SOCA 2015 Keynotes

KASTLES 2015 Workshop Keynotes

SOCA Keynote Paper
Elastic Inter-organizational Processes: Maintainability, Correctness, and Reliability

Schahram Dustdar

SOCA Session 1 - Service Selection and Discovery
User's Social Profile – Based Web Services Discovery

Ahlem Kalaï, Corinne Amel Zayani, and Ikram Amous

On Replacement Service Selection in WS-BPEL Scenario Adaptation

Dionisis Margaris, Panagiotis Georgiadis, and Costas Vassilakis

SkyAP-S3: A Hybrid Approach for Efficient Skyline Services Selection

Abdelaziz Ouadah, Karim Benouaret, Allel Hadjali, and Fahima Nader
SOCA Session 2 - Platforms and Architectures

i2x: An Automated Real-Time Integration and Interoperability Platform (Short Paper) .................................................................26
  Pedro Lopes, Luís Bastião, and José Luís Oliveira

Autonomous Full-Mesh Network for Large-Scale Outdoor Sensing (Short Paper) .................................................................31
  Takanobu Otsuka, Yoshitaka Torii, and Takayuki Ito

Simulating the Interaction with a Smart Grid with Real Services (Short Paper) .................................................................36
  Rudy Schoenmaker and Giuliano Andrea Pagani

A Partial Workload Offloading Framework in a Mobile Cloud Computing Context .................................................................43
  Olivier Valery, Ju-Cheng Chou, Yulin Tsao, Pangfeng Liu, and Jan-Jan Wu

SOCA Session 3 - Adaptive Processes and Services

Enabling Reusable and Adaptive Modeling, Provisioning & Execution of BPEL Processes .................................................................51
  Santiago Gómez Sáez, Vasilios Andrikopoulos, Michael Hahn,
  Dimka Karastoyanova, and Andreas Weiß

Automated Process Adaptation in Cyber-Physical Domains with the SmartPM System (Short Paper) .....................................................59
  Andrea Marrella, Massimo Mecella, Patris Halapuu, and Sebastian Sardina

Supporting Service Adaptation in Fault Tolerant Internet of Things .................................................................65
  Sen Zhou, Kwei-Jay Lin, Jun Na, Ching-Chi Chuang, and Chi-Sheng Shih

SOCA Session 4 - Semantic Approaches to SOCA

A Three-Level Semantic Categorization Scheme of Web Services (Short Paper) .................................................................73
  Konstantinos M. Giannoutakis, Dionysios D. Kehagias, and Dimitrios Tzovaras

A Referable Semantic Entity Model for Resource-Oriented Service Management (Invited Paper) .....................................................78
  Yiping Gu, Hongming Cai, Lihong Jiang, Yizhi Gu, Cheng Xie, and Kuo-Ming Chao

AWS-Ont: An Ontology for the Self-Management of Service-Based Systems .................................................................85
  Haithem Mezni and Mokhtar Sellami
SOCA Session 5 - Service Composition and Business Processes

Putting Together Skyline and Agent Paradigms to Enhancing Web Service Composition .................................................................93

Abdellah Kouider El Ouahed, Allel Hadjali, and Hamid Azzoune

Service Composition with PDDL Representations and Visualization over Videogame Engines (Short Paper) ......................................................101

Giuseppe de Giacomo, Valsamis Ntouskos, Fabio Patrizi, Stavros Vassos, and Davide Aversa

Design-Time Compliance of Service Compositions in Dynamic Service Environments ..............................................................108

Heerko Groefsema and Nick van Beest

Data in Business Process Models, A Preliminary Empirical Study (Short Paper) ..................................................................................116

Andrea Marrella, Massimo Mecella, Alessandro Russo, Sebastian Steinau, Kevin Andrews, and Manfred Reichert

SOCA Session 6 - Smart Environments, Government and Applications

Event-Based Monitoring of Service-Oriented Smart Spaces (Invited Paper) .................................................................123

Luciano Baresi and Sam Guinea

A Service-Oriented Architecture for Web Applications in e-Mental Health: Two Case Studies ........................................................131

Frank J. Blaauw and Ando Emerencia

Efficiency vs Efficacy Driven Service Portfolio Management in a Public Administration (Invited Paper) .................................139

Marco Comerio and Carlo Batini

SmartSociety – A Platform for Collaborative People-Machine Computation ..............................................................147

Ognjen Scekic, Daniele Miorandi, Tommaso Schiavinotto, Dimitrios I. Diochnos, Alethia Hume, Ronald Chenu-Abente, Hong-Linh Truong, Michael Rovatsos, Iacopo Carreras, Schahram Dustdar, and Fausto Giunchiglia

SOCA Session 7 - Cloud Computing and Big Data I

A Task Decomposition Framework for Surveying the Crowd Contextual Insights .................................................................155

Mohammad Allahbakhsh, Saeed Arbabi, Masoud Shirazi, and Hamid-Reza Motahari-Nezhad

Informed Schema Design for Column Store-Based Database Services ..............................................................163

David Bermbach, Steffen Müller, Jacob Eberhardt, and Stefan Tai
SOCA Session 8 - Service Engineering and Design I

Building Models of Computation of Service-Oriented Software via Monitoring
Performance Indicators (Short Paper) ..........................................................173

_Dionysis Athanasopoulos and Barbara Pernici_

Model-Driven Consistency Verification for Service-Oriented Applications ................................180

_Fadwa Rekik, Bouthaina Bannour, Saadia Dhouib, and Sébastien Gérard_

SOCA Session 9 - Cloud Computing and Big Data II

Automated Deployment and Parallel Execution of Legacy Applications
in Cloud Environments (Short Paper) ........................................................................188

_Michael Götsche, Fabian Glaser, Steffen Herbold, and Jens Grabowski_

Business Process Design by Reusing Business Process Fragments from
the Cloud ..................................................................................................................193

_Amina Ahmed Nacer, Elio Goettelmann, Samir Youcef, Abdelkamel Tari,
and Claude Godart_

Opacity in Internet of Things with Cloud Computing (Short Paper) ................................201

_Wen Zeng, Maciej Koutny, and Paul Watson_

SOCA Session 10 - Service Engineering and Design II

Multi-objective Service Similarity Metrics for More Effective Service
Engineering Methods (Short Paper) .........................................................................208

_Dionysis Athanasopoulos and Apostolos V. Zarras_

Extending SOSJ Framework for Reliable Dynamic Service-Oriented Systems
(Short Paper) .............................................................................................................213

_Udayanto Dwi Atmojo, Zoran Salcic, and Kevin I-Kai Wang_

An Approach for SOA Design Patterns Composition .............................................219

_Imen Tounsi, Mohamed Hadj Kacem, Ahmed Hadj Kacem, and Khalil Drira_

KASTLES Workshop - Session I

Driver Behavior Model Based on Ontology for Intelligent Transportation
Systems .....................................................................................................................227

_Susel Fernandez and Takayuki Ito_

TKI Adaptation Strategy for Complex Multi-times Bilateral Negotiations ..................232

_Katsuhide Fujita_
KASTLES Workshop - Session II

Accuracy Verification of Event Data of Scheduling Support System for Agent-Based Simulator .........................................................237
   Ryo Kanamori, Satoshi Takahira, and Takayuki Ito

A High-Speed Sensor Resources Allocation Method for Distributed WSN .........................................................242
   Takanobu Otsuka, Takuma Inamoto, Yoshitaka Torii, and Takayuki Ito

Applying an Unified Access Control for IoT-based Intelligent Agent Systems .................................................247
   Diego Rivera, Luis Cruz-Piris, German Lopez-Civera, Enrique de la Hoz,
   and Ivan Marsa-Maestre

PhD Symposium Session

On the Detection of Information Pollution and Violation of Copyrights in the Social Web .................................................................252
   Mohamed Jehad Baeth and Mehmet Aktas

Advanced Analysis of Service Level Agreements ..................................................................................................................255
   Antonio Manuel Gutierrez Fernandez

Author Index ...........................................................................................................................................................................259
