Message from CoMI Workshop Chairs

Workshop on Colour and Multispectral Imaging

For the fourth year now, the COMI workshop is hosted by the SITIS conference. This year we selected interesting and original papers on color image processing and multispectral image applications.

We would like to give some special thanks to the authors who entrusted us with their work. We also would like to thank the program committee members for accepting using their time in reviewing papers and for their suggestions and remarks. We appreciated that we could have adequate experts to review each paper.

We would like to give a special acknowledgement to the SITIS conference board for letting us use its facilities, structures and to kindly host this workshop.

October, 2014
