Welcome Message
from the Program Chairs

ICESS 2011

On behalf of the program committee of “The 8th IEEE International Conference on Embedded Software and Systems (ICESS-11)”, we would like to welcome all of you to join the conference. ICESS this year is held in Changsha, China, November 16-18, 2011. Changsha is a famous historical and cultural city with a variety of attractions. The conference aims at providing a forum for scientists, engineers and researchers to discuss and exchange novel ideas, results, experiences and work-in-progress on all aspects of embedded software and systems. ICESS 2011 is co-located with the 10th IEEE International Conference on Trust, Security and Privacy in Computing and Communications (IEEE TrustCom-11) and the 6th International Conference on Frontier of Computer Science and Technology (FCST-11). It will feature keynote speeches along with the co-located conferences, technical presentations, and workshops.

This year, we received 185 submissions for the conference including workshops. All papers received at least three reviews from the program committee members. Based on these reviews, we selected 52 papers for presentation at the conference (31 regular conference papers, 6 short conference papers, and 15 workshop papers), giving an acceptance rate of 28.1%. A total of 10 technical sessions, organized in 2 parallel tracks, form the core of the technical program. This year, we will select 2 best paper awards for the conference.

It would be impossible to organize the conference without the hard work and dedication of many people. In particular, we would like to thank all researchers and practitioners who submitted their manuscripts, and thank the program committee members for all their contributions during the paper review and selection process.

We hope all of you enjoy the conference and find that it will be a very good opportunity to learn from each other and that your attendance will be most enjoyable and fruitful.
