Message from the USDE 2014
Symposium Chairs
UIC-ATC-ScalCom 2014

We are happy to welcome you to the International Symposium on Ubiquitous Systems and Data Engineering (USDE-14). The symposium is held in conjunction with the 11th IEEE International Conference on Ubiquitous Intelligence and Computing (IEEE UIC-14), December 09-12, 2014, Bali, Indonesia.

USDE-14 contains 7 invited papers selected from the ones submitted to the IEEE UIC-14 main track, and thus all the papers were peer reviewed by members of the IEEE UIC-14 program committee. The symposium covers a broad range of topics in the field of ubiquitous and intelligent systems and data engineering, such as ubiquitous computing models, theorems, systems and applications; smart objects, environments and systems; service computing modeling, management and applications; mobile/ubiquitous/pervasive computing; cloud/utility/web/services computing. We thank the authors for submitting their work and the members of the IEEE UIC-14 program committee for managing the reviews of the symposium papers in such short time.

We believe this symposium complements perfectly the topic focus of IEEE UIC-14 and provides additional breadth and depth to the main conference. Finally, we hope you enjoy the symposium and have a fruitful meeting in Bali, Indonesia.
