### Session 1: Security

**PrEServD - Privacy Ensured Service Discovery in Mobile Peer-to-Peer Networks** .................................................................1
  *Santhosh Muthyapu, Sanjay Kumar Madria, and Mark Linderman*

**Securing Mobile Unattended WSNs against a Mobile Adversary** ..................................................................................11
  *Roberto Di Pietro, Gabriele Oligeri, Claudio Soriente, and Gene Tsudik*

**Attack Injection to Support the Evaluation of Ad Hoc Networks** ................................................................................21
  *Jesús Friginal, David de Andrés, Juan-Carlos Ruiz, and Pedro Gil*

### Session 2: Mobile Networks

**Optimization Based Topology Control for Wireless Ad Hoc Networks to Meet QoS Requirements** ........................................30
  *Yadu Kishore K., Ashish Tiwari, and O.G. Kakde*

**Fault-Tolerant Aggregation for Dynamic Networks** ...................................................................................37
  *Paulo Jesus, Carlos Baquero, and Paulo Sérgio Almeida*

**Crash-Tolerant Collision-Free Data Aggregation Scheduling for Wireless Sensor Networks** ...........................................44
  *Arshad Jhumka*

Shedding Light on Enterprise Network Failures Using Spotlight

Dipu John, Pawan Prakash, Ramana Rao Kompella, and Ranveer Chandra

Session 6: Cloud and Middleware

An Entity-Centric Approach for Privacy and Identity Management in Cloud Computing

Pelin Angin, Bharat Bhargava, Rohit Ranchal, Noopur Singh, Mark Linderman, Lotfi Ben Othmane, and Leszek Lilien

Zibin Zheng, Yilei Zhang, and Michael R. lyu

Secure, Dependable, and High Performance Cloud Storage

Yunqi Ye, Liangliang Xiao, I-Ling Yen, and Farokh Bastani

On-Demand Recovery in Middleware Storage Systems

Lásaro Camargos, Fernando Pedone, Alex Pilchin, and Marcin Wieloch

Session 7: Data Management

P-Store: Genuine Partial Replication in Wide Area Networks

Nicolas Schiper, Pierre Sutra, and Fernando Pedone

FireSpam: Spam Resilient Gossiping in the BAR Model

Sonia Ben Mokhtar, Alessio Pace, and Vivien Quéma

Semias: Self-Healing Active Replication on Top of a Structured Peer-to-Peer Overlay

Stefania Costache, Thomas Ropars, and Christine Morin

Session 8: Testing/Assessment

Experimental Validation of a Synchronization Uncertainty-Aware Software Clock

Andrea Bondavalli, Francesco Brancati, Andrea Ceccarelli, and Michele Vadursi

Applying Text Classification Algorithms in Web Services Robustness Testing

Nuno Laranjeiro, Rui Oliveira, and Marco Vieira

Availability Assessment of HA Standby Redundant Clusters

Salvatore Distefano, Francesco Longo, and Marco Scarpa

Session 9: Algorithms

Diskless Checkpointing with Rollback-Dependency Trackability

Raphael Marcos Menderico and Islene Calciolari Garcia
Swift Algorithms for Repeated Consensus
Fatemeh Borran, Martin Hutle, Nuno Santos, and André Schiper

Thicket: A Protocol for Building and Maintaining Multiple Trees in a P2P Overlay
Mário Ferreira, João Leitão, and Luís Rodrigues

C-EMNs 2010: Workshop on Issues in Computing over Emerging Mobile Networks
A Tactical Information Management Middleware for Resource-Constrained Mobile P2P Networks
Bo Xu, Mark Linderman, Sanjay Madria, and Ouri Wolfson

On Optimizing Traffic Signal Phase Ordering in Road Networks
Jason Barnes, Vamsi Paruchuri, and Sriram Chellappan

Lightweight Fault-Tolerance for Peer-to-Peer Middleware
Rolando Martins, Priya Narasimhan, Luis Lopes, and Fernando Silva

Adaptive Routing Scheme for Emerging Wireless Ad Hoc Networks
Behdis Eslamnour and S. Jagannathan

Towards Mobile Data Streaming in Service Oriented Architecture
Norman Ahmed, Mark Linderman, and Jason Bryant

RACOS 2010: Workshop on Resilience Assessment of Complex Systems
Practical Aspects in Analyzing and Sharing the Results of Experimental Evaluation
Francesco Brancati and Andrea Bondavalli

A Study on Latent Vulnerabilities
Beng Heng Ng, Xin Hu, and Atul Prakash

CReW: Cloud Resilience for Windows Guests through Monitored Virtualization
Flavio Lombardi, Roberto Di Pietro, and Claudio Soriente

Quantifying Resiliency of IaaS Cloud
Rahul Ghosh, Francesco Longo, Vijay K. Naik, and Kishor S. Trivedi

Benchmarking the Resilience of Self-Adaptive Systems: A New Research Challenge
Raquel Almeida, Henrique Madeira, and Marco Vieira
DNCMS 2010: Workshop on Dependable Network Computing and Mobile Systems

Data-Mining-Based Link Failure Detection for Wireless Mesh Networks ....................................................353
   Timo Lindhorst, Georg Lukas, Edgar Nett, and Michael Mock

Data Validity and Dependable Perception in Networked Sensor-Based Systems .................................................................358
   Luís Marques and António Casimiro

A Multi-step Simulation Approach toward Secure Fault Tolerant System Evaluation ...............................................................363
   Ruchika Mehresh, Shambhu J. Upadhyaya, and Kevin Kwiat

Protection of Identity Information in Cloud Computing without Trusted Third Party .................................................................368
   Rohit Ranchal, Bharat Bhargava, Lotfi Ben Othmane, Leszek Lilien, Anya Kim, Myong Kang, and Mark Linderman

Author Index ........................................................................................................................................................................373
