List of Papers

Preface

VS-Games 2013 Conference Committees

Keynotes

**How Does Usability Impact Motivation in Augmented Reality Serious Games for Education?**
*Vicente Ferrer, Alex Perdomo, Hazem Rashed-Ali, Carmen Fies, John Quarles*

**Measuring climate change knowledge in a social media game with a purpose**
*Sebastian Seebauer*

**Serious Game Design: Motivating Students through a Balance of Fun and Learning**
*Christopher Franzwa, Ying Tang, Aaron Johnson*

**Engaging Engineering Students with Gamification**
*Gabriel Barata, Sandra Gama, Joaquim Jorge, Daniel Gonçalves*

**Converting Sedentary Games to Exergames: A Case Study with a Car Racing Game**
*Rongkai Guo, John Quarles*

**Serious Games in Formal Medical Education: An Experimental Study**
*Claudia Ribeiro, Tiago Antunes, Micaela Monteiro, João Pereira*

**MeTycoon: A Game-Based Approach to Career Guidance**
*Ian Dunwell, Petros Lameras, Sara de Freitas, Panos Petridis, Maurice Hendrix, Sylvester Arnab, Kam Star*

**Marketing tourism via electronic games: understanding the motivation of tourist players**
*Feifei Xu, Feng Tian, Dimitrios Buhalis, Jessika Weber*

**Gameful Pedagogy and Collaborative Learning**
*Anna Feigenbaum, Alexander Feigenbaum*

**Educational Games – Are They Worth The Effort?**
*Per Backlund, Maurice Hendrix*

**Affective Educational Games: Utilizing Emotions in Game-Based Learning**
*Phillip Wilkinson*

**An Initial Study to Assess the Perceived Realism of Agent Crowd Behaviour in a Virtual City**
*Stuart O'Conner, Fotis Liarokapis, Christopher Peters*

**Efficient Mesoscopic Simulations for Persistent Agents in 3D-Applications and Games**
*Thomas Dettmar, Sven Seele, Rainer Herpers, Peter Becker, Christian Bauckhage*
Choosing the Infrastructure for Entertainment and Serious Computer Games – a Whiteroom Benchmark for Game Engine Selection
Eike Falk Anderson, Leigh McLoughlin, Joe Watson, Sam Holmes, Peter Jones, Hayden Pallett, Brendan Smith

Survey and Evaluation of MPEG-4 Based 3D Character Animation Frameworks
Ricardo L. Parreira Duarte, Abdennour El Rhalibi, Christopher Carter, Madjid Merabti

A video game prototype for speech rehabilitation
Diego Loaiza, Claudia Oviedo, Andrés Castillo, Anita Portilla, Gloria Alvarez, Diego Linares, Andrés Navarro

Use of Gaming Sensors and Customised ExerGames for Parkinson’s Disease Rehabilitation
Ioannis Paraskevopoulos, Emmanuel Tsekleves

VR-based Safety Evaluation of Automatically Controlled Machine Tools
Rainer Herpers, David Scherfgen, Moritz Vieth, Timur Saitov, Sandra Felsner, Thomas Hofhammer, Michael Schaefer, Michael Huelke

Combining Storytelling Tradition and Pervasive Gaming
P. J. Alavesa, D. Zanni

Spatial Choices in an Educational Geogame
Dominik Kremer, Christoph Schlieder, Barbara Feulner, Ulrike Ohl

Sharing Experiences with Serious Games
Maurice Hendrix, Per Backlund, Mikael Lebram, Henrik Lundqvist

Assessing Brain-Computer Interfaces for Controlling Serious Games
Fotis Liarokapis, Athanasios Vourvopoulos, Alina Ene, Panagiotis Petridis

Smoke and Shadows: Rendering and Light Interaction of Smoke in Real-Time Rendered Virtual Environments
Christopher J. Bass, Eike Falk Anderson

AntsWorld - A Tangible Interface for an Interactive Ant Foraging Simulator
Muharrem Yildirim, David Tinapple

From the outside looking in
Padmini Ray Murray, Souvik Mukherjee

Playing Entrepreneurship
Emiliano Labrador, Oscar Garcia, Albert Cubeles, Paul Fox

Green Gang vs. Captain Carbon
Sebastian Seebauer, Karl-Heinz Kettl, Martin Berger, Markus Moser

Is Serious Games Design Political? The Competing Logics When using a Game Engine
Edouard Pignot
Technology Challenges of Virtual Worlds in Education & Training – Research directions
Leonel Morgado

Transferring a Virtual Environment Client Session Between Independent OpenSimulator Installations
Justin Clark-Casey

Federation technology and Virtual Worlds for Learning: Research trends and opportunities towards identity federation
Gonçalo Cruz, António Costa, Paulo Martins, Ramiro Gonçalves, João Barroso
