</thead>
<tbody>
<tr>
<td>3Pf: Prepare-Present-Positive Feedback– An Active Learning Approach for Low Achievers</td>
<td>1</td>
</tr>
<tr>
<td>Vijay T. Raisinghani</td>
<td></td>
</tr>
<tr>
<td>A Software Solution to Facilitate Moderation, Observation and Analysis in a Focused Group Interview (FGI)</td>
<td>9</td>
</tr>
<tr>
<td>Shitanshu Mishra and Rekha Ramesh</td>
<td></td>
</tr>
<tr>
<td>A Web-Based Virtual Laboratory for Electromagnetic Theory</td>
<td>13</td>
</tr>
<tr>
<td>Vasu Pulijala, Arjun R. Akula, and Azeemuddin Syed</td>
<td></td>
</tr>
<tr>
<td>ACt-PBL: An Adaptive Approach to Teach Multi-core Computing in University Education</td>
<td>19</td>
</tr>
<tr>
<td>Elavarasi Manogaran</td>
<td></td>
</tr>
<tr>
<td>An Educational Website on Kinematics of Robots</td>
<td>24</td>
</tr>
<tr>
<td>Debashree Sengupta, Neha Jain, and C. S. Kumar</td>
<td></td>
</tr>
<tr>
<td>An Integrated Approach to Build Programming Competencies through Spoken Tutorial Workshops</td>
<td>28</td>
</tr>
<tr>
<td>Kiran L. N. Eranki and Kannan M. Moudgalya</td>
<td></td>
</tr>
<tr>
<td>Assemblage of Recommendations with Constraints: A Choice Based Credit System Perspective</td>
<td>32</td>
</tr>
<tr>
<td>Maitri Jhaveri, Jyoti Pareek, and Jasmine Jha</td>
<td></td>
</tr>
<tr>
<td>Assessing Design of Online Courses Using Bayesian Belief Networks</td>
<td>36</td>
</tr>
<tr>
<td>Lino Forner, Vivekanandan S. Kumar, and Kinshuk</td>
<td></td>
</tr>
</tbody>
</table>
Assistive Learning for Children with Autism Using Augmented Reality ......................................................43
  Annie Joyce Vullamparthi, Sarat Chandra Babu Nelaturu, Dakshayani D. Mallaya, and S. Chandrasekhar

Automated Alertness and Emotion Detection for Empathic Feedback during e-Learning ........................................47
  S. L. Happy, Anirban Dasgupta, Priyadarshi Patnaik, and Aurobinda Routray

Automated Restructuring of Contents for Virtual Labs ......................................................................................51
  Sourav Chatterjee, Venkatesh Chopella, and Pranitha Reddy

Computer Literacy Programs in Rural Communities: Understanding Social Motivators ........................................53
  Raj Gopal P. Kantamneni and Ramanjaneyaraju Chintalapati

Concept Maps for Learning in a Flipped Classroom ..........................................................................................57
  Kamal Bijlani, Shiffon Chatterjee, and Sruthy Anand

Continuous Clustering in Big Data Learning Analytics ..........................................................................................61
  Kannan Govindarajan, Thamarai Selvi Somasundaram, Vivekanandan S. Kumar, and Kinshuk

Conversational Forensics: Building Conversational Pedagogical Agents with Attitude ........................................65
  Ireti Fakinlede, Vive Kumar, Dunwei Wen, and Kinshuk

Debugger Tool to Improve Conceptual Understanding of Programming Language of Novice Learners ..................69
  Manisha Nirgude

Decision Support System Using DMAIC for Academic Scheduling: ICT in Education Support Activities ..............73
  Jignesh C. Doshi and Bhushan Trivedi

Descriptive Study of College Bound Rural Youth of AP, India .............................................................................76
  V. R. J. Gollapudi Sai Prasad and Venkatesh Choppella

Dynamic Question Paper Template Generation Using Bi-proportional Scaling Method ........................................80
  Dimple V. Paul and Jyoti D. Pawar

Effect of Instructional System Design on Transformation of Learning Approaches ...........................................84
  Tamali Bhattacharyya and Bani Bhattacharya

Effect of Periodic sTiGD Activity on Long-Term Performance in System Programming Course ..........................91
  Sunita B. Aher

Effect of Program Visualization to Teach Computer Programming in a Resource Constrained Classroom ............93
  Dipali D. Awasekar
Enhanced Non-traditional Learning Environment for Communication Engineers
Using Free OpenSource Software Tools ........................................................................................................101
   S. Maragatharaj, K. Rathinakumar, and M. Dinesh kumar

Experience in Designing the Course for PG Chemistry Students Involving Extensive Technology .................................................................105
   Kamalika Banerjee

Gesture-Based Affective and Cognitive States Recognition Using Kinect for Effective Feedback during e-Learning .......................................................107
   Kartik Vermun, Mohit Senapaty, Anindhya Sankhla, Priyadarshi Patnaik, and Arobinda Routray

Globalisation of Next Generation Technology Enhanced Learning Environment (TELE) for STEM Learning: Contextualizations in the Asia-Pacific Region .................................................................111
   Arkendu Sen and Don Passey

Impact of Mindspark's Adaptive Logic on Student Learning ......................................................................................119
   Ramkumar Rajendran and Aarthi Muralidharan

Introducing Network Design to Students via a Dance Activity ..............................................................................123
   Bhavna Ambudkar

LAMP: A Framework for Large-Scale Addressing of Muddy Points ..............................................................................127
   Rwitajit Majumdar and Sridhar Iyer

Learner Centered Design Approach for e-Learning Using 3D Virtual Tutors ......................................................................................133
   Subhayan Mukherjee, Hitesh Singhal, Prashant Jha, Amol Kokane, Priyank Rastogi, Ravi Mittal, and Ram Guddeti

Learning from Blended Chemistry Laboratories .................................................................................................135
   Dietmar K. Kennepohl

Methodology to Create Optimized 3D Models Using Blender for Android Devices ..............................................................................................139
   Pooja Bhawar, Nitin Ayer, and Sameer Sahasrabudhe

Online Discussion Based Learning on Google Blogger for Introductory Programming Course ......................................................................................143
   Sharmistha Majumder

Ontology Based Knowledge Representation for Next Generation Mobile Learning ..............................................................................................145
   Kumar Mandula, Ramu Parupalli, Manasvi Mahant, and V. Muralidharan

Personalized Course Retrieval Using Literature Based Method in e-Learning System ......................................................................................147
   Tejaswi Gaikwad and Madhuri A. Potey

Problem Posing Exercises (PPE): An Instructional Strategy for Learning of Complex Material in Introductory Programming Courses ......................................................................................151
   Shitanshu Mishra and Sridhar Iyer
PULSE: A Framework for Protocol Based Utility to Log Student Engagement .............................................159
   Ritwijit Majumdar and Aditi Kothiyal

Relation of Modal Preference with Performance in Adaptive Hypermedia Modules .........................................................163
   Arnab Kumar Hazra, Priyadarshi Patnaik, and Damodar Suar

Reviving Chemistry through Technology in Engineering Education .................................................................167
   Jyotsna Cherukuri and Sandhya Kode

Role of Interpretative Treatment Method in Teaching-Learning History of Architecture ..................................................170
   Sarika Bahadure, Amit Wahrwagh, and Pankaj Bahadure

Smart Learning Environments for Teaching Electronics to Students ...................................................................174
   Shubhajit Roy Chowdhury, Harsh Wardhan, Surya Kiran Karri, Sandhya Kode, and Kaumudi Nagaraju

Teaching with Visualizations in Classroom Setting: Mapping Instructional Strategies to Instructional Objectives .................................................................176
   Gargi Banerjee, Mrinal Patwardhan, and Madhuri Mavinkurve

The Effect of Comic Strips as a Supplementary Material to Teach Computer Networks ..................................................184
   Lakshmi Ganesh

Training In-Service Teachers to Do Action Research in Educational Technology ............................................................192
   Jayakrishnan Madathil Warriem, Sahana Murthy, and Sridhar Iyer

Usage of Online Educational Courses by Undergraduate Engineering Students in Karnataka ..................................................200
   Deepti Desai

Using MediaWiki to Increase Teaching Expertise in Engineering Colleges ................................................................204
   Sandhya Kode, Kaumudi Nagaraju, Lakshmi Gollapudi, and Surya Kiran Reddy

Viewing Algorithms as Iterative Systems and Plotting Their Dynamic Behaviour ..........................................................206
   Venkatesh Choppella, K. Viswanath, and P. Manjula

Voice Cues, Keyboard Entry and Mouse Click for Detection of Affective and Cognitive States: A Case for Use in Technology-Based Pedagogy ........................................................210
   Bibek Kabi, Amiya Samantaray, Priyadarshi Patnaik, and Aurobinda Routray
