of Infrared
Sensors by using MHT Techniques ................................................................. 251
*F. Fukushima (Mitsubishi Electric Corporation, Japan), M. Ito, S. Tsujimichi,
and Y. Kosuge

312A-4 Optical Chloride Film Detector Against Dioxins ............................................... 255
T. Moriyama (Tokushima Bunri University, Japan), *M. Uehira
(DoCoMo Engineering Shikoku, Inc., Japan), S. Sugihara
(Tokushima Bunri University, Japan), and T. Yoshida

312C Modeling and Simulation

312C-1 Object Oriented AGVS Modeling with UML ...................................................... 261
*R. Xu (Shanghai Jiao Tong University, China), M. Zako (Osaka University,
Japan), and H. Zhang (Shanghai Jiao Tong University, China)

312C-2 Design and Implementation of Parallel and Distributed Wargame Simulation System... 265
*A. Ozaki (Mitsubishi Electric Corporation, Japan), M. Furuichi, K. Takahashi,
and H. Matsukawa

312C-3 Studying Organizational Hierarchy with Asynchronous Cellular Automata...........not available
*H. Miwa (Tokyo Institute of Technology, Japan) and Y. Miyake

312C-4 Research on Auto-Identification and Ordering of Chromosome
Microscopic Image............................................................................................ not available
*S. Xiao (Tianjin University, China), S. Fan, Y. Li, and Y. Zhao

313A Intelligent System

313A-1 Multi-agent Based Auction Server for Large-Scaled Electronic Commerce............. 271
T. Kaihara (University of Marketing and Distribution Sciences, Japan)

313A-2 GMDH-Type Neural Networks with Radial Basis Functions and Their Application to
the Medical Image Recognition of the Brain...................................................... 277
*T. Kondo (University of Tokushima, Japan) and A. S. Pandya
(Florida Atlantic University, USA)

313A-3 Occurrence of Zipf's Law of Transition in the Processes of Learning the Language .... 283
N. Kitabayashi (RIKEN Brain Science Institute, Japan)

313A-4 Speech Based File Lock: A Design Approach...................................................... 287
*P. Bajaj (G. H. Raisoni College of Engineering, India) and A. Mandlekar

313C Transportation Systems

313C-1 Multisensor Vehicle Tracking Method for Intelligent Highway System............... 291
*T. Okada (Mitsubishi Electric Corporation, Japan), S. Tsujimichi and
Y. Kosuge
313C-2  The Planning of Solution to Istanbul's Transportation Problem with the Coordination of Transportation Subsystems by the Aid of GPS................................................................. 297
A. Demirbilek (Turkish State Railways, Turkey) and *H. Pastaci
(Yildiz Technical University, Turkey)

313C-4  Signal Control of Two-Way Traffic Arterials ................................................................. 301
*H. Shimizu (Fukuyama University, Japan) and H. Mashiba

314A  Industrial Application

314A-1  ANN (Artificial Neural Network) Drive Controller of Space Vector Modulation
Increasing the Performance of the Induction Motor and Ensuring Harmonic Reduction........ 307
*K. Gulez (Tokyo Metropolitan Institute of Technology, Japan), H. Watanabe,
F. Harashima, K. Onishi (Keio University, Japan), and H. Pastaci
(Yildiz Technical University, Turkey)

314A-2  Assembly Sequence Planning for a Chip Mounter using Transportation Algorithm......... 313
*T. -H. Park (Chungbuk National University, Korea) and C. -H. Kim

314A-3  Real-Time Extension for Windows NT/CE Used for Control Systems .............................. 319
*I. Kawakami (Mitsubishi Electric Corporation, Japan), Y. Nimura, and
K. Hamada

314A-4  Measuring Particle Size Using Light Diffraction and Hopfield Neural Network....not available
*B. H. Nam (Kangwon National University, Korea), H. N. Lee, T. Yu
(Korea Institute of Industrial Technology, Korea), B. Bang, G. Jee (Konkuk University, Korea), and Y. H. Kim (Samyang Electric-Telecom, Korea)

Author Index........................................................................................................................................... follows page 324
