2016 IEEE Symposium
on Service-Oriented System
Engineering
SOSE 2016
Table of Contents

Message from SOSE 2016 Conference Chairs ................................................................. xi
Message from EC 2016 Workshop Chairs ........................................................................ xiii
SOSE 2016 Conference Organization ............................................................................... xiv
SOSE 2016 Program Committee ....................................................................................... xv
EC 2016 Workshop Organization ..................................................................................... xvii
ISCC 2016 Workshop Organization ................................................................................... xviii
ISSC 2016 Workshop Organization ................................................................................... xx

SOSE 2016 Keynotes
Building Blocks of the Internet of Things ............................................................................ 1
Jeffrey Voas
Dependable and Resilient Cloud Computing ...................................................................... 3
M. Albanese, S. Jajodia, R. Jhawa, and Vincenzo Pluri

Web Services
DB&A: An Open Source Web Service for Meter Data Management ........................................ 4
Søren Aagaard Mikkelsen, Rune Hylsberg Jacobsen, and Anders Franz Terkelsen
Model-Oriented Web Services ............................................................................................ 14
Thiago Gottardi and Rosana Teresinha Vaccare Braga
Monic Testing of Web Services Based on Algebraic Specifications ...................................... 24
Dongmei Liu, Xian Wu, Xin Zhang, Hong Zhu, and Ian Bayley
### Multimedia and Streaming Services

**Performance Evaluation of Information-Centric Networking for Multimedia Services** ................................................................. 146  
*Haozhe Wang, Geyong Min, Jia Hu, Wang Miao, and Nektarios Georgalas*

**High Performance Video Processing in Cloud Data Centres** ......................................................................................... 152  
*Muhammad Usman Yaseen, Muhammad Sarim Zafar, Ashiq Anjum, and Richard Hill*

**Non-intrusive Monitoring of Stream Processing Applications** .................................................................................... 162  
*Michael Vögler, Johannes M. Schleicher, Christian Inzinger, Bernhard Nickel, and Schahram Dustdar*

**Complex Event Detection in Video Streams** .................................................................................................................. 172  
*Jia Ke, Xiao-Jun Chen, Bao-Ding Chen, Hui Xu, Jian-Guo Zhang, Xiao-Ming Jiang, Man-Rong Wang, Xiao-Bo Chen, Qian-Qian Zhang, and Wen-Hong Cai*

### Mobile Services and Data Analysis

**Innovative Crowdsourcing Mobile App for Curriculum Design: Specification for a Prototype Mobile Application** ................................................................. 180  
*Yongjun Zheng and Joshua Dawson*

**Towards a Mobile Assistive System Using Service-Oriented Architecture** ................................................................. 187  
*Darpan Triboan, Liming Chen, and Feng Chen*

**Hypergraph Partitioning for Video Event Detection** ................................................................................................. 197  
*Xiao-Jun Chen, Bao-Ding Chen, Hui Xu, Jian-Guo Zhang, Jia Ke, Wen-Xin Wang, Xin-Ping Song, Xiao-Ming Jiang, Man-Rong Wang, Xiao-Bo Chen, Qian-Qian Zhang, and Wen-Hong Cai*

### Semantic Web Services

**May the Ontologies Be with You! Towards a User-Friendly Web-Based Editor for Semantic Web Service Description** ................................................................................. 203  
*Steven Blakowski and Philipp Brune*

**Evaluating the Ontological Semantic Description of Web Services Generated from Algebraic Specifications** ................................................................................................. 211  
*Dongmei Liu, Yunfei Yang, Ying Chen, Hong Zhu, Ian Bayley, and Arantza Aldea*
An Approach for QoS-aware Selection of Shared Services for Multiple Service Choreographies ........................................................................................................................................221
  Júnio C. Lima, Ricardo C. A. Rocha, and Fábio M. Costa

Short Papers

Service Oriented Interactive Media (SOIM) Engines Enabled by Optimized Resource Sharing .....................................................................................................................................231
  Mahy Aly, Michael Franke, Moritz Kretz, Folker Schamel, and Pieter Simoens

Service-Oriented Multi-tenancy (SO-MT): Enabling Multi-tenancy for Existing Service Composition Engines with Docker ......................................................................................238
  Gabriel Nikol, Michael Träger, Simon Harrer, and Guido Wirtz

Integrating Sensor Devices in a Service Oriented Framework: A Retail Environment Case Study ..........................................................................................................................244
  Mark Anderson and Joseph Bolton

International Symposium on Creative Computing (ISCC 2016)

Game and Animation

Content Analysis of Digital Games: From Cultivation Theory Perspective ..........................................................251
  Ji Soo Lim and Akira Baba

Dance of China: A User-Centred Design Case Study of a Novel Animated Music Video Production (AMV) ..........................................................................................................................256
  Tin-Kai Chen, Wei-Cheng Wang, Pei-Chen Chen, and Pin-Chen Kuo

Measuring Brain Signals to Evaluate the Role of Creativity in Interceptive Human Movement .........................................................................................................................260
  Devanka Pathak, Hongji Yang, Tin-Kai Chen, Jerry Fishenden, and Alison Lee

Creative Zombie Apocalypse: A Critique of Computer Creativity Evaluation .................................................................................................................................270
  Fania Raczinski and Dave Everitt

Performance Art and Design Issues

Modelling Performance: Generic Formal Processes in Live Digital Performance .................................................................................................................................277
  Ian Willcock

Interactive Music System Design for Acoustic Instrument and Live Electronic Performance .................................................................................................................................283
  Chien-Wen Cheng

Discussing the Influence of Aging on Taiwan’s Design Industry .................................................................................289
  Chao-Fu Yang and Chung-Shan Sun
New Space of Creative Computing I

Three Forms in One to Create Higher Vocational Education Art Talents
Training Space: Practical Exploration on the Organic Integration
of Professional Form, Teaching Form, Environment Form ..........................................................293

Wei Zhao

An Approach to Constructing a General Framework for Creative Computing:
Incorporating Semantic Web ....................................................................................................................297

Lu Zhang, Lin Zou, Delin Jing, and Hongji Yang

Mobile Application Software Defect Prediction .................................................................307

Michael Yoseph Ricky, Fredy Purnomo, and Budi Yulianto

New Space of Creative Computing II

Multi-floor Indoor Navigation with Geomagnetic Field Positioning and Ant
Colony Optimization Algorithm .................................................................................................................314

Kaixu Liu, Gianmario Motta, Tianyi Ma, and Tao Guo

The Method of Measurement and Control Systems Design and Validation
with Use of BRMS Systems ......................................................................................................................324

Piotr Zawistowski

Exploring the Development of Computer Drawing in Graphic Design from
a Technology Philosophy ..........................................................................................................................333

Chao-Fu Yang and Chung-Shan Sun

Second International Workshop on Education in the Cloud (EC 2016)

Education in the Cloud

Teaching Networks in the Cloud ................................................................................................................340

Augusto Ciuffoletti

A Practical Evaluation in Openstack Live Migration of VMs Using 10Gb/s Interfaces .................................................................346

Md Israfil Biswas, Gerard Parr, Sally McClean, Philip Morrow, and Bryan Scotney

Internet of Things Application Using Tethered MSP430 to Thingspeak Cloud ..............................................352

Ahmed I. Abdul-Rahman and Corey A. Graves

Microservices Architecture Based Cloudware Deployment Platform for Service Computing ..........................................................358

Dong Guo, Wei Wang, Guosun Zeng, and Zerong Wei
International Symposium on Software Crowdsourcing (ISSC 2016)

Software Crowdsourcing
A Systematic Literature Review of Crowdsourcing-Based Research in Information Security ................................................................. 364
Clemens Sauerwein, Matthias Gander, Michael Felderer, and Ruth Breu
Software Crowdsourcing Practices and Research Directions ................................................................. 372
Emese Bari, Matt Johnston, Wenjun Wu, and Wei-Tek Tsai
Crowdsourcing, Open-Sourcing, Outsourcing and Insourcing Software Development: A Comparative Analysis ................................................................. 380
Nitin Naik

Visionary Track Papers
Computing at Massive Scale: Scalability and Dependability Challenges ................................................................. 386
Renyu Yang and Jie Xu
Establishing Trust in the Emerging Era of IoT ......................................................................................... 398
Hiroyuki Sato, Atsushi Kanai, Shigeaki Tanimoto, and Toru Kobayashi
Creative Computing: An Approach to Knowledge Combination for Creativity? ................................................................. 407
Hongji Yang, Delin Jing, and Lu Zhang
A Self-Organized Architecture for Efficient Service Discovery in Future Peer-to-Peer Online Social Networks ................................................................. 415
Bo Yuan, Lu Liu, and Nick Antonopoulos
Trends and Directions in Cloud Service Selection ......................................................................................... 423
Mona Eisa, Muhammad Younas, Kashinath Basu, and Hong Zhu
Big Data Validation and Quality Assurance – Issues, Challenges, and Needs ................................................................. 433
Jerry Gao, Chunli Xie, and Chuanqi Tao
Rapid Service Composition Reasoning for Agile Cyber Physical Systems ................................................................. 442
I-Ling Yen, Wei Zhu, Farokh Bastani, Yongtao Huang, and Guang Zhou
A System View of Financial Blockchains ......................................................................................... 450
Wei-Tek Tsai, Robert Blower, Yan Zhu, and Lian Yu

Poster Paper
A Taxonomy to Characterize Web Service Discovery Approaches, Looking at Five Perspectives ................................................................. 458
Waeal J. Obidallah and Bijan Raahemi

Author Index ................................................................................................. 460
