Welcome Message
from the Program Chairs
TrustCom 2011

On behalf of the program committee of “The 10th IEEE International Conference on Trust, Security and Privacy in Computing and Communications (IEEE TrustCom-11)”, we would like to welcome you to the conference! The conference will be held in Changsha, Hunan Province, China, November 16-18, 2011. Changsha is a famous historical and cultural city with a variety of attractions. In particular, Changsha is very close to Chairman Mao’s former residence, which is within one-hour driving.

The conference aims to bring together researchers and practitioners from around the world who are working on trusted computing and communications, with a focus on trust, security, privacy, reliability, dependability, survivability, availability, and fault tolerance aspects of computer systems and networks. With the goal of providing a forum to present and discuss emerging ideas and trends in this highly challenging research field, the conference will feature keynote speeches, technical presentations, panel discussions, symposiums and workshops.

We are delighted that the conference continues to attract high-quality submissions from a diverse and international group of researchers and practitioners. This year, we received 471 submissions for the conference including symposiums and workshops. All papers received at least three reviews from the program committee members. Based on these reviews, we selected 126 papers for presentation at the conference (giving an acceptance rate of 26.8%). A total of 20 technical sessions, organized in 3 parallel tracks, form the core of the technical program. This year, we will select 2 best paper awards for the conference.

It would have been impossible to organize the conference without the hard work and dedication of many people. In particular, we would like to thank all researchers and practitioners who submitted their manuscripts, and thank the program committee members for all their contributions during the paper reviewing and selection process.

We hope that the conference will provide a very good opportunity for you to learn from each other. Enjoy the conference!
