Welcome Message from CCSI-2012 Workshop Organizers

This is third year that we organize International Workshop on Cloud Computing, Services and Interoperability (CCSI-2012). Earlier it existed under the name CCS at AINA and Intercloud at HPCS. This year can be considered a breakthrough. We have almost doubled the amount of submissions. At the same time, the quality of submissions has also increased. We have received 14 submissions and accepted four papers for presentation in CCSI-2012.

In our workshop series CCSI and conference series IEEE CloudCom we noticed significant increase of interest in Cloud computing and simultaneously the technical level of papers. Interestingly, we also spot geographical variation of interest in particular topics: Asia mostly focused virtualization, Americas on MapReduce and Europe on services; of course with exceptions.

We are deeply thankful to AINA organizers for providing us with an opportunity to organize our workshop series. We also are grateful to all the authors that make this workshop possible. Finally, we wanted to express our appreciation to CCSI Program Committee that ensures the highest quality of accepted papers.

CCSI-2012 Organizers

Chunming Rong, University of Stavanger, Norway
Ching-Hsien (Robert) Hsu, Chung Hua University, Taiwan
Tomasz Wiktor Wlodarczyk, University of Stavanger, Norway
Gansen Zhao, South China Normal University, China
