Welcome Message from PAMS-2012 Workshop Organizers

Welcome to the 2nd International Workshop on Protocols and Applications with Multi-Homing Support (PAMS-2012). The PAMS-2012 is held in conjunction with the 26th IEEE International Conference on Advanced Information Networking and Applications (AINA-2012) at Fukuoka Institute of Technology, Fukuoka, Japan from March 26 to March 29, 2012.

The rising popularity of resilience-critical applications – like e-commerce, e-health and emergency services – has boosted the interest in deploying multi-homed endpoints: systems are connected to multiple networks in order to provide necessary resilience. The management of multi-homing creates challenges for applications and underlying protocols alike. For the best application performance, the approaches on the different protocol layers should work cooperatively. The intent of our workshop is to bring together people from research and industry, in order to provide a discussion forum for state-of-the-art topics related to multi-homing on Network, Transport, Session and Application Layer.

PAMS-2012 contains high quality research papers submitted by researchers from all over the world. First, we would like to thank all the authors for their contributions. Furthermore, we would like to thank all the reviewers who have carefully evaluated the submitted papers.

We hope that you will enjoy the workshop as well as the conference and have a great time in Fukuoka!

PAMS-2012 Workshop General Chairs

Thomas Dreiholz, University of Duisburg-Essen, Germany
Martin Becke, University of Duisburg-Essen, Germany

PAMS-2012 Workshop Program Chairs

Michael Tüxen, Münster University of Applied Sciences, Germany
Erwin Paul Rathgeb, University of Duisburg-Essen, Germany
