Online Learning of Region Confidences for Object Tracking, 1
D. Chen and J. Yang,  
*School of Computer Science, Carnegie Mellon University.*

Validation of Blind Region Learning and Tracking, 9
J. Black, D. Makris and T. Ellis,  
*Digital Imaging Research Centre, Kingston University, UK.*

Rao-Blackwellised Particle Filter for Tracking with Application in Visual Surveillance, 17
X. Xu and B. Li,  
*Department of Computer Science and Engineering, Arizona State University, USA.*

Object Tracking with Dynamic Feature Graph, 25
F. Tang and H. Tao,  
*Department of Computer Engineering, University of California, Santa Cruz, USA.*

Data Fusion for Robust Head Tracking by Particles, 33
Y. Jin and F. Mokhtarian,  
*Centre for Vision, Speech and Signal Processing, University of Surrey, UK.*

Integrating Component Cues for Human Pose Tracking, 41
M. W. Lee and R. Nevatia,  
*Institute for Robotics and Intelligent Systems, University of Southern California.*

Efficient Occlusion Handling for Multiple Agent Tracking by Reasoning with Surveillance Event Primitives, 49
1P. Guha, 2A. Mukerjee and 1K. S. Venkatesh,  
1Department of Electrical Engineering, IIT Kampur, India;  
2Department of Computer Science and Engineering, IIT Kampur, India.

Ontology-Based Hierarchical Conceptual Model for Semantic Representation of Events in Dynamic Scenes, 57
L. Xin and T. Tan,  
*National Laboratory of Pattern Recognition, Institute of Automation, Chinese Academy of Sciences.*
Behaviour Recognition via Sparse Spatio-Temporal Features, .............................................. 65
P. Dollár, V. Rabaud, G. Cottrell and S. Belongie,
Department of Computer Science and Engineering,
University of California, San Diego, USA.

A Hybrid Blob- And Appearance-Based Framework for Multi-Object
Tracking through Complex Occlusions, ................................................................. 73
L-Q. Xu and P. Puig,
BT Research and Venturing, BT Group PLC, UK.

Robust Object Matching for Persistent Tracking with Heterogeneous Features, .............. 81
1Y. Guo, 1H. Sawhney, 1R. Kumar and 2S. Hsu,
1Sarnoff Corporation, USA;
2Canesta, Inc., Sunnyvale, CA USA.

Tracking Objects in Occluding Environments using Temporal
Spatio-Velocity Transform, .................................................................................. 89
K. Sato and J. K. Aggarwal,
Department of Electrical and Computer Engineering,
The University of Texas at Austin, USA.

Distant Targets Identification as an On-Line Dynamic Vehicle Routing Problem
using an Active-Zooming Camera, ........................................................................ 97
A. del Bimbo and F. Pernici,
Dipartimento di Sistemi e Informatica, Università di Firenze, Italy.

Evaluation of MPEG7 Colour Descriptors for Visual Surveillance Retrieval, ................. 105
J. Annesley, J. Orwell and J-P. Renno,
Digital Imaging Research Centre, Kingston University, UK.

Comparison of Target Detection Algorithms using
Adaptive Background Models, ................................................................................ 113
1D. Hall, 2J. Nascimento, 2P. Ribeiro, 3E. Andrade, 2P. Moreno, 1S. Pesnel, 3T. List,
1R. Emonet, 3R. B. Fisher, 2J. Santos-Victor and 1J. L. Crowley,
1INRIA Rhône-Alpes, France;
2IST Lisbon, Portugal;
3University of Edinburgh, UK.

Appearance-Based 3D Face Tracker: An Evaluation Study, .......................................... 121
F. Dornaika and A. D. Sappa,
Computer Vision Centre, Autonomous University of Barcelona, Spain.

Performance Evaluating the Evaluator, ..................................................................... 129
T. List, J. Bins, J. Vazquez and R. B. Fisher,
School of Informatics, University of Edinburgh, UK.

Performance Evaluation of a Real Time Video Surveillance System, .............................. 137
S. Muller-Schneider, T. Jager, H. S. Loos and W. Niem,
Robert Bosch GmbH, Hildesheim, Germany.
Evaluation of Object Tracking for Aircraft Activity Surveillance, 145
1D. Thirde, 1M. Borg, 2J. Aguilera, 1J. Ferryman, 1K. D. Baker and 2M. Kampel,
1Computational Vision Group, The University of Reading, UK;
2Pattern Recognition and Image Processing Group,
Vienna University of Technology, Austria.

Background Initialisation with a New Robust Statistical Approach, 153
H. Wang and D. Suter,
Institute for Vision System Engineering,
Department of Electrical and Computer Systems Engineering,
Monash University, Australia.

Modelling Background from Compressed Video, 161
1,2W. Wang, 1D. Chen, 2W. Gao and 1J. Yang,
1School of Computer Science, Carnegie Mellon University, USA;
2Institute of Computing Technology and Graduate School,
Chinese Academy of Sciences, Beijing, China.

Illumination and Motion-Based Video Enhancement for Night Surveillance, 169
1J. Li, 2S. Z. Li, 1Q. Pan and 1T. Yang,
1College of Automatic Control, Northwestern Polytechnical University, Xi’an, China;
2National Laboratory of Pattern Recognition, Institute of Automation,
Chinese Academy of Sciences, Beijing, China.

Towards Intelligent Camera Networks: A Virtual Vision Approach, 177
1F. Z. Qureshi and 1,2D. Terzopoulos,
1Department of Computer Science, University of Toronto, Canada;
2Courant Institute for Mathematical Sciences, New York University, USA.

On Calibrating a Camera Network using Parabolic Trajectories of a Bouncing Ball, 185
1K-W. Chen, 1,2Y-P. Hung and 3Y-S. Chen,
1Department of Computer Science and Information Engineering,
National Taiwan University, Taipei, Taiwan;
2Graduate Institute of Networking and Multimedia,
National Taiwan University, Taipei, Taiwan;
3Department of Computer Science, National Chiao Tung University, Hsinchu, Taiwan.

Face Recognition through Mismatch Driven Representations of the Face, 193
S. Lucey and T. Chen,
Advanced Multimedia Processing Laboratory,
Department of Electrical and Computer Engineering, Carnegie Mellon University, USA.

Discriminant Locality Preserving Projections: A New Method to Face Representation and Recognition, 201
W. Yu, X. Teng and C. Liu,
Institute of Image Processing and Pattern Recognition,
Shanghai Jiaotong University, China.
Can the Surveillance System Run Pose Variant Face Recognition in Real Time? 209
H. S. Le and H. Li,
Department of Applied Physics and Electronics, Umeå University, Sweden.

Reconstruction of 3D Face from a Single 2D Image for Face Recognition, 217
Y. Hu, Y. Zheng and Z. Wang,
Department of Automation, University of Science and Technology of China, China.

On-Line Conservative Learning for Person Detection, 223
1P. M. Roth, 1H. Grabner, 2D. Skočaj, 1H. Bischof and 2A. Leonardis,
1Institute for Computer Graphics and Vision, Graz University of Technology, Austria;
2Faculty of Computer and Information Science, University of Ljubljana, Slovenia.

Using SVM for Efficient Detection of Human Motion, 231
1J. Grahn and 2H. Kjellström,
1School of Computer Science and Communication,
KTH (Royal Institute of Technology), Sweden;

Deleted Interpolation using a Hierarchical Bayesian Grammar Network for
Recognising Human Activity, 239
1K. M. Kitani, 1Y. Sato and 2A. Sugimoto,
1Institute of Industrial Science, The University of Tokyo, Japan;
2National Institute of Informatics, Tokyo, Japan.

Efficient Hidden Semi-Markov Model Inference for Structured Video Sequences, 247
D. Tweed, R. Fisher, J. Bins and T. List,
Institute for Perception, Action and Behaviour,
School of Informatics, University of Edinburgh, UK.

Visual Surveillance for Aircraft Activity Monitoring, 255
1D. Thirde, 1M. Borg, 2V. Valentin, 2F. Fusier, 3J. Aguilera, 1J. Ferryman,
2F. Brémond, 2M. Thonnat and 3M. Kampel,
1Computational Vision Group, The University of Reading, UK;
2INRIA Sophia-Antipolis, France;
3Pattern Recognition and Image Processing Group,
Vienna University of Technology, Austria.

Object Tracking using Colour Correlogram, 263
Q. Zhao and H. Tao,
Department of Computer Engineering, University of California at Santa Cruz, USA.

A Contour-Based Moving Object Detection and Tracking, 271
1M. Yokoyama and 2T. Poggio,
1Advanced LSI Design and Development Division, Sony Corporation, Japan;
2Center for Biological and Computational Learning, MIT, USA.

Vehicle Categorisation: Parts for Speed and Accuracy, 277
1E. Nowak and 1F. Jurie,
1Laboratoire GRAVIR, INRIA Rhône-Alpes, France;
2Société Bertin - Technologies, Aix-en-Provence, France.
Vehicle Class Recognition from Video Based on 3D Curve Probes, 285
D.Han, M. J. Leotta, D. B. Cooper and J. L. Mundy,
Division of Engineering, Brown University, USA.

Evaluation of Motion Segmentation Quality for Aircraft Activity Surveillance, 293
1J. Aguilera, 1H. Wildenauer, 1M. Kampel, 2M. Borg, 2D. Thirde and 2J. Ferryman,
1Pattern Recognition and Image Processing Group,
Vienna University of Technology, Austria;
2Computational Vision Group, The University of Reading, UK.

Application and Evaluation of Colour Constancy in Visual Surveillance, 301
J. P. Renno, D. Makris, T. Ellis and G. A. Jones,
Digital Imaging Research Centre, Kingston University, UK.

The Terrascope Dataset: Scripted Multi-Camera Indoor Video Surveillance with Ground-Truth, 309
C. Jaynes, A. Kale, N. Sanders and E. Grossman,
Department of Computer Science and
Centre for Visualisation and Virtual Networks, University of Kentucky, USA.

D. P. Young and J. M. Ferryman,
Computational Vision Group,
School of Systems Engineering, The University of Reading, UK.

Towards Interactive Generation of “Ground Truth” in Background Subtraction from Partially Labelled Examples, 325
E. Grossman, A. Kale and C. Jaynes,
Department of Computer Science and
Centre for Visualisation and Virtual Networks, University of Kentucky, USA.

A Comparison of Contour Trackers Based on Blurring and on Marginalization, 333
A. E. C. Pece,
Heimdal Vision, Bjornsonvej 29, Copenhagen 2500, Denmark.

Improving Performance via Post Track Analysis, 341
L. M. Brown, M. Lu, C-F. Shu, Y-L. Tian and A. Hampapur,
IBM T. J. Watson Research Centre, NY USA.

A Quantitative Evaluation of Video-Based 3D Person Tracking, 349
A. O. Balan, L. Sigal and M. J. Black,
Department of Computer Science, Brown University, USA.
