2018 IEEE Symposium on Service-Oriented System Engineering

SOSE 2018

Table of Contents

Message from the General Chairs ........................................................................................................ ix
Message from the Technical Committee Co-Chairs ................................................................................ x
Technical Program Committee ................................................................................................................ xi
Message from the JCC 2018 Workshop Chairs ....................................................................................... xii
JCC 2018 Organizers ................................................................................................................................. xiii

2018 IEEE Symposium on Service-Oriented System Engineering

SOSE Session I

Evaluation of Server Push Technologies for Scalable Client-Server Communication ............................. 1
    Elton F. de Souza Soares (IBM Research), Raphael Melo Thiago (IBM Research), Leonardo Guerreiro Azevedo (IBM Research), Maximilien de Bayser (IBM Research), Viviane Torres da Silva (IBM Research), and Renato F. de G. Cerqueira (IBM Research)

Overcoming Security Challenges in Microservice Architectures .......................................................... 11
    Tetiana Yarygina (University of Bergen, Norway) and Anya Helene Bagge
    (University of Bergen, Norway)

An Approach to Extract the Architecture of Microservice-Based Software Systems ............................ 21
    Benjamin Mayer (Johannes Kepler University Linz) and Rainer Weinreich
    (Johannes Kepler University Linz)

SOSE Visionary Track I

MQTT-Driven Node Discovery for Integrated IoT-Fog Settings Revisited: The Impact of Advertiser Dynamicity ............................................................................................................................... 31
    Riccardo Venanzi (University of Ferrara, Italy), Burak Kantarci (University of Ottawa), Luca Foschini (University of Bologna, Italy), and Paolo Bellavista (University of Bologna, Italy)

Service-Oriented IoT Modeling and Its Deviation from Software Services ........................................ 40
    I-Ling I-Ling Yen (University of Texas at Dallas), Farokh Bastani (University of Texas at Dallas), Wei Zhu (University of Texas at Dallas), Hessam Moeini (University of Texas at Dallas), San-Yih Hwang (National Sun Yat-Sen University), and Yuqun Zhang (S. Univ. of Science and Technology)
Testing IoT Systems ................................................................. 48
  Jeff Voas (NIST), Rick Kuhn (NIST), and Phil Laplante (Penn State)

SOSE Session II

Semantic Integration of System Specifications to Support Different System Engineering Disciplines .......... 53
  Alexander Rauh (Westsächsische Hochschule Zwickau University of Applied Science), Wolfgang Golubski (Westsächsische Hochschule Zwickau University of Applied Science), and Stefan Queins (SOPHIST GmbH)

Comparing Imperative and Declarative Process Models with Flow Dependencies ........................................... 63
  Michaela Baumann (University of Bayreuth)

Supporting Coordination in Crowdsourced Software Testing Services .......................................................... 69
  Manar Alsayyari (King Saud University) and Sultan Alyahya (King Saud University)

SOSE Session III

VTDL: A Notation for Data Stream Processing Applications ................................................................. 76
  Christoph Hochreiter (TU Wien), Matteo Nardelli (University of Rome Tor Vergata), Bernhard Knasmueller (TU Wien), Stefan Schulte (TU Wien), and Schahram Dustdar (TU Wien)

A Data Distribution Service for Cloud and Containerized Storage Based on Information Dispersal .............. 86
  Pablo Morales-Ferreira (CINVESTAV-Tamaulipas), Miguel Santiago-Duran (CINVESTAV-Tamaulipas), Cristopher Gaytan-Diaz (CINVESTAV-Tamaulipas), J.L. Gonzalez-Compean (CINVESTAV-Tamaulipas), Victor J. Sosa-Sosa (CINVESTAV-Tamaulipas), and Ivan Lopez-Arevalo (CINVESTAV-Tamaulipas)

A Hybrid Approach for Predicting Aging-Related Failures of Software Systems .......................................... 96
  Jingwei Li (Xi’an Jiaotong University), Yong Qi (Xi’an Jiaotong University), and Lin Cai (Xi’an Jiaotong University)

An Ensemble Signature-Based Approach for Performance Diagnosis in Big Data Platform .............................. 106
  Hong Kou (China Electronics Standardization Institute) and Pengfei Chen (Sun Yat-sen University)

SOSE Visionary Track II

Detecting Present Events to Predict Future: Detection and Evolution of Events on Twitter .......................... 116
  Muhammad Ali (University of Derby, United Kingdom), Lu Liu (University of Derby, United Kingdom), and Mohsen Farid (University of Derby, United Kingdom)

Adaptive Policy Evaluation Framework for Flexible Service Provision ......................................................... 124
  Hiroyuki Sato (The University of Tokyo), Shigeaki Tanimoto (Chiba Institute of Technology), Toru Kobayashi (Nagasaki University), and Atsushi Kanai (Hosei University)

Intelligent Resource Scheduling at Scale: A Machine Learning Perspective .................................................. 132
  Renyu Yang (University of Leeds), Xue Ouyang (University of Leeds), Yaoqiang Chen (NUDT/University of Leeds), Paul Townend (Edgetic Limited), and Jie Xu (University of Leeds)
SOSE Visionary Track III

Traffic Differentiation on Internet of Things .............................................................. 142
Thiago Garrett (Federal University of Paraná), Schahram Dustdar (TU Wien), Luis C. E. Bona (Federal University of Paraná), and Elias P. Duarte Jr. (Federal University of Paraná)

If Docker is the Answer, What is the Question .............................................................. 152
Hong Zhu (Oxford Brookes University) and Ian Bayley (Oxford Brookes University)

Opportunities and Challenges Towards Cognitive IT Service Management in Real World .................. 164
Fan Jing Meng (IBM Research - China), Jingmin Xu (IBM Research - China), Xiao Zhang (IBM Research - China), Lin Yang (IBM Research - China), Pengfei Chen (IBM Research - China), Yuan Wang (IBM Research - China), Xiaoxi Liu (IBM Research - China), Naga Ayachitula (IBM Watson Research Center), Karin Murthy (IBM Watson Research Center), Larisa Shwartz (IBM Watson Research Center), George Galambos (IBM Global Technology Services), Zhuo Su (IBM Global Technology Services), and Jun Zheng (IBM Global Technology Services)

9th International Workshop on Joint Cloud Computing (JCC2018)

JCC Session I

Transaction-aware SSD Cache Allocation for the Virtualization Environment ........................................... 174
Zhen Tang (State Key Laboratory of Computer Science), Heng Wu (State Key Laboratory of Computer Science), Lei Sun (Tianjin Massive Data Processing Technology Laboratory), Zhongshan Ren (State Key Laboratory of Computer Science), Wei Wang (State Key Laboratory of Computer Science), Wei Zhou (KSYUN), and Liang Yang (KSYUN)

TZ-KMS: A Secure Key Management Service for Joint Cloud Computing with ARM TrustZone .................. 180
Shiyu Luo (Institute of Parallel and Distributed Systems (IPADS)), Zhichao Hua (Institute of Parallel and Distributed Systems (IPADS)), and Yunbin Xia (Institute of Parallel and Distributed Systems (IPADS))

Secure and Efficient In-Hypervisor Memory Introspection Using Nested Virtualization .......................... 186
Weiwen Tang (Shanghai Jiao Tong University) and Zeyu Mi (Shanghai Jiao Tong University)

JCC Session II

DwarfGC: A Space-Efficient and Crash-Consistent Garbage Collector in NVM for Cloud Computing .......... 192
Heting Li (Institute of Parallel and Distributed Systems (IPADS)) and Mingyu Wu (Institute of Parallel and Distributed Systems (IPADS))

Cuckoo Migration: Self Migration on JointCloud Using New Hardware Features .................................... 198
Ruifeng Liu (Shanghai Jiao Tong University) and Zeyu Mi (Shanghai Jiao Tong University)
JCC Session III

A Scalable Internet-of-Vehicles Service over Joint Clouds ........................................... 210
Yong Zhang (Beihang University), Mingming Zhang (Beihang University),
Tianyu Wo (Beihang University), Xuelian Lin (Beihang University),
Renyu Yang (Beihang University), and Jie Xu (University of Leeds)

IoT Service Based on JointCloud Blockchain: The Case Study of Smart Traveling .................. 216
Weili Chen (Sun Yat-sen University, China), Mingjie Ma (Sun Yat-sen
University, China), Yongjian Ye (Sun Yat-sen University, China), Zibin
Zheng (Sun Yat-sen University, China), and Yuren Zhou (Sun Yat-sen
University, China)

What Makes a Great Mobile App? A Quantitative Study Using a New Mobile Crawler .................. 222
Zexun Jiang (Research Institute of Information Technology), Ruifeng
Kuang (Beijing University of Posts and Telecommunications), Jiaying
Gong (Beijing University of Posts and Telecommunications), Hao Yin
(Research Institute of Information Technology), Yongqiang Lyu (Research
Institute of Information Technology), and Xu Zhang (School of
Electronic Science and Engineering)

HCFS2: A File Storage Service with Weak Consistency in the Hybrid Cloud .......................... 228
Jie Sun (Beihang University), Chunming Hu (Beihang University), Tianyu
Wo (Beihang University), Lele Du (Chinese Academy of Sciences), and
Song Yang (Beihang University)

JCC Session IV

A Case of Automatically Deploying and Scaling Out Distributed Systems on the Cloud from Scratch ........ 234
Yehong Zhong (Peking University), Junming Ma (Peking University), Bo
An (Peking University), and Donggang Cao (Peking University)

Comparing Container-Based Microservices and Workspace as a Service: Which One to Choose? .............. 240
Junming Ma (Peking University), Bo An (Peking University), Donggang
Cao (Peking University), and Xiangqun Chen (Peking University)

A Cluster Feature Based Approach for QoS Prediction in Web Service Recommendation .................. 246
Shulong Chen (National University of Defense Technology, China),
Yuxing Peng (National University of Defense Technology, China), Haibo
Mi (National University of Defense Technology, China), Changjian Wang
(National University of Defense Technology, China), and Zhen Huang
(National University of Defense Technology, China)

Author Index .............................................. 253
