Ninth IEEE International Symposium on Service-Oriented System
Engineering—SOSE 2015

Session 1: Business Process Integration, Alignment, and Management
in SOAs

On the Measurement of Design-Time Adaptability for Process-Based Systems ........................................1
  Jörg Lenhard, Matthias Geiger, and Guido Wirtz

Application of Sub-Graph Isomorphism to Extract Reoccurring Structures from BPMN
2.0 Process Models .................................................................................................................................11
  Mariianna Skouradaki, Katharina Göerlach, Michael Hahn, and Frank Leymann

BPMN Conformance in Open Source Engines ......................................................................................21
  Matthias Geiger, Simon Harrer, Jörg Lenhard, Mathias Casar, Andreas Vorndran,
  and Guido Wirtz
Improving the Static Analysis Conformance of BPEL Engines with BPELlint .................................................................31

Simon Harrer, Matthias Geiger, Christian R. Preißinger, David Bimamisa, Stephan J.A. Schuberth, and Guido Wirtz

Session 2: Service Interoperability, Composability, Quality, Reliability

Modelling and Analysing Provenance Awareness Infrastructure for SOC systems .................................................................40
Paraskevi Zerva, Steffen Zschaler, and Simon Miles

Optimizing Service Protection with Model Driven Security@run.time .................................................................50
Wendpanga Francis Ouedraogo, Frédérique Biennier, and Philippe Merle

Relative QoS: A New Concept for Cloud Service Quality ............................................................................................59
Gustavo Alves, Caio Silva, Everton Cavalcante, Thais Batista, and Frederico Lopes

End-to-End Performance Prediction for Selecting Cloud Services Solutions .................................................................69
Raed Karim, Chen Ding, and Ali Miri

Session 3: Cyber-Physical Systems and Social Networking Systems

LEONORE—Large-Scale Provisioning of Resource-Constrained IoT Deployments .................................................................78
Michael Vögl er, Johannes Schleicher, Christian Inzinger, Stefan Nastic, Sanjin Sehic, and Schahram Dustdar

Personal Mobility Service System in Urban Areas: The IRMA Project ........................................................................88
Gianmario Motta, Daniele Sacco, Tianyi Ma, Linlin You, and Kaixu Liu

Sensor Data Propagation in Mobile Hosting Networks .................................................................................................98
Richard K. Lomotey and Ralph Deters

Automatic Knowledge Sharing Across Communities: A Case Study on Android Issue Tracker and Stack Overflow .................................................................................................107
Tao Wang, Gang Yin, Huaimin Wang, Cheng Yang, and Peng Zou

Session 4: Semantic-Enabled Process and SOC System and Engineering

Linking Quality of Service and Experience in Distributed Multimedia Systems Using PROV Semantics .................................................................117
Stephen C. Phillips, Maxim Bashevoy, Michael Boniface, Simon Crowle, Vegard Engen, Zipani Sinkala, and Stefanie Wiegand

A Reusable Software Component for Integrated Syntax and Semantic Validation for Services Computing .................................................................127
Lixin Tao, Steven Golikov, Keke Gai, and Meikang Qiu

A Flexible Engine for the Unified Execution of Service Compositions ................................................................................133
Katharina Görllach and Frank Leymann

Session 5: Testing on-the-Fly and Policy Enforcement

Automated Testing of Web Services Based on Algebraic Specifications ........................................................................143
Dongmei Liu, Yuxin Liu, Xin Zhang, Hong Zhu, and Ian Bayley
A Service Framework for Parallel Test Execution on a Developer’s Local Development Workstation
Mazedur Rahman, Zehua Chen, and Jerry Gao

Integrating Fault-Tolerance Method into Service-Oriented Computing
Amal Alhosban, Khayyam Hashmi, Zaki Malik, and Brahim Medjahed

Integrated Adaptive Reasoning Testing Framework with Automated Fault Detection
Wei-Tek Tsai and Guanqiu Qi

Session 6: SOSE Short Papers

Compatibility Testing Service for Mobile Applications
Tao Zhang, Jerry Gao, Jing Cheng, and Tadahiro Uehara

JENERGY: A Fault Tolerant Stateless Architecture for High Performance Computing
Moussa Taifi, Justin Y. Shi, and Yasin Celik

Reconciling Service Orientation with the Cloud
Valentino Baraldo, Alberto Zuccato, and Tullio Vardanega

Enriching Specifications to Represent Quality in Web Services in a Comprehensive Way
Davide Tosi, Luigi Lavazza, and Sandro Morasca

An Adaptive Resource Allocation Algorithm for Partitioned Services in Mobile Cloud Computing
Yanchen Liu and Myung J. Lee

Internet-Based Virtual Computing Environment—iVCE 2015 Workshop

Session A: Cloud Computing Models and Architectures

Multi-resource Packing for Job Scheduling in Virtual Machine Based Cloud Environment
Daochao Huang, Peng Du, Chunge Zhu, Hong Zhang, and Xinran Liu

A Cloud-Based Sustainable Business Model for Effective ICT Provision in Higher Education
Fang Tao, John Panneerselvam, Thomas Holding, and Lu Liu

Modeling for I/O Intensive Applications in Cloud Computing
Junjie Peng, Yi Rao, Yongchuan Dai, and Xiaofei Zhi

Session B: Visualization

Design, Implementation and Evaluation of an Application-Layer Virtualized Network
Yiming Zhang, Dongsheng Li, Yijie Wang, Zhigang Sun, Feng Zhao, and Jinshu Su

Cocktail: A New Tool for Audit by Performance Evaluation on Local Machine
Junwu Guo, Zhigang Zhou, and Hongli Zhang

A Scheduling Framework for Periodic Tasks in Geo-Distributed Data Centers
Yan Li, Hong Zhang, Yong Wang, Xinran Liu, and Peng Zhang
Session C: Cloud Computing Technologies
Performance Difference Prediction in Cloud Services for SLA-Based Auditing ................................................................. 253
   Hongli Zhang, Panpan Li, and Zhigang Zhou
A Lightweight Encryption and Secure Protocol for Smartphone Cloud ................................................................. 259
   William Zegers, Sang-Yoon Chang, Youngho Park, and Jerry Gao
Expressing and Composing Actors for Deterministic and Scalable Programming
in Cloud ....................................................................................................................................................................... 267
   Kang Lianghuan, Zhan Hanglong, and Cao Donggang

Session D: Applications
Yadoop: An Elastic Resource Management Solution of YARN .......................................................................................... 276
   Ying Zhao and Gang Wu
AR-Tracker: Track the Dynamics of Mobile Apps via User Review Mining ................................................................. 284
   Cuiyun Gao, Hui Xu, Junjie Hu, and Yangfan Zhou
Dependability Issues of Android Games: A First Look via Software Analysis ............................................................. 291
   Jiaojiao Fu, Yangfan Zhang, and Yu Kang
Military Training Game Requirement Description Framework Based on Multi-views .................................................... 297
   Yang Nan, Mu Xiaodong, Zhang Qinghui, Guo Yi, and Song Wei

The First International Workshop on Mobile Cloud TaaS—MCTaaS 2015 Workshop

Session 1: Mobile Testing Models and Methods
Mobile Compatibility Testing Using Multi-objective Genetic Algorithm ........................................................................ 302
   Jing Cheng, Yian Zhu, Tao Zhang, Chuanxi Zhu, and Wenqiang Zhou
Testing Location-Based Function Services for Mobile Applications ........................................................................ 308
   Oum-El-Kheir Aktouf, Tao Zhang, Jerry Gao, and Tadahiro Uehara

Session 2: Mobile Testing and TaaS, Framework, Architectures
Mobile Functional Test on TaaS Environment .............................................................................................................. 315
   Shenbin Zhang and Bingfeng Pi
A Reusable Automated Acceptance Testing Architecture for Microservices
in Behavior-Driven Development ................................................................................................................................. 321
   Mazedur Rahman and Jerry Gao
A Model-Based Framework to Support Complexity Analysis Service for Regression
Testing of Component-Based Software ........................................................................................................................... 326
   Chuanqi Tao, Jerry Gao, and Bixin Li
International Symposium on Software Crowdsourcing—ISSC 2015 Symposium

Session 1: Models and Methods in Software Crowdsourcing

A Truthful Online Auction for Tempo-spatial Crowdsourcing Tasks .................................................................................................................. 332
  Yue Fan, Hailong Sun, Yanmin Zhu, Xudong Liu, and Ji Yuan

Game Theoretic Analysis for Offense-Defense Challenges of Algorithm Contests on TopCoder .................................................................................................................................................................. 339
  Zhenghui Hu and Wenjun Wu

Developer Recommendation for Crowdsourced Software Development Tasks .................................................................................................................. 347
  Ke Mao, Ye Yang, Qing Wang, Yue Jia, and Mark Harman

Session 2: Crowdsourcing for Learning and Big Data

An Evaluation Framework for Extreme Learning Process (XLP) ................................................................................................................................................. 357
  Wei-Tek Tsai, Kubatbek Alimbekov, and Benjamin Hsueh-Yung Koo

OSSEAN: Mining Crowd Wisdom in Open Source Communities ......................................................................................................................... 367
  Gang Yin, Tao Wang, Huaimin Wang, Qiang Fan, Yang Zhang, Yue Yu, and Cheng Yang

Towards an Effective Crowdsourcing Recommendation System: A Survey of the State-of-the-Art .................................................................................................................................................................. 372
  Eman Aldhahri, Vivek Shandilya, and Sajjan Shiva

Crowdsourcing as a Method for the Collection of Revealed Preferences Data .................................................................................................................. 378
  Behrang Assemi, Daniel Schlagwein, Hamid Safi, and Mahmoud Mesbah

Author Index ........................................................................................................................................................................ 383
