Welcome from
the Conference Program Co-Chairs

This volume contains the proceedings of SUTC 2008, the second IEEE International Conference on Sensor Networks, Ubiquitous, and Trustworthy Computing. The conference took place in Taichung, Taiwan, 11-13 June 2008. Its objective was to bring together leading researchers from the closely related fields of sensor networks, ubiquitous computing, and trustworthy computing to present and discuss the latest results in this rapidly developing area.

A total of 102 papers were submitted to the conference by researchers from all over the world. After a thorough review by members of the Program Committee and external reviewers, 26 papers were selected for inclusion in the conference program. The technical program of SUTC 2008 represents a collection of excellent papers on important aspects of sensor networks, ubiquitous computing, and trustworthy computing—thus bringing together researchers from these related fields in a unique setting to exchange the latest results. In addition to the full technical papers, the conference program included six keynote presentations, two panel discussions, an industrial track as well as several workshops. The technical program was structured into three parallel tracks.

We would like to thank the Program Vice-Chairs Pedro J. Marron (University of Bonn, Germany), Trent Jaeger (Pennsylvania State University, USA), Andreas Willig (Technical University of Berlin, Germany), Tei-Wei Kuo (National Taiwan University, Taiwan), Gerd Kortuem (Lancaster University, UK), Yunhao Liu (Hong Kong University of Science and Technology, Hong Kong), Kun-Lung Wu (IBM Watson Research Lab, USA), and Chien-Chao Tseng (National Chiao-Tung University, Taiwan) for their tireless efforts which were instrumental in putting together a strong technical program for the conference. We would also like to thank the members of the Technical Program Committee for their excellent work in making this conference a success. We are greatly indebted to the General Co-Chairs Mukesh Singhal (University of Kentucky, USA), Giovanna Di Marzo Serugendo (University of London, UK), and Jeffrey P. Tsai (University of Illinois, Chicago, USA) for their generous help and successful coordination of the many activities involved in this conference.

Wang-Chien Lee, Pennsylvania State University, USA
Kay Romer, ETH Zurich, Switzerland
Yu-Chee Tseng, National Chiao-Tung University, Taiwan
