Message from the FUSION 2014
Workshop Chairs
UIC-ATC-ScalCom 2014

Advances and developments in computing systems and innovative technologies are fast growing towards more complex, heterogeneous, dynamically scalable, ubiquitous, autonomic, connected and trustworthy computing systems. The aim of FUSION-14 workshop is to provide a venue of scientific interaction of grand challenging research and development areas of future infrastructure/platforms of complex network computing system technologies, innovations and applications. We are looking forward to your active participation in this event and in the FUSION 2014 workshop.

Ching Hsien Hsu, Chung Hua University, Taiwan
Bernady O. Apduhan, Kyushu Sangyo University, Japan
Rafael Santos, Brazilian National Institute for Space Research, Brazil
FUSION 2014 Workshop Chairs

Agustinus Borgy Waluyo, Monash University, Australia
Ching Hsien Hsu, Chung Hua University, Taiwan
Fenghui Yao, Tennessee State University, USA
Hai V. Tran, GAO Center for Technology and Engineering, USA
Hiroaki Higaki, Tokyo Denki University, Japan
Kaori Yoshida, Kyushu Institute of Technology, Japan
Kazuaki Tanaka, Kyushu Institute of Technology, Japan
Mario Koeppen, Kyushu Institute of Technology, Japan
Mohd Amril Nurman Mohd Nazir, MIMOS Berhad, Malaysia
Rafael Santos, Brazilian National Institute for Space Research, Brazil
Toshihiro Uchibayashi, Kyushu Sangyo University, Japan
Toshihiro Yamauchi, Okayama University, Japan
FUSION 2014 Program Committee and Reviewers
