Frontmatter
Message from the Chairs .............................................................. iii

Specification and Requirement Analysis
Mining Temporal Intervals from Real-Time System Traces
Sean Kauffman and Sebastian Fischmeister — University of Waterloo, Canada ........................................ 1

Mining Specifications using Nested Words
Apurva Narayan, Nirmal Benann, and Sebastian Fischmeister — University of Waterloo, Canada .............. 9

Eliciting Big Data Requirement from Big Data Itself: A Task-Directed Approach
Peng Wang, Ke Tao, Chenxu Gao, Xi Ning, Shuang Gu, and Bo Deng — Tsinghua University, China; Beijing Institute of System Engineering, China; Institute of Electronics at Chinese Academy of Sciences, China ......................... 17

Task Routing
A Hybrid Approach to Code Reviewer Recommendation with Collaborative Filtering
Zhenglin Xia, Hailong Sun, Jing Jiang, Xu Wang, and Xudong Liu — Beihang University, China .................. 24

Competition-Aware Task Routing for Contest Based Crowdsourced Software Development
Yang Fu, Hailong Sun, and Luting Ye — Beihang University, China ......................................................... 32

Code Inspection and Refactoring
Evaluating Micro Patterns and Software Metrics in Vulnerability Prediction
Kazi Zakia Sultana and Byron J. Williams — Mississippi State University, USA ........................................ 40

A Code Inspection Tool by Mining Recurring Changes in Evolving Software
Alex Fish, Thuy Linh Nguyen, and Myoungkyu Song — University of Nebraska at Omaha, USA ............. 48

Data-Driven Usability Refactoring: Tools and Challenges
Alejandra Garrido, Sergio Firmenich, Julián Grigera, and Gustavo Rossi — Universidad Nacional de La Plata, Argentina; CONICET, Argentina; CIC, Argentina .......................................................... 52
