Table of Contents

Foreword ........................................................................................................................................... viii
Organizing Committee ......................................................................................................................... x

Keynotes
Emerging Paradigms for CS Education and Their Implications for Visual Languages ..................1
   Ben Shapiro
Value-driven Learning: Decoding and Building upon Playful Computing Education .......................3
   Betsy DiSalvo

Most Influential Paper Presentations
Reflections on ‘What do we Think we are Doing’ (VL 1996) .................................................................5
   Alan Blackwell
   Jeffrey Stylos and Brad Myers

Software Engineering Navigation
Foraging Goes Mobile: Foraging While Debugging on Mobile Devices ........................................9
   David Piorkowski, Sean Penney, Austin Henley, Marco Pistoia, Margaret Burnett, Omer Tripp and Pietro Ferrara
Flower: Navigating Program Flow in the IDE ......................................................................................19
   Justin Smith, Chris Brown and Emerson Murphy-Hill
Exploring Exploratory Programming .................................................................................................25
   Mary Beth Kery and Brad Myers
Facilitating End-User Developers by Estimating Time Cost of Foraging a Webpage ..................31
   Xiaoyu Jin, Nan Niu and Michael Wagner

Software Understanding
   Michelle Ichinco and Caitlin Kelleher
Understanding Recurring Quality Problems and Their Impact on Code Sharing in Block-Based Software ........................................................................................................................................43
   Peeratham Techapalokul and Eli Tilevich
A Study of the Effectiveness of Usage Examples in REST API Documentation ..............................53
   S. M. Sohan, Frank Maurer, Craig Anslow and Martin Robillard
MOONSTONE: Support for Understanding and Writing Exception Handling Code .......................63
   Florian Kistner, Mary Beth Kery, Michael Puskas, Steven Moore and Brad Myers
What makes a task difficult? An Empirical Study of Perceptions of Task Difficulty.............67
Rafael Leano, Souti Chattopadhyay and Anita Sarma

Software Engineering Tools

Refactoring-Aware Code Review ..................................................................................71
Xi Ge, Saurabh Sarkar, Jim Witschey and Emerson Murphy-Hill

Debugging Behaviour of Embedded-Software Developers: An Exploratory Study ..........89
Pansy Arafa, Daniel Solomon, Samaneh Navabpour and Sebastian Fischmeister

The Usability of Task Modeling Tools........................................................................95
Markel Vigo, Carmen Santoro and Fabio Paternò

Evaluating How Static Analysis Tools Can Reduce Code Review Effort...................101
Devarshi Singh, Varun Sekar, Kathryn Stolee and Brittany Johnson

TraceDiff: Debugging Unexpected Code Behavior Using Trace Divergences ............107
Ryo Suzuki, Gustavo Soares, Andrew Head, Elena Glassman, Ruan Reis, Melina Mongiovì,
Loris D’antonii and Björn Hartmann

Spreadsheets and Users

A Decomposition-Based Approach to Spreadsheet Testing and Debugging .............117
Thomas Schmitz, Dietmar Jannach, Birgit Hofer, Patrick Koch, Konstantin Schekotihin and
Franz Wotawa

Systematic Spreadsheet Construction Processes .......................................................123
Jorge Mendes, Jácome Cunha, Francisco Duarte, Gregor Engels, João Saraiva and Stefan
Sauer

How Software Users Recommend Tools to Each Other...........................................129
Chris Brown, Justin Middleton, Esha Sharma and Emerson Murphy-Hill

Empirical Studies

Gender HCI and Microsoft: Highlights from a Longitudinal Study...........................139
Margaret Burnett, Robin Counts, Ronette Lawrence and Hannah Hanson

Expressions on the Nature and Significance of Programming and Play ....................145
Titus Barik

Spreadsheet Practices and Challenges in a Large Multinational Conglomerate.........155
Justin Smith, Justin Middleton and Nicholas A. Kraft

Visual Languages for Smart Spaces: End-User Programming between Data-Flow and
Form-Filling..............................................................................................................165
Michaela Reisinger, Johann Schrammel and Peter Froehlich

Learning

HappyFace: Identifying and Predicting Frustrating Obstacles for Learning Programming
at Scale...............................................................................................................171
Ian Drosos, Philip Guo and Chris Parnin
An Exploratory Study of the Usage of Different Educational Resources in an Independent Context .................................................................181
Wint Hnin, Michelle Ichinco and Caitlin Kelleher

Predicting Abandonment in Online Coding Tutorials .................................................................191
An Yan, Michael Lee and Andrew Ko

How Block Categories Affect Learner Satisfaction with a Block-Based Programming Interface ...........................................................................201
Fernando Rodríguez, Kimberly Price, Joseph Isaac Jr., Kristy Boyer and Christina Gardner-McCune

AgentDesign: A Tool to Scaffold Software Design for Elementary Students...........................................207
Ian Her Many Horses

Communication & Motivation

Metacommunication Between Programmers Through an Application Programming Interface: A semiotic analysis of date and time APIs .......................................................................................213
João Bastos, Luiz Afonso and Clarisse de Souza

A Case Study of Motivations for Corporate Contribution to FOSS ..............................................................................................................223
Iftekhar Ahmed, Darren Forrest and Carlos Jensen

Workers who use spreadsheets and who program earn more than similar workers who do neither .................................................................................................233
Christopher Scaffidi

Someone Like Me: How Does Peer Parity Influence Participation of Women on Stack Overflow? ..............................................................................................239
Denae Ford, Alisse Harkins and Chris Parnin

Diagrams and Notation

Visualizing OWL 2 using Diagrams .................................................................................................245
Gem Stapleton, Michael Compton and John Howse

Visual Logics Help People: An Evaluation of Diagrammatic, Textual and Symbolic Notations .................................................................255
Eisa Alharbi, John Howse, Gem Stapleton, Ali Hamie and Anestis Touloumis

Visualizing Serverless Cloud Application Logs for Program Understanding ....................................261
Kerry Chang and Stephen Fink

Support for learning while debugging in a distributed visual programming language ........................267
Laxmi Ganesan, Christopher Scaffidi and Andrew Dove

Novel Interfaces

End-user Development for the Internet of Things OR How can a (smart) light bulb be so complicated? .................................................................................................273
Bruno Chagas, David Redmiles and Clarisse de Souza

Investigating Uni-Stroke Gesture Input for Diagram Editors on Large Wall-Mounted Touch-Screens .............................................................................................................279
Christian Schenk, Sonja Schimmller and Mark Minas
Syntax-Directed Keyboard Extension: Evolution and Evaluation ........................................285
Islam Almusaly, Ronald Metoyer and Carlos Jensen

Text Entry Using Five to Seven Physical Keys ................................................................291
Elliot Lockerman, Shuobi Wu, Ariel Rao, Jarret Lin, Neil Bantoc and Brad Myers

Understanding user perceptions of privacy, and configuration challenges in home automation .................................................................297
Kim Kaaz, Alex Hoffer, Mahsa Saeidi, Anita Sarma and Rakesh Bobba

NeuroBlock: A Block-Based Programming Approach to Neurofeedback Application Development ...........................................................303
Chris Crawford and Juan Gilbert

Graduate Consortium

End-User Design for the Internet of Things: Supporting incremental evolution through breakdowns .................................................................309
Bruno Chagas

An Approach to Gesture-based Editing of Diagrams ......................................................311
Christian Schenk

Data-Driven Visualisations that Make Sense ................................................................313
Humphrey Obie

Moving from the Known to the Unknown to Measure the Initial Learnability of Programming Languages ......................................................315
Brian Frey

Idiomata: Direct Manipulation of Code through Idiomatic Views ................................317
David Samudio

Using Eye Tracking to Identify Features of Peer Parity on Stack Overflow ....................319
Denae Ford

Tools to Support Exploratory Programming with Data ..................................................321
Mary Beth Kery

End User Mobile Task Automation using Multimodal Programming by Demonstration ....323
Toby Jia-Jun Li

Context in Exploratory Programming: Towards a Theoretical Framework .....................325
Souti Chattopadhyay

Personalized Learning Pathways Using Code Puzzles for Novice Programmers ............327
Wint Yee Hnin

Showpieces

Chasing the AHA! Moment: Exploring Initial Learnability of Programming Languages ....329
Brian Frey, Juliana Doddridge and Carolyn Seaman

Visual End-User Programming in Smart Homes: Complexity and Performance ..........331
Michaela Reisinger, Johann Schrammel and Peter Fröhlich

An AI-based Interactive Tool for Spreadsheet Debugging .........................................333
Thomas Schmitz and Dietmar Jannach
Towards Block Code Examples that Help Young Novices Notice Critical Elements ..................335
Michelle Ichinco and Caitlin Kelleher

Quality Hound — an Online Code Smell Analyzer for Scratch Programs..................................337
Peeratham Techapalokul and Eli Tilevich

iSnap Demonstration .................................................................................................339
Thomas Price and Tiffany Barnes

Discovery-based Praxes: Chanelling the User- Interface of an Industrial-Strength Programming Environment to Formally Teach Programming ...........................................341
Prasun Dewan

Visualising Melbourne Pedestrian Count ........................................................................343
Humphrey Obie, Caslon Chua, Iman Avazpour, Mohamed Abdelrazek and John Grundy

TAPASPlay: A Game-Based Learning approach to foster Computation Thinking Skills ........345
Alessio Malizia, Tommaso Turchi, David Bell, Daniela Fogli and Federico Danesi
